*Calculated on operating expenditure and operating income excluding investment properties fair value gains and translation gains on net foreign currency monetary assets.

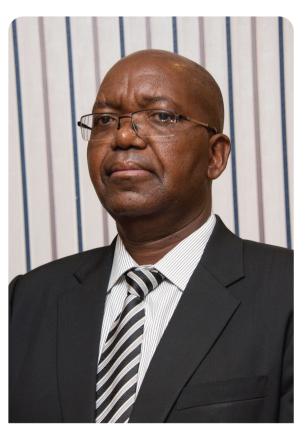

Commenting on the inflation adjusted performance for the 9 months ended 30 September 2019, Mr Benefit Peter Washaya, the Group Chief Executive Officer, said:

"The year to date Group profits before tax increased by 103% to ZWL146.1 million from ZWL72.0 million for the 9 months ended 30 September 2018 largely driven by translation gains on foreign currency balances, investment properties fair value gains and fee and commission income and these were partly offset by the loss on net monetary position arising from the hyper-inflationary accounting basis adopted by the Group.

In order to fund the growth initiatives being pursued by the Group, the Board resolved not to declare an interim dividend.

I wish to extend my appreciation to the Board, my fellow management and staff for their relentless efforts, which have culminated in the achievement of these results recorded by the Group in the period under review. I also wish to express my heartfelt appreciation to our valued clients who have continued to support the Bank.

The Bank continued with its financial inclusion drive and this has seen the opening of a significant number of low cost accounts via our NMBLite product. We continued to invest in digital channels to support a cashless society and in

-

2019 Overall **Bank of** the Year

Banks and Banking

this regard, the Bank has continued to rollout mPOS devices to SMEs and the informal sector and the take up has been quite positive, much to the convenience of the transacting public and our valued customers.

The Bank opened a branch in the resort town of Victoria Falls on 9 September 2019 for the convenience of the tourist town's residents and visitors. The construction of our new Head Office along Borrowdale Road is progressing well and the new building should be ready for occupation in the first half of *2020*.

The Bank's focus remains that of increasing its customer base and transactional volumes anchored on the Bank's digital strategy".

Mr Benefit Peter Washaya Group Chief Executive Officer, NMBZ Holdings Limited

GROUP INFLATION ADJUSTED PERFORMANCE REVIEW

> The profit before taxation was ZWL146.1 million for the period under review (30 September 2018 – ZWL72.0 million) and this gave rise to total comprehensive income of ZWL109.0 million (30 September 2018 -ZWL54.3 million). The Group achieved a basic earnings per share of 27.21 cents (30 September 2018 -13.88 cents) and a headline losses per share of 5.98 cents (30 September 2018 - headline earnings of 13.48 cents). The significant differential between the basic earnings per share and headline losses per share for 30 September 2019 is largely due to investment properties restated fair value gains (ZWL47.1 million) and gains arising from the translation of foreign currency balances (ZWL128.3 million) due to the change in functional and reporting currency from the United States Dollar (USD) to the new local currency (ZWL) effective 22 February 2019.

> Operating expenses amounted to ZWL89.0 million for the 9 months ended 30 September 2019 and these were down 83% from the restated ZWL512.8 million for the nine months ended 30 September 2018.

> The loss on net monetary position of ZWL69.3 million occurred as a result of the restatement of amounts to current value. The adjustment is based on the inflation index provided by the Zimbabwe National Statistics Agency (ZIMSTAT) or inflation index derived from the monthly inflation rates published by ZIMSTAT. The loss has been charged to the income statement in accordance with the International Accounting Standard 29 (IAS 29), "Financial Reporting in Hyperinflationary Economies"

> The Group recorded an expected credit loss reversal on financial assets measured at amortised cost amounting to ZWL0.6 million for the 9 months ended 30 September 2019 compared to a restated impairment charge of ZWL73.7 million for the nine months ended 30 September 2018 due to increased collection efforts on the banking subsidiary's non-performing loans.

Statement of Financial Position Review – Inflation adjusted

Assets

The Group's total assets decreased by 42% from the restated ZWL1.7 billion as at 31 December 2018 to ZWL1.0 billion as at 30 September 2019 mainly due to a 60% decrease in loans, advances and other assets, a 77% decrease in intangible assets and an 81% decrease in investment securities and these were partly offset by an increase of 154% in property and equipment and a 57% increase in investment properties.

Gross loans and advances decreased by 60% from the restated ZWL857.8 million as at 31 December 2018 to ZWL259.6 million as at 30 September 2019 due to loan repayments as well as a slowdown in advances during the period under review in view of the prevailing economic conditions. The Bank has continued with its drive to reduce non-performing loans (NPLs) and this saw the NPL ratio reduce from 7.43% as at 31 December 2018 to 3.41% as at 30 September 2019. The drop in the NPL ratio is largely due to aggressive collections and stricter credit underwriting standards.

Shareholders' funds and liabilities

The Group's shareholders' funds and shareholders' liabilities increased by 28% from the restated ZWL271.0 million as at 31 December 2018 to ZWL347.4 million as at 30 September 2019 as a result of the current period's total comprehensive income as well as the Functional Currency Translation Reserve (FCTR) which arose due to the change in the Group's functional currency on 22 February 2019

The Bank's regulatory capital (Tier 1 and Tier 3) calculated in terms of the regulatory guidelines was ZWL180.6 million as at 30 September 2019 and this was above the minimum regulatory capital of ZWL25 million. The Bank is in line to achieving the revised regulatory capital level required by 31 December 2020 of ZWL200 million. The banking subsidiary maintained adequate capital levels to cover all risks as reflected by a historical cost capital adequacy ratio of 31.67% as at 30 September 2019 (31 December 2018 – 23.25%). The ratio was well above the regulatory minimum of 124

Total deposits decreased by 58% from the restated ZWL1.4 billion at 31 December 2018 to ZWL604.0 million as at 30 September 2019 as a result of the low historical growth of 39% in an environment characterised by hyperinflation.

The Bank maintained a sound liquidity position with a liquidity ratio of 61.02% at 30 September 2019 (31 December 2018 – 41.62%) and this was significantly above the statutory minimum of 30%. The liquidity ratio has been calculated in terms of the regulatory guidelines.

ADDITIONAL INFORMATION

ADDITIONAL INFORMATION (continued)

Hyperinflation accounting (continued)

The indices have been applied to the historical costs of transactions and balances as follows

- All comparative figures as of and for the periods ended 31 December 2017, 30 September 2018 and 31 December 2018 have been restated by applying the change in the index to 30 September 2019;
- Income statement transactions have been restated by applying the change in the index from the approximate date of the transactions to 30 September 2019;
- Gains and losses arising from the monetary assets or liability positions have been included in the income statement: Non-monetary assets and liabilities have been restated by applying the change in the index from the date of the transaction to 30 September 2019;
- Property and equipment and accumulated depreciation have been restated by applying the change in the index from the date of their purchase or re-assessment to 30 September 2019;
- Equity has been restated by applying the change in index from the date of issue

IAS 29 discourages the publication of historical results as a supplement to the inflation adjusted results. However, historical results have been published to allow comparability of the results during the transitional phase in applying the Standard.

Legacy debts

Following the issuance of the Reserve Bank of Zimbabwe (RBZ) Exchange Control directive RU 28 of 2019 wherein the RBZ requested entities with legacy debts that were due and payable on 22 February 2019 to register these with the Central Bank for an orderly expunging of the debts, the Directors made an assessment of the Group's foreign liabilities which fell under that category and subsequently registered these with the RBZ in terms of the directive

The market is currently waiting for guidance from the Public Accountants and Auditors Board (PAAB) regarding the treatment of these legacy debts. These legacy debts were translated at a rate of USD/ZWL 1:1 on the date of change of the functional currency on 22 February 2019 with no subsequent remeasurement.

Changes in accounting policy

On 1 January 2019, the Group adopted IFRS 16, "Leases" as issued by the International Accounting Standards Board (IASB) in January 2016 with a date of transition of 1 January 2019, which resulted in changes in accounting policy and adjustments to the amounts previously recognised in the financial statements.

As permitted by the transitional provisions of IFRS 16, the Group elected not to restate comparative figures. The Group changed its accounting policy for leases where the Group is the lessee

Prior to the change in accounting policy, leases in which a significant portion of the risks and rewards of ownership were not transferred to the Group as lessee were classified as operating leases. Payments made under operating leases were charged to profit or loss on a straight-line basis over the period of the lease

Lease income from operating leases where the Group is a lessor is recognised in income on a straight-line basis over the lease term. The respective leased assets are included in the statement of financial position based on their nature. The Group did not need to make any adjustments to the accounting for assets held as lessor as a result of adopting the new leasing standard.

Upon adoption of IFRS 16, Leases, on 1 January 2019, the Group did not restate comparatives for the 2018 reporting period, as permitted under the specific transition provisions in the standard. The reclassifications and the adjustments arising from the new leasing rules are therefore recognised in the opening statement of financial position on 1 January 2019.

On adoption of IFRS 16, the Group recognised lease liabilities in relation to leases which had previously been classified as operating leases' under the principles of IAS 17, Leases. On date of adoption, these liabilities were measured at the present value of the remaining lease payments, discounted using the Group's incremental borrowing rate as of 1 January 2019. The weighted average incremental borrowing rate applied to the lease liabilities on 1 January 2019 was 12.35%

The Group has also elected not to reassess whether other contracts not previously classified as leases are, or contain a lease at the date of initial application. Instead, for contracts entered into before the transition date, the Group relied on its assessment made by applying IAS 17, Leases, and Interpretation 4, "Determining whether an Arrangement contains a Lease

Hyperinflation accounting

The Directors assessed the impact of International Accounting Standard (IAS) 29, "Financial Reporting in Hyperinflationar, given the increasing inflation in the economy and noted that the conditions required to apply IAS 29 had materialised in the Group's operating environment. The key underlying factor under IAS 29 is that it requires economy-wide consensus as well as the application of similar indices for all entities operating in the same environment. The Public Accountants and Auditors Board (PAAB) issued a pronouncement on 11 October 2019 indicating that the economy had become hyperinflationary and as such directed that reporting entities apply hyperinflation accounting for financial periods ended on or after 1 July 2019. The Directors have prepared the financial statements using the hyperinflationary accounting basis at the reporting date of 30 September 2019.

Accordingly, the accompanying financial statements, including the comparatives, have been restated to account for changes in the general purchasing power of the ZWL. The restatement is based on the consumer price index at the Statement of financial position date. The indices are derived from the monthly inflation rates which are issued by the Zimbabwe National Statistics Agency (ZIMSTAT). The indices used were as follows:

Dates	Indices	Conversion factor
31 December 2017	62.51	4.6455
30 September 2018	64.1	4.5303
31 December 2018	88.88	3.2672
30 September 2019	290.39	1.0000

*Service deposits relate largely to amounts pledged as collateral for VISA and Zimswitch accounts

ADDITIONAL INFORMATION (continued)

OUTLOOK AND STRATEGY

The year 2019 has continued to be beset by galloping inflation, currency fluctuations and shortages of foreign currency and these have impacted negatively on revenue generation and operating costs.

The Bank will continue to accelerate the deployment of POS machines throughout the country and enhance all e-channels for the convenience of our transacting customers. The Group will continue to broaden its target market by widening its catchment profile to include segments of the mass market previously not catered for, thereby contributing to the financial inclusion agenda.

FORWARD-LOOKING STATEMENTS

This document may contain 'forward-looking statements' which are based on the Directors' current expectations and assumptions about future events. Forward-looking statements often use words such as 'may', 'could', 'will', 'expect', 'intend', 'estimate', 'anticipate', 'believe', 'plan', 'seek', 'continue', 'envisage' or other words bearing similar meaning. Such statements are prone to known and unknown risks and can be affected by other factors that could lead to the Group's plans and objectives varying significantly from those expressed or implied in the forward-looking statements. Readers are not expected to completely place reliance on any forward-looking statements. A multiplicity of factors could lead to the actual results to differ materially from those expressed or implied in forward-looking information. Some of these factors may include (but are not limited to) changes in macro and micro economic policy, political, economic, business, competitive, market and regulatory forces or conditions, future exchange and interest rates, changes in tax regime, future business combinations or disposals and other entity specific issues that may affect the Group. The Group relied on past or current trends and/or its activities to formulate any forward-looking statements and readers should not take these as a representation that such trends will continue in the future.

None of the statements contained in this document are intended to be a profit forecast or to imply that the earnings of the Group will match or surpass current or historical earnings of the Group. Except as specifically directed by any legislation or regulations, the Group expressly absolves itself from any obligation to revise or update any forward-looking statement contained within this document, even if those particular statements are affected by the aforementioned new information, future events or otherwise.

This document does not contain any information that can be considered as an offer or solicitation to trade in any specific financial instruments, or securities, nor shall it be construed as a recommendation or professional consultancy in respect of any financial instruments, securities or any other matter.
