

FOR THE HALF YEAR ENDED 30 JUNE 2020

Banking Insurance Investments Agro-Business

CHAIRMAN'S STATEMENT

Introduction

I am pleased to present an update on the performance of CBZ Holdings Limited and its subsidiaries for the half year to 30 June 2020.

During the period under review, economic and business activity noticeably shifted to, and revolved around, the coronavirus – which was declared a global pandemic by the World Health Organisation "WHO" on 11 March 2020.

On the downside, the pandemic disrupted global production, international trade, global supply chains and aggregate demand – especially as Governments implemented restrictive measures to combat the spread of the virus. As a result, the International Monetary Fund "IMF" downgraded its 2020 global growth forecast from a forecast of 3.3% to -4.9%. The IMF cited lower commodity demand, reduced tourist arrivals, slowdown in global financial inflows, currency volatility and high inflation.

In Zimbabwe, the Ministry of Finance reduced the country's 2020 growth forecast from a forecast of 3.0% to -4.5%. Among the most affected sectors were tourism & hospitality, transport and aviation - as people travelled less and cancelled hotel bookings. Diaspora remittances declined sharply to a record low of U\$\$30 million during the hard lockdown period in April 2020, but noticeably recovered to U\$D85.8 million in June 2020. Additionally, the COVID-19 pandemic, together with sustained headwinds, also resulted in persistent currency weaknesses and rising inflationary pressures. In fact, the ZW Dollar depreciated from an average of ZW\$3.3/ USD in the first half of 2019 to an average of ZW\$23.44/ USD during the first half of 2020. The month-on-month inflation rate also rose from an average of 12.4% during the first half of 2019 to an average of 17.8% during the comparative period of 2020.

On the upside however, the coronavirus pandemic resulted in the emergence of new opportunities in the healthcare & pharmaceuticals, ICT and manufacturing, among other sectors that directly offered solutions to fight the global pandemic. Agile businesses were therefore, able to undertake business model innovation and subsequently pivot on the new normal during the period under review. This, together with Government and private sector interventions to combat the pandemic, also presented new opportunities for the financial services sector.

Meanwhile, on the regulatory front, the Reserve Bank of Zimbabwe introduced measurers to stabilise and strengthen the financial services sector. These measures included, amongst others, the introduction of USD indexed new minimum capital requirements as follows:

- Tier 1 Banks (large indigenous commercial banks and foreign owned banks) USD30 million.

 Tier 2 Banks (Commercial banks, Merchant banks, Building societies, Development banks, Finance & Discount houses) USD20 million.
- Tier 3 Banks (Deposit taking microfinance banks) USD5 million.

Credit only microfinance banks - USD25 000

The RBZ, through the 2020 Mid Term Monetary Policy Review, extended the deadline for compliance with the new minimum capital requirements to 31 December 2021.

The Insurance & Pensions Commission "IPEC" also issued guidelines for the insurance and pensions industry on adjusting insurance and pension values in response to the currency reforms in terms of Section 3 (1) (a) of Statutory Instrument 69 of 2020.

Meanwhile, the CBZ Group contributed directly and indirectly towards the fight against the pandemic, including through enhancing the safety of its staff members and clients as well as various donations

Corporate Social Responsibility

The CBZ Group continued to invest in corporate social initiatives during the first half of the year. Most of the initiatives were a response to the global Covid-19 pandemic

Donations were made towards the bulk purchase of sanitisers for Parirenyatwa Hospital, Wilkins Isolation Centre, Harare Hospital, Mpilo Hospital and disinfecting solutions for St Giles Rehabilitation Centre. In addition, the Group also funded the capacitation of St Annes Hospital as a COVID-19 Centre through SOTZIM, donated an ambulance to the Ministry of Health and Child Care to assist with contact tracing, donated funds towards the maintenance of Makomborero Trust and donated PPE to the University Zimbabwe (UZ)-Department of Medical Microbiology. The Group responded to the Victoria Falls Famine Appeal, by procuring grocery packs upon the closure of tourism activities in the resort town.

In support of the Health Sporting Excellence awareness, the Group successfully hosted the CBZ 2020 Marathon in March 2020, where more than 2000 athletes participated

Share Price Performance

The CBZH share price advanced by 4198.55% to close at ZW 2996.52c in the first half of 2020, outperforming the overall market, as shown in the graph below.

Governance & Directorship

As Chairman of the Board of Directors of CBZ Holdings Limited, it is my responsibility to ensure that the Group has both sound corporate governance and an effective Board. My responsibilities include leading the Board effectively, overseeing the Group's corporate governance model, communicating with shareholders and ensuring that good information flows freely between the Executive and Non-Executive Directors in a timely manner.

The Board believes that corporate governance is more than just a set of guidelines; rather it is a framework which underpins the core values for running the business in which we all believe, including a commitment to open and transparent communications with stakeholders. We believe that good corporate governance improves long-term success and performance.

There have been some changes in directorship throughout the Group and these are outlined in the detailed corporate governance statement.

Overview of the Group's performance

The table below summarises the Group's financial performance for the first half of the year.

Growth in PAT (YOY %)	39.0	65.4	2442.1	90.4	82.7	1181.6

The Board has proposed the declaration of an interim dividend of ZWL\$350,000,000 or 67.05 cents per share. This declaration translates to a growth of 6 244.3% on the comparative 2019 interim dividend.

Both the monetary and fiscal authorities, through the Mid Term Policy Review, announced further measures to support the foreign currency auction market, stabilise the exchange rate and prices, and ultimately the macroeconomic environment. The impact of these measures will be felt during the second half of the year. However, policy conduct is expected to remain constrained by the continued lack of balance of payments and budgetary support, as well as the need to balance the competing goals of supporting economic growth and social wellbeing. Nevertheless, the Group remains committed to helping its staff, clients and communities in navigating the COVID-19 pandemic. The safety and wellbeing of our employees and clients will remain number one priorities.

My appreciation goes to our valued clients who remain the mainstay of our success. I also wish to thank fellow Directors from the Board, the Boards of Subsidiary Companies, Management and Staff, for their continued commitment to the organisation.

M Holtzman

Group Chairman 25 September 2020

AUDITOR'S STATEMENT

The Group's inflation adjusted interim financial statements from which these abridged results have been extracted have been reviewed by the Group's external auditors, Ernst & Young Chartered Accountants (Zimbabwe), who have issued an adverse review conclusion as a result of the impact of the following prior year matters: non-compliance with International Accounting Standard 21, "The Effects of Changes in Foreign Exchange Rates" and International Accounting Standard 8, "Accounting Polices, Changes in Accounting Estimates and Errors"; the consequential impact on the inflation-adjusted amounts determined in terms of IAS 29 and valuation of investment properties, due to lack of market evidence to support property valuation inputs. The auditor's review conclusion on the Group's inflation adjusted interim financial statements is available for inspection at the Company's registered office. The engagement partner for this review is Mr Fungai Kuipa (PAAB Practicing Certificate Number 335).

The historic amounts are shown as supplementary information. This information does not comply with the International Financial Reporting Standards in that it has not taken into account the requirements of International Accounting Standard 29 - Financial Reporting for Hyperinflationary Economies. As a result, the auditors have not expressed an opinion on this historic financial information.

ACCOUNTING POLICIES

FOR THE HALF YEAR ENDED 30 JUNE 2020

1. GROUP ACCOUNTING POLICIES

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2019, except for new standards and amendments adopted effective 1 January 2020. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective. Several amendments and interpretations apply for the first time in 2020, but do not have an impact on the interim condensed consolidated financial statements of the Group. For a detailed analysis of the Group's accounting policies, kindly refer to the Group's 2019 annual report which is available at the Company registered offices.

1.1 BASIS OF PREPARATION

The interim condensed consolidated financial statements for the six months ended 30 June 2020 have been prepared in accordance with IAS 34 Interim Financial Reporting as well as the requirements of the Companies Act (Chapter 24.03), Banking Act (Chapter 24.20), Insurance Act (Chapter 24.07), the Building Society Act (Chapter 24.02) and the Securities Act (Chapter 24.25). The consolidated financial results have been restated take account of inflation in accordance with IAS 29, Financial Reporting in Hyperinflationary Economies.

These interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual consolidated financial statements as at 31 December 2019.

Determination of the functional currency

The Group is operating in an environment which has witnessed significant monetary and exchange control policy changes. These policies include the Exchange control Directive RV 175/2020 which introduced the Foreign Exchange Auction trading system which became operational from 23 June 2020 and the Statutory Instrument (SI) 85 of 2020 which authorized the use of free-funds in paying for goods and services

Given the context of the environment, management has assessed if there has been a change in the functional currency used by the Group. This assessment included consideration of whether the use of free funds in paying for goods and services may represent a change in functional currency.

In light of the developments summarised above, the Directors concluded that the Group's functional currency remains the Zimbabwe dollar (ZWL) as presented in the prior year financial statements.

Basis of consolidation

The Group's consolidated financial results incorporate the financial results of the Company and entities controlled by the Company. Control is achieved when the Company has power over the investee, is exposed or has rights, to variable returns from its involvement with the investee and has the ability to use its power to affect its returns. The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control mentioned above. The results of subsidiaries acquired or disposed of during the year are incorporated from the dates control was acquired and up to the date control ceased. The financial results of the subsidiaries are prepared for the same reporting year as the parent Company, using consistent accounting policies. All intra-group balances, transactions, income and expenses, profits and losses resulting from intra-group transactions that are recognised in assets and liabilities and income and expenses are eliminated in full. Non-controlling interests represent the portion of profit and net assets that is not held by the Group and are presented separately in the consolidated statement of comprehensive income and within equity in the consolidated statement of financial position, separately from parent shareholders' equity.

Use of judgements and estimates

In preparing these financial statements, management has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these

The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those described in the prior year financial statements

Changes in significant accounting policies

The details of changes in accounting policies are disclosed below:

1.1 a) Amendments to IFRS 3: Definition of a Business

The amendment to IFRS 3 clarifies that to be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output. Furthermore, it clarified that a business can exist without including all of the inputs and processes needed to create outputs. These amendments had no impact on the consolidated financial statements of the Group, but may impact future periods should the Group enter into any business combinations

1.1 b) Amendments to IFRS 7, IFRS 9 and IAS 39: Interest Rate Benchmark Reform The amendments to IFRS 9 and IAS 39 Financial Instruments: Recognition and Measurement provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument. These amendments had no impact on the consolidated financial statements of the Group as it

does not have any interest rate hedge relationships. 1.1 c) Amendments to IAS 1 and IAS 8: Definition of Material

The amendments provide a new definition of material that states "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity." The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users. These amendments had no impact on the consolidated financial statements of, nor is there expected to be any future impact to the Group.

1.1 d) Conceptual Framework for Financial Reporting

The Conceptual Framework is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The purpose of the Conceptual Framework is to assist the IASB in developing standards, to help preparers develop consistent accounting policies where there is no applicable standard in place and to assist all parties to understand and interpret the standards. The revised new concepts, provides updated and recognition criteria for assets and liabilities and clarifies some important concepts. These amendments had no impact on the consolidated financial statements of the

1.2 Application of IAS 29 (Financial Reporting in Hyperinflationary Economies)

These financial results have been prepared in accordance with IAS 29 which requires that the financial statements of any entity whose functional currency is the currency of a hyperinflationary economy be stated in terms of the measuring unit current at the reporting date and that corresponding figures for the previous period also be restated in terms of the same measuring unit

The Group adopted the Zimbabwe consumer price index (CPI) compiled by Zimbabwe National Statistics Agency (ZIMSTAT) as the general price index to restate transactions and balances as appropriate. The indices and conversion factors used to restate these

Dates	Indices	Conversion Factors
30 June 2019	172.61	8.3725
31 December 2019	551.625	2.6199
30 June 2020	1 445.211	1.0000

The procedures applied in the above restatement of transactions and balances are as

- All comparative figures as at and of the period ended 30 June 2019 and 31 December 2019 were restated by applying the change in the index from the date of last re-measurement to 30 June 2020.
- Monetary assets and liabilities were not restated because they are already stated in terms of the measuring unit current at the reporting date.
- Non-monetary assets and liabilities that are not carried at amounts current at balance sheet and components of shareholders' equity were restated by applying the change in the index from the date of the transaction or if applicable from the date of their most recent revaluation to 30 June 2020. Property and equipment is restated by applying the change in the index from the date of transaction to 30 June 2020.
- Items recognised in the income statement have been restated by applying the change in the general price index from the dates when the transactions were initially earned or incurred. Depreciation and amortisation amounts are based on the restated costs or carrying amounts.
- Income statement items/transactions, except for depreciation and amortisation charges explained above, are restated by applying the monthly index for the period ended 30 June 2020.
- Opening deferred tax was calculated for temporary differences between tax bases of assets and liabilities and their carrying amounts expressed in the purchasing power at the opening balance sheet date. The calculated tax was then inflated to the purchasing power at the reporting date. The closing deferred tax position was calculated based on the applicable temporary differences between the tax base and the IAS 29-adjusted IFRS balance sheet (i.e. expressed in the measuring unit current at the balance sheet date).
- Current tax expense was restated using the increase in the general price index from the related month until the reporting date.
- Gains and losses arising from the net monetary position are included in the statement
- of profit or loss and in the statement of cash flows as non-cash items All items in the statement of cash flows are expressed in terms of the general price
- index at the end of the reporting period. The inflation effects on cash and cash equivalents were shown separately in the reconciliation of cash and cash equivalents. The Group considered the broad objectives of IAS 29 and IAS 7 to appropriately present and disclose the effects of inflation on cash and cash equivalents.

IAS 29 discourages publication of historical financial statements as a supplement to inflation adjusted accounts. However, historical financial statements have been published to allow comparability during the transitional phase in applying the standard.

7. EARNINGS PER SHARE

Revaluation of property and equipment Unlisted equities

Basic earnings per share is calculated by dividing profit for the period attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding at the end of the period after adjusting for treasury shares.

134 358 386 27 653 826 **162 012 212** 143 432 742 336 958 740 3 459 794 70 235 673 **146 892 536 407 194 413**

Diluted earnings per share is calculated by dividing the profit attributable to ordinary equity holders of the parent by sum of the weighted average number of ordinary shares outstanding at the end of the period and the weighted average number of potentially dilutive ordinary shares after adjusting for treasury shares.

The following reflects the income and shareholding data used in the basic and diluted earnings per share computations:

*Included in other receivables is an amount of ZWL\$28 676 470 680 (December 2019: ZWL\$19 843 383 072) which relates to the government grant receivable from the Reserve Bank of Zimbabwe (RBZ). RBZ will provide foreign currency to the Group for all registered legacy liabilities and nostro gap accounts at an exchange rate of 1:1. The Group has already complied with the conditions necessary for the provision of the assistance namely registration of the legacy liabilities and nostro gap accounts and payment of the ZWL equivalent

The government grant receivable is denominated in US Dollars and has been translated to ZWL using the closing exchange rate in line with the treatment of monetary assets denominated in foreign currencies prescribed in IAS 21.

The asset will be used to settle any payment obligations that may accrue in the future related to the legacy liabilities and nostro gap REVIEWED UNAUDITED

The fair values of the non-listed equities which have been classified as level 3 investments. Following the suspension of trading at the Zimbabwe stock exchange as at 30 June 2020, listed investments have been classified as level 2 investments. Subsequent to the reporting period, the suspension was lifted and trading has since resumed

Fair values were derived using a combination of income and market approaches depending on the appropriateness of the methodologies to the type of equity instruments held. The valuation took into account certain assumptions about the model inputs, including but not limited to liquidity discounts, country factor, inflation, credit risk and volatility. A range of probabilities were also applied to these inputs and the fair values derived therefrom were deemed to be within acceptable fair values ranges of the equities.

The following table shows the valuation techniques used in measuring the fair value of unquoted equities as well as the significant unobservable inputs used.

Valuation Technique	Significant unobservable inputs	Interrelationship between key unobservable inputs and fair value measurement
 Discounted Cash Flow Technique Dividend Growth model. Earnings Multiple 	 Inflation shock adjusted return (1.5%) Growth rate (0.05%) Liquidity discount GDP Growth 	The fair values would increase/ decrease if: Inflation shock adjusted return was higher/lower The risk adjusted discount were lower / higher The GDP growth was higher or lower The Liquidity discount was higher or lower

If the fair value adjustment had been 5% up or down, the Group's other comprehensive income would be ZWL\$ 3,097,313 and the Statement of Financial Position would be ZWL\$ 3,260,329 higher or lower than the reported position

The carrying amount of the investment properties is the fair value of the properties as determined by a registered internal appraiser having, an appropriate recognised professional qualification and recent experience in the location and category of the property being valued. The valuation was in accordance with the Royal Institute of Chartered Surveyors Appraisal and Valuation Manual and the Real Estate Institute of Zimbabwe Standards. Fair values were determined having regard to recent market transactions for similar properties in the same location as the Group's investment properties and also in reference to the rental yeilds applicable to similar property. The properties were valued as at 30 June 2020.

Lines of credit relate to borrowings from foreign banks or financial institutions. These have an average tenure of 2.8 years with an average interest rate of 9.2% and are secured by a variety of instruments which include lien over bank accounts, guarantees, treasury bills and sub borrower securities.

Settlement of legacy liabilities and nostro gap accounts

Included in the deposits balance above, are amounts that are denominated in USD amounting to US\$429 109 162 (December 2019: US\$ 451 551 474) (being legacy liabilities of US\$315 626 032 (December 2019: US\$318 062 662) and nostro gap accounts of US\$113 483 130 (December 2019: US\$133 488 811)) which are shown at ZWL\$27 353 220 272 (December 2019: ZWL\$19 843 383 072). These foreign denominated liabilities, which are payable on demand, are subject to a special settlement arrangement with the RBZ as detailed in Note 15 to the financial statements wherein the Reserve Bank of Zimbabwe (RBZ) will provide foreign currency gradually to the Group for all registered legacy liabilities and nostro gap accounts at an exchange rate of 1:1. We note that to date USD18 772 208 (December 2019: USD10 965 225)has been made available under this arrangement, demonstrating the willingness and capability of the RBZ to honour the settlement arrangement.

The Group has however identified key risks attendant to the legacy liabilities and nostro gap accounts, which risks and respective mitigating strategies are available for inspection at the Company's Registered Offices

- Professional judgement was exercised to take cognisance of the fact that properties in the transactions were not exactly comparable in terms of size, quality and location to the properties owned by the Group.
- The reasonableness of the market values of commercial properties so determined, per above bullet, was assessed by reference to the
- properties in the transaction. The values per square metre of lettable spaces for both the subject properties and comparables were analysed.
- With regards to the market values for residential properties, the comparison method was used. This method entails carrying out a valuation by directly comparing the subject property, which has been sold or rented out. The procedure was performed as follows Surveys and data collection on similar past transactions. Analysis of collected data.
- Comparison of the analysis with the subject properties and then carrying out the valuation of the subject properties. Adjustments were made to the following aspects:
 - Age of property state of repair and maintenance, Aesthetic quality quality of fixtures and fittings, b)
 - Structural condition location, d) Accommodation offered - size of land.

The maximum useful lives are as follows

Motor vehicles 3 - 5 years Computer equipment years Leasehold improvements years Furniture and fittings 10 years Buildings 40 years

The carrying amount of buildings would have been ZWL\$460 990 857 (December 2019: ZWL\$183 172 916) had they been carried at cost

Further details on fair valuation hierarchy are provided in the Group's annual report for the year ended 31 December 2019

If the fair value adjustment had been 5% up or down, the Group's other Comprehensive Income would have been ZWL\$ 31,267,110 higher or lower the reported position and the Statement of Financial Position would be ZWL\$ 41,550,977 higher or lower than the reported position.

Properties was tested for impairment through comparison with the open market values determined by independent valuers. Included in property and equipment are amounts relating to Right of use assets for buildings that are leased by the Group for periods more

than one year. The buildings are used by the Group for its various branches and operations

The information about the leases for which the Group is a lessee is presented below

FOR THE HALF YEAR ENDED 30 JUNE 2020

FOR THE HALF YEAR ENDED 30 JUNE 2020

Banking Insurance Investments Agro-Business

31. CAPITAL MANAGEMENT

The Group adopted the Internal Capital Adequacy Assessment Policy (ICAAP) which enunciates CBZ Holding's approach, assessment and management of risk and capital from an internal perspective that is over and above the minimum regulatory rules and capital requirements of Basel II. The primary objective of the Group's capital management is to ensure that the Group complies with externally imposed capital requirements and economic capital requirements which is risk based capital requirements. The Group maintains strong credit ratings and healthy capital ratios in order to support its business and maximise shareholder value. ICAAP incorporates a capital management framework designed to satisfy the needs of key stakeholders i.e. depositors, regulators, rating agencies who have specific interest in its capital adequacy and optimal risk taking to ensure its going concern status (solvency). The focus is also targeted at meeting the expectations of those stakeholders i.e. shareholders, analysts, investors, clients and the general public who are interested in looking at the profitability of the Group vis-à-vis assumed levels of risk (risk versus return).

35. RELATED PARTIES

The Group does not have an ultimate parent as it is owned by several shareholders none of which has a controlling interest. The Group has related party relationships with its Directors and key management employees, their companies and close family members. The Group carries out banking and investment related transactions with various companies related to its shareholders, all of which were undertaken at arm's length and in compliance with the relevant Banking Regulations.

Loans and advances to Directors' companies

37. RISK MANAGEMENT

37.1 Risk overview

CBZ Group Enterprise Wide Risk Management Framework is anchored on the desire to uphold a High Risk Management and Compliance Culture as one of the major strategic thrusts and is supported by a clearly defined risk appetite in terms of various key exposures. This approach has given direction to the Group's overall Going Concern underpinned by robust strategic planning and policies. Through the CBZ Group risk management function, the Group regularly carries risk analysis through value at risk (VaR) assessments, stress testing as well as simulations to ensure that there is congruency or proper alignment between its strategic focus and its desired risk appetite.

37.2 Group risk management framework

The Group's risk management framework looks at enterprise wide risks and recognises that for effective risk management to take root, it has to be structured in terms of acceptable appetite, defined responsibility, accountability and independent validation of set processes. The Group Board is responsible for setting and reviewing the risk appetite as well as Group Policies. Management and staff are responsible for the implementation of strategies aimed at the management and control of the risks that fall within their strategic organisational responsibilities. The CBZ Group Enterprise Wide Risk Management function is responsible for ensuring that the Group's risk taking remains within the set risk benchmarks. The Group Internal Audit function on the other hand provides independent assurance on the adequacy and effectiveness of the deployed risk management processes.

The CBZ Group Enterprise Wide Governance and Compliance Unit evaluates quality of compliance with policies, processes and governance structures.

In terms of risk governance, the Group Board has delegated authority to the following Group Board Committees whose membership consists of Non – Executive Directors of the Group:

Risk Management & Compliance Committee – has the responsibility for oversight and review of prudential risks comprising of but not limited to credit, liquidity, interest rate, exchange, investment, operational, equities, insurance, security, technological, reputational and compliance. Its other responsibilities includes reviewing the adequacy and effectiveness of the Group's risk management policies, systems and controls as well as the implications of proposed regulatory changes to the Group. It receives consolidated quarterly risk and compliance related reports from the Group Executive Management Committee (Group EXCO) and Group Risk Management Sub-Committee. The committee governance structures ensure that approval authority and risk management responsibilities are cascaded down from the Board through to the appropriate business units and functional committees. Its recommendations are submitted to the Group Board.

Audit & Finance Committee – manages financial risk related to ensuring that the Group's financial statements are prepared in line with the International Financial Reporting Standards. This committee is responsible for capital management policy as well as the adequacy of the Group's prudential capital requirements taking into account the Group's risk appetite. The committee is also tasked with the responsibility of ensuring that efficient tax management systems are in place and that the Group is in full compliance with tax regulations.

Human Resources & Remunerations Committe – is accountable for people related risks and ensures that the Group has the optimal numbers as well as the right mix in terms of skills and experience for the implementation of the Group's strategy. The committee also looks at succession planning, the welfare of Group staff as well as the positive application of the Group's Code of Ethics.

37.3 Credit risk

This is the risk of potential loss arising from the probability of borrowers and or counterparties failing to meet their repayment commitments to the Group as and when they fall due in accordance with agreed terms and conditions.

Credit risk management framework

Credit risk is managed through a framework of credit policies and standards covering the identification, management, measurement and control of credit risk. These policies are approved by the Board, which also delegates credit approvals as well as loans reviews to designated sub committees within the Group. Credit origination and approval roles are segregated.

The Group uses an internal rating system based on internal estimates of probability of default over a one year horizon and customers are assessed against a range of both quantitative and qualitative factors. Credit concentration risk is managed within set benchmarks by counterparty or a group of connected counterparties, by sector, maturity profile and by credit rating. Concentration is monitored and reviewed through the responsible risk committees set up by the Board.

The Group through credit originating units as well as approving committees regularly monitors credit exposures, portfolio performance and external environmental factors that are likely to impact on the credit book. Through this process, clients or portfolios that exhibit material credit weaknesses are put on watch for close monitoring or exiting of such relationships where restructuring is not possible. Those exposures which are beyond restructuring are downgraded to Recoveries and Collections Unit.

Credit mitigation Credit mitigation

Credit mitigation is employed in the Group through taking collateral, credit insurance and other guarantees. The Group is guided by considerations related to legal certainty, enforceability, market valuation and the risk related to guarantors in deciding which securities to accept from clients. Types of collateral that are eligible for risk mitigation include cash, mortgages over residential, commercial and industrial property, plant and machinery, marketable securities, guarantees, assignment of crop or export proceeds, leasebacks and stop-orders.

37.3. (a) Credit risk exposure

The table below shows the maximum exposure to credit risk for the components of the statement of financial position.

	RE	/IEWED	UNAUDITED

The Group holds collateral against loans and advances to customers in the form of mortgage bonds over property, other registered securities over assets, guarantees, cash cover, assignment of crop or export proceeds, leasebacks and stop-orders. Estimates of fair values are based on the value of collateral assessed at the time of borrowing, and are regularly aligned to trends in the market. An estimate of the fair value of collateral and other security enhancements held against loans and advances to customers and banks is shown above and analysed as follows;

37.3 (c) Impairment allowance on financial assets

Loans and advances to customers

The table below shows the credit quality and the maximum exposure to credit risk based on the Group's internal credit rating system and year-end stage classification. The amounts presented are gross of impairment "allowances. Details of the Group's internal grading system are explained in Note 37.3.1

The Financial Assets that were impaired under IFRS 9 were Loans, Overdrafts, Leases, Bank Guarantees, and Letters of Credit, Credit Cards Facilities, Money Market Placements and Treasury Bills. Expected Credit Losses of these assets were calculated as at 31 December 2019. Expected Credit Losses is determined through a combination of expected credit exposures (Exposure-at-Default), likelihood of default occurring (Probability of Default) and anticipated Loss in the event of Default (Loss-Given-Default)

37.3.1 Definition of Parameters used for Calculation of Expected Credit Losses (ECL)

The Probability of Default (PD)

This is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed year if the facility has not been previously derecognised and is still in the portfolio.

The Exposure at Default (EAD)

This is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments

The Loss Given Default (LGD)

This is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including those from the realisation of any collateral. It is usually expressed

When estimating the ECLs, the Group considers four scenarios (a base case, an upside, a mild downside ('downside 1') and a more extreme downside ('downside 2')). Each of these is associated with different PDs, EADs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

With the exception of credit cards and other revolving facilities, the maximum year for which the credit losses are determined is the contractual life of a financial instrument, unless the Group has the legal right to call it earlier. Impairment losses and releases are accounted for and disclosed separately from modification losses or gains that are accounted for as an

adjustment of the financial asset's gross carrying value

Significant increase in credit risk and Stage Recognition

The CBZ Group has established a policy to perform an assessment, at the end of each reporting year, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. A significant increase in credit risk is defined as a significant increase in the probability of a default occurring since initial recognition. Credit

risk has increased significantly when contractual payments are more than 30 days past due.

Key consideration for a significant change in credit risk under a financial asset include the following;

- The counterparty rating deteriorates Breaches in conditionality or covenants. ii)
- Deterioration in account conduct.
- iv) Any corporate action relating to changes in corporate structure, control, acquisitions or disposals, Significant changes in executive leadership.
- Any other factor that is reasonably expected to have a negative impact on prospects for repayment, including but not limited to legislative changes, perceived sectoral risks, and negative media coverage
- vii) Actual or expected significant change in the financial instrument's external credit rating (Credit Reference Bureau rating).
- Declining Asset Quality
- Reduction in financial support from the parent company ix) Expected changes in the loan agreement terms and conditions.
- Changes in group parents payment pattern
- xii)
- Decision to change collateral Deterioration of macro-economic factors of the borrower

Based on financial asset's stage, 12 Months and Life-Time Expected Credit Losses were calculated

- 12 Months Expected Credit Losses is a portion of Lifetime expected credit losses that represent the ECLs that result from default
- events on a financial instrument that are possible within the 12 months after the reporting date.
 Lifetime Expected Credit Losses are the expected present value of losses that arise if borrowers default on their obligations at some time during the life of the financial asset. These are weighted average credit losses that result from all possible default events over the expected life of the financial asset/ or instrument.

Stage 1: (Performing)

The financial assets in this stage are neither past due nor specifically impaired, and are current and fully compliant with all contractual terms and conditions. When loans are first recognised, the Group recognises an allowance based on 12 months ECLs. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2. The Group calculates the 12m ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.

Stage 2: (Underperforming)

The assets have early arrears but not specifically impaired loans. It covers all loans where the counterparties have failed to make contractual payments and are less than 90 days past due, but are expected that the full carrying values will be recovered when considering future cash flows including collateral. When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.

Stage 3: (Credit Impaired)

For loans considered credit-impaired, the Group recognises the lifetime expected credit losses for these loans. LTECLs were calculated for all the assets which were classified under this stage. Loans satisfying the followings were classified under Stage 3;

Instalments (Principal and Interest) were due and unpaid for 90 days or more.

flow expected from collateral and credit enhancements were also factored

- The Group had identified objective evidence of default, such as a breach of a material loan covenant or condition (there is marked b) significant increase in credit risk i.e deterioration in asset quality).
- The Group had sufficient evidence about significant financial difficulties of the borrower contrary to cash flow projections.

High probability of bankruptcy or other financial reorganization of the borrower has been identified Under this stage interest revenue recognised was based on Amortised Cost ie Gross exposure amount less allowance. The estimate of cash

Purchased or originated credit impaired (POCI)

Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

For financial assets for which the Group has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycled to the profit and loss upon derecognition of the assets.

Cure, Modification and Forbearance of Financial Assets

During the year under Review, some of the financial assets were cured, modified and forborne.

Cure is the reclassification of a non-performing asset or underperforming into performing status. To be reclassified as performing, a nonperforming forborne exposure should fulfill the general requirements for reclassifying exposures from non-performing to performing as well as specific requirements applicable to forborne exposures. Clients whose exposures were cured had met the following conditions;

- Completion of a "cure year" of six months by non-performing forborne exposures and that the debtor's behaviour demonstrates that financial difficulties no longer exist.
- The borrower should have settled, by means of regular payments, an amount equivalent to all the amounts past due on the date the forbearance measures were granted (if there were past-due amounts at this date), or to the amount written-off as part of these forbearance measures (if there was no past-due amount at the date of the forbearance measures).
- It has been established that the obligor has been able to meet the requirements of the revised terms and conditions.

The borrower should have settled 6 full consecutive monthly payments under the revised terms

Cure constituted the following in each of the respective impairment stages;

Account Cure	Impairment triggers
Move from stage 3 to stage 2 (decrease in credit risk)	Modifications
Move from stage 3 to stage 1 (decrease in credit risk)	Restructured loans
Move from stage 2 to stage 1 (reduction in credit risk signified by migration from low credit risk or no significant increase in credit risk)	 Arrears re-spread Arrears deferred Loan term extended Arrears deferred and re-spread

These are formal, contractual agreements between the customer and the Group to change cash flows from that originally agreed or previously amended as well as contractual terms and conditions. Where a contract was subjected to some or all of the above forbearance measures, it was referred to as modification. It was also referred to as Restructuring by the Group. Modification in some instances resulted in change in PD, instalment and interest rate among other factors

The Group sometimes makes concessions or modifications to the original terms of loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. The Group considers a loan forborne when such concessions ons are provided as a result of the borrower's present or expected financial difficulties and the Group would to them if the borrower had been financially healthy. Indicators of financial difficulties include defaults on covenants, or significant concerns raised by the Credit Risk Department. Forbearance may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms. It is the Group's policy to monitor forborne loans to help ensure that future payments continue to be likely to occur If these procedures identify a loss in relation to a loan, it is disclosed and managed as an impaired Stage 3 forborne asset until it is collected

Beginning 1 January 2018, any loan that has been renegotiated or modified but not derecognised, is reassessed by the Group for potential significant increase in credit risk. The Group also considers whether the assets should be classified as Stage 3. Once an asset has been classified as forborne, it will remain forborne for a minimum six months' probation year. In order for the loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- All of its facilities has to be considered performing
- The probation year of six months has passed from the date the forborne contract was considered performing Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation year
- The customer does not have any contract that is more than 30 days past due

Derecognition

Derecognition decisions and classification between Stage 2 and Stage 3 are determined on a case-by-case basis. The Group de-recognizes a financial asset when, and only when

- the contractual rights to the cash flows from the financial asset expire, or It transfers the financial asset and the transfer qualifies for de-recognition.
- Write-offs

The Group's accounting policy under IFRS 9 remains the same as it was under IAS 39. Financial assets are written off either partially or

in their entirety only when the Group has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense

37.3.2 Market risk This is the risk of loss under both the banking book and or trading book arising from unfavourable changes in market price such as interest

rates, foreign exchanges rates, equity prices, credit spreads and commodity prices, which can cause substantial variations in earnings and or economic value of the Group and its strategic business units (SBUs) if not properly managed. The Group's exposure to market risk arises

37.3.3 Group market risks management framework

To manage these risks, there is oversight at Group Board level through the Group Board Risk Management Committee, which covers Asset and Liability Management processes through yearly review of the Group's Asset and Liability as well as investment policies and benchmarks meant to assist in attaining the Group's liquidity strategic plan. The Group's (SBU) Boards are responsible for setting specific market risks strategies for their respective SBU and Executive Management implements policy and track performance regularly against set benchmarks through use of daily liquidity position reports, investment portfolio mix, cash flow analysis, liquidity matrix analysis, liquidity gap analysis and liquidity simulations to evaluate ability of the SBU to withstand stressed liquidity situations.

37.4 Liquidity risk

Liquidity relates to the Group's ability to fund its growth in assets and to meet obligations as they fall due without incurring unacceptable losses. The Group recognises two types of liquidity risks i.e. Market liquidity risk and Funding liquidity risk

Market liquidity risk is the risk that the Group cannot cover or settle a position without significantly affecting the market price because of

Funding risk on the other hand is the risk that the Group will not be able to efficiently meet both its expected as well as the unexpected current and future cash flow needs without affecting the financial condition of the Group.

The Group's liquidity risk management framework ensures that limits are set under respective Group Strategic Business Units relating to limits such as levels of wholesale funding, retail funding, loans to deposit ratio, counter-party exposures, liqudity coverage ratio, net stable funding ratio as well as prudential liquidity ratio.

The primary funding sources under the Group are customer deposits made up of current, savings and term deposits and these are diversified by customer type and maturity profile. The Group, through the ALCO processes and statement of finacial position management ensures that asset growth and maturity are funded by appropriate growth in deposits and stable funding, respectively.

The table above shows the undiscounted cash flows of the Group's non-derivative on and off balance sheet financial assets and liabilities on the basis of their earliest possible contractual maturity and the related year gaps. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest year in which the guarantee could be called.

The Group's SBUs carry out static statement of financial position analysis to track statement of financial position growth drivers, the pattern of core banking deposits, statement of financial position structure, levels and direction of the SBU's maturity mismatch and related funding or liquidity gap. The Group also relies on stress testing under various scenarios i.e moderate, extreme and severe in line with RBZ Recovery Planning

Guideline to assess and manage liquidity risk. The Asset and Liability Management Committee (ALCO) of the respective SBU comes up with strategies to manage these liquidity gaps through funding gap limits. Additionally, the Group models asset and liability behaviours to measure liquidity risk from a behavioural perspective.

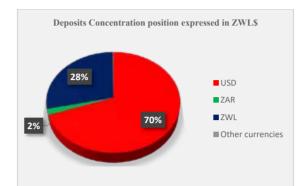

Details of the liquidity ratios for the relevant Group SBUs as at the reporting date and during the reporting year were as follows:

37.4.2 Concentration & Counterparty Risk

Concentration risk describes the level of risk in the Group's liabilities when they are concentrated in few counterparties. Given concentrated liability positions, the impact on the Group's liquidity is significant if any one of the counterparties makes a call on the liabilities. The risk associated with significant liability concentrations in specific foreign currencies is that if the exchange rate moves against the Group,

The risk associated with significant liability concentrations in specific foreign currencies is that if the exchange rate moves against the Group, assuming no adequate monetary assets denominated in the same currency, significant exchange loses will be incurred and significant cash flow will be required to expunge the associated liabilities. An analysis of the concentration of the Group's deposits is shown below;

Included in the USD deposits, are legacy liabilities and nostro gap accounts amounting to USD429.11 million. These liabilities contribute 62.45% [December 2019:59.72%] of the Group's total deposits.

The Group's significant counterparty risk encompasses risk on legacy liabilities and nostro gap accounts. The Group's deposits are held with various counterparties; the 3 largest ones which are legacy liabilities and nostro gap accounts counterparties which hold approximately 37.95%, 6.04% and 5.96%, respectively. As at 31 December 2019 the concentration was 34.3%, 5.2% and 5.4%, respectively.

Mitigates against the above mentioned risks, are available at the company's registered offices.

37.5 Interest rate risk

This is the possibility of a Banking Group's interest income being negatively influenced by unforeseen changes in the interest rate levels arising from weaknesses related to a banking Group's trading, funding and investment strategies.

This is managed at both Board and Management level through the regular policy and benchmarks which relate to interest rate risk management. The major areas of intervention involves daily monitoring of costs of funds, asset yield, monthly analysis of interest re-pricing gaps, monthly interest rate simulations to establish the Group and its SBUs' ability to sustain a stressed interest rate environment, value at risk (VaR), interest rate risk set limits and various interest rate risk hedging strategies. The use of stress testing is an integral part of the interest rate risk management framework and considers both the historical market events as well as anticipated future scenarios. The Group and its SBUs denominate their credit facilities in the base currency, the ZWL in order to minimise cross currency interest rate risk. The Group's interest rate risk profiling is illustrated on the next table.

At 30 June 2020, if interest rates (both earning and paying rates) at that date had been 15 basis points higher or lower with all other variables held constant, post tax profit would have been ZWL\$ 4 843 791 lower or higher respectively than the reported position. This arises as a result of the sensitivity of the net interest assets in the movement in the interest rates.

This risk arises from the changes in exchange rates and originates from mismatches between the values of assets and liabilities denominated in different currencies and can lead to losses if there is an adverse movement in exchange rate where open positions either spot or forward, are taken for both on and off – statement of financial position transactions.

Supervision is at Board level through the Board Risk Management Committee which covers ALCO processes by way of strategic policy and benchmarking reviews and approval. The management assets and liabilities committee (ALCO) which meets on a monthly basis reviews performance against set benchmarks embedded under acceptable currencies, currency positions as well as stop loss limits. Derivative contracts with characteristics and values derived from underlying financial instruments, exchange rates which relates to futures, forwards, swaps and options can be used to mitigate exchange risk. The Group also relies on foreign currency stress testing, simulation, value at risk and prudential limits adherence

At 30 June 2020, if foreign exchange rates at that date had weakened or strengthened by 5 percentage points with all other variables held constant, post tax profit for the year would have been ZWL\$78 921 579 higher or lower respectively than the reported position. This arises as a result of the increase or decrease in the fair value of the underlying assets and liabilities denominated in foreign currencies. The foreign currency position for the Group as at 30 June 2020 is as below:

Operational risk

This is the potential for loss arising from human error and fraud, inadequate or failed internal processes, systems failure, non-adherence to procedure or other external sources that result in the compromising of the Group and its SBUs revenue or erosion of the Group and its SBUs' statement of financial position value.

37.7.1 Operational risk management framework

The Group Risk Management Committee exercises adequate oversight over operational risks across the Group with the support of SBU Boards as well as business and functional level committees. Group Risk Management is responsible for setting and approving of Group Operational Policies and maintaining standards for operational risk.

The Group Board Audit Committee through the Internal Audit function as well as Group Enterprise Wide Governance and Compliance performs their independent review and assurances under processes and procedures as set under Business Units policies and procedure manuals. On the other hand, the Group Risk Management and Group IT Department with assistance from the Organisation and Methods Department within Group Human Resources ensure that processes, procedures and control systems are in line with variables in the operating environment

37.8 Strategic risk

This is the risk that arises where the Group's strategy may be inappropriate to support its long term corporate goals due to underlying inadequate strategic planning processes, weak decision making processes as well as weak strategic implementation programs.

To mitigate this risk, the Group's Board, SBU Boards and Management teams craft the strategy which is underpinned by the Group's corporate goals. Approval of the strategy is the responsibility of the appropriate Board whilst implementation is carried out by Management. On the other hand, strategy and goal congruency is reviewed monthly by management and quarterly by the appropriate

Regulatory risk

Regulatory risk is defined as the failure to comply with applicable laws and regulations or supervisory requirements, or the exclusion of provisions of relevant regulatory requirements out of operational procedures. This risk is managed and mitigated through the Group Board Risk Management Committee and the Group Enterprise Wide Governance and Compliance unit which ensures that:

- Comprehensive and consistent compliance policies and procedures exist covering the Group and its SBUs;
- A proactive and complete summary statement of the Group and its SBUs position on ethics and compliance exists;
 A reporting structure of the Group Enterprise Wide Compliance Function exists that ensures independence and effectiveness; and
- d. Yearly compliance and awareness training targeting employees in compliance sensitive areas is carried out

37.10 Reputation risk

This is the risk of potential damage to the Group's image that arises from the market perception of the manner in which the Group and its SBUs package and deliver their products and services as well as how staff and management conduct themselves. It also relates to the Group's general business ethics. This can result in loss of earnings or adverse impact on market capitalisation as a result of stakeholders adopting a negative view to the Group and its actions. The risk can further arise from the Group's inability to address any of its other key risks. This risk is managed and mitigated through:

- a. continuous improvements to the Group's operating facilities to ensure they remain within the taste of the Group's various
- b. ensuring that staff subscribe to the Group's code of conduct, code of ethics and general business ethics; and c. stakeholders' feedback systems that ensures proactive attention to the Group's reputation management.

37.11 Money-laundering risk

This is the risk of financial or reputational loss suffered as a result of transactions in which criminal financiers disguise the origin of funds they deposit in the subsidiaries of the Group and then use the funds to support illegal activities. The Group manages this risk through:

- a. adherence to Know Your Customer Procedures;
- effective use of compliance enabling technology to enhance anti-money laundering program management, communication, monitoring and reporting;
- development of early warning systems; and
- d. integration of compliance into individual performance measurement and reward structures.

The principal risk that the insurance segment faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the insurance subsidiary is to ensure that sufficient reserves are available to cover these liabilities

The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements.

The subsidiaries also purchase reinsurance as part of their risk mitigation programme. Reinsurance ceded is placed on both a proportional and non-proportional basis. The majority of proportional reinsurance is quota-share reinsurance which is taken out to reduce the overall exposure of the company to certain classes of business. Non-proportional reinsurance is primarily excess-of-loss reinsurance designed to mitigate the company's net exposure to catastrophe losses. Retention limits for the excess-of-loss reinsurance vary by product line and territory.

The insurance company's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the company substantially dependent upon any single reinsurance contract.

KEY

Level of inherent risk

reflects a lower than average probability of an adverse impact on an institution's capital and earnings. Losses in a functional area with low inherent risk would have little negative impact on the institution's overall financial condition. could reasonably be expected to result in a loss which could be absorbed by an institution in the normal course of business. Low -

reflects a higher than average probability of potential loss. High inherent risk could reasonably be expected to result in a significant and harmful loss to the institution.

Adequacy of Risk Management Systems

risk management systems are inadequate or inappropriate given the size complexity and risk profile of the banking institution. Institution's risk management systems are lacking in important ways and therefore a cause of more than normal supervisory attention. The internal control systems will be lacking in important aspects particularly as indicated by continued control exceptions or by the failure to adhere to written down policies and procedures.

Acceptable – management of risk is largely effective but lacking to some modest degree. While the institution might be having some minor risk management weaknesses these have been recognised and are being addressed. Management information systems are generally

management effectively identifies and controls all types of risk posed by the relevant functional areas or per inherent risk. The board Strong and senior management are active participants in managing risk and ensure appropriate policies and limits are put in place. The policies comprehensively define the financial institution's risk tolerance responsibilities are effectively communicated.

Overall Composite Risk Low Risk - would be

Overall Composite Risk

Low Risk – would be assigned to low inherent risk areas. Moderate risk areas may be assigned a low composite risk where internal controls and risk management systems are strong and effectively mitigate much of the risk.

Moderate Risk – risk management effectively identifies and controls all types of risk posed by the relevant functional area significant weaknesses in the risk management systems may result in a moderate composite risk assessment. On the other hand a strong risk management system may reduce the risk so that any potential financial loss from the activity would have only a moderate negative impact on the financial condition of the organization.

Direction of Overall Composite Risk Rating

Increasing – based on the current information composite risk is expected to increase in the next twelve months.

Decreasing – based on current information composite risk is expected to decrease in the next twelve months.

Stable – based on the current information composite risk is expected to decrease in the next twelve months.

The Directors have assessed the ability of the Group and its subsidiaries' (the Group) to continue operating as a going concern and believe that the preparation of these consolidated financial statements on a going concern basis is still appropriate. The Directors have engaged themselves to continuously assess the ability of the Group to continue to operate as a going concern and to determine the continued appropriateness of the going concern assumption that has been applied in the preparation of these consolidated financial statements.

Particular attention is given to the issues below:

Legacy liabilities and nostro gap accounts:

Legacy debts were resolved through registration with the Reserve Bank of Zimbabwe. Subsequent to 31 December 2019, The Group fulfilled the requirements of the registration of legacy liabilities and nostro gap accounts, by transferring ZWL to the Reserve Bank of Zimbabwe (RBZ) of the amount registered as legacy debts. Currently, The Group is carrying a government grant receivable and nostro gap asset related to the legacy liabilities and nostro gap accounts respectively. Payments are being made available upon request by

Impact of COVID-19

COVID-19 is an economic shock analogous to the global financial crisis. During the period under review, economic and business activity noticeably shifted to, and revolved around, the coronavirus - which was declared a global pandemic by the World Health Organisation "WHO" on 11 March 2020.

As the virus continues to spread globally, the Group has considered the future impact it might have on its ability to continue to operate as a going concern. Both global and domestic economic activities are expected to continue on a slow-down as Governments continue adopt restrictive measures to curtail the spread of the virus. In Zimbabwe, Government and private sector efforts to fight the disease resulted in new threats and opportunities to the Group's business model

The operations of the Group have not been spared of the effects of COVID 19. Due to the continued lockdown that has been necessitated by the need to curtail the spread of the virus, most of the Group's branches were not operating at full capacity. Most of the Group's employees are working from home with the exception of staff members that are required to be available physically within the work premises. Limited services are being offered to clients, with most of the services being restricted to clients who have been designated as essential services. Transactional volumes have declined during the lockdown period as a result of the restriction in movement and the requirement that only essential services be allowed to operate during this period. Borrowers, especially those that are in the hardest hit industries such as Tourism and Hospitality have had their businesses affected and consequently, their ability to service debts and pay premiums.

Group Business Continuity

The Group has put in place various measures to support its clients and counter the effects of COVID 19. The measures are detailed as below: Aggressive use of digital channels: The Group has encouraged its customers to make use of the various digital platforms it has available

in an effort to make sure that services are available to customers during the lockdown period.

Remote working: Most of the Group employees are available to ensure continuity of the business during lockdown by working remotely. Forbearance and moratoria to clients hardest hit by the virus: The Group's level of exposure within the Hospitality and Tourism Sector which has been hardest hit by the effects of the outbreak, constitutes about 0.68% and hence, the Group is unlikely to suffer significant losses due to non-performance of borrowers in this Sector

restriction in movements and branches not operating at full capacity. Non-interest income then increased in subsequent months following the easing of lockdown regulations. Currently, of the Group banking branches are operating at full capacity and measures have been put in place to ensure business continuity.

In April 2020, the Group experienced a decline in the level of non-interest income due to reduced transactional volume as a result of

The Directors have engaged themselves to continuously assess the ability of the Group to continue to operate as a going concern. Despite the foregoing, the Group has assessed that COVID-19 will not have an inhibiting impact on its ability to continue operating as a going concern. The Directors have made a detailed impact assessment which is available at the Company registered offices

Events after the reporting period.

CBZ Bank Limited has been co-operating in investigations by the Office of Foreign Asset Control (OFAC) regarding historical transactions involving a party that was subject to OFAC economic sanctions. Post the reporting date, OFAC has concluded its investigations and the matter has been resolved through the issuance of a Cautionary Letter.

CORPORATE GOVERNANCE

The CBZ Holdings Limited governance framework supports the principles of integrity, strong ethical values and professionalism integral to the company's business. The Board recognizes that it is accountable to Shareholders for good corporate governance and is committed to high standards of governance that are recognised and understood throughout the Group. The Board is primarily accountable to shareholders, while also considering the interests of other stakeholders such as customers, employees, suppliers, regulators and the community. In an environment of increasing change and complexity of regulation, management aims to achieve a balance between the governance expectations of shareholders and other stakeholders, and the need to generate competitive financial returns.

We aim to stay abreast of developments in good governance and practice, and have a well-developed structure that ensures the continued compliance with the Zimbabwe Corporate Governance Code (ZIMCODE 2014), the Zimbabwe Stock Exchange Rules SI134/2019, the Reserve Bank of Zimbabwe Corporate governance guidelines No. 01-2004/BSD, The Banking Act [Chapter 24:20], the Banking Amendment Act of 2015 and the South African King reports.

THE BOARD OF DIRECTORS

This is the main decision making body, setting the strategic direction of the Group and ensuring that the Group manages risk effectively. The Board is involved in setting measurable objectives to promote a healthy corporate culture that is aligned with strategy and our strong commitment to our stakeholders. In addition, the board is responsible for the overall stewardship of the Group and in particular for its long term growth and profitability through implementation of agreed financial objectives.

The Board comprises of 7 directors being; 5 Non-Executive Directors and two executive directors

Retirement and Appointment of New Directors

During the course of the year the Group experienced the following Board Changes:

Director Retirements 1 January 2020 - 30 June 2020

DIRECTOR	DESIGNATION	SUBSIDIARY BOARD	DATE OF RETIREMENT
Innocentia Tigere	Independent Non-Executive Director	CBZ Properties P/L	31 March 2020
Richard Dawes	Independent Non-Executive Director	CBZ Life P/L	5 June 2020
Farai Zizhou	Independent Non-Executive Director	CBZ Life P/L	5 June 2020
Dr Virginia Masunda	Independent Non-Executive Director	CBZ Life P/L	5 June 2020

Director Appointments 1 January 2020-30 June 2020

DIRECTOR	DESIGNATION	SUBSIDIARY	DATE OF APPOINTMENT
Jiten Shah	Independent Non-Executive Director	CBZ Bank Limited	7 February 2020
Christian Beddies	Independent Non-Executive Director	CBZ Bank Limited	17 January 2020
Jamille Jinnah	Independent Non-Executive Director	Red Sphere	11 June 2020
Heena Joshi	Independent Non-Executive Director	Datvest	17 March 2020

The recruitment of new Directors is currently ongoing and the appointment of new directors is based on pre-established criteria having regard to the existing skills mix on the Board as a whole and having assessed areas where additional skill, expertise or experience is required. These appointments to the Board are made with due cognizance of the need to ensure that the board comprises of a diverse range of skills, knowledge and expertise and has the requisite independence, including, the professional and industry knowledge necessary to meet the Group's strategic

All appointments follow a transparent procedure and are subject to confirmation by shareholders at the Annual General Meeting. Before appointment, potential board appointees must undergo a fitness and Probity assessment in line with the Reserve Bank of Zimbabwe (RBZ) Prudential Guidelines and the Banking Act.

BOARD COMMITTEES

The Board committees continued to play a crucial role in the company's governance framework, undertaking their work comprehensively and effectively supporting the work of the board. The Board has established and delegated specific roles and responsibilities to three standing committees, to assist it in discharging its duties and these are :- Audit and Finance Committee; Risk Management Committee and Human Resources & Corporate Governance Committee (also sits as Nominations Committee).

The committees meet quarterly in accordance with their terms of reference and members of the executive committee and management attend meetings of the various committees by invitation

The Boards of Directors of the various units as at 30 June 2020 were constituted as tabulated below:

EARNINGS PER SHARE

Basic earnings per share is calculated by dividing net profit for the period attributable to ordinary equity holders of the parentby the weighted average number of ordinary shares outstanding at the end of the per period after adjusting for treasury shares.

Diluted earnings per share is calculated by dividing the net profit attributable to ordinary equity holders of the parent by the sum of weighted average number of ordinary shares outstanding and the weighted average number of potentially dilutive ordinary shares after adjusting for treasury shares.

REVIEWED

The following reflects the income and shareholding data used in the basic and diluted earnings per share computations:

13.	OTHER ASSETS Prepayments and deposits *Other receivables	82 357 957 29 009 127 874	41 080 814 19 994 658 080	63 956 595 29 009 127 874	35 173 117 7 631 793 893

Included in other receivables is an amount of ZWL\$28 676 470 680 (December 2019: ZWL\$19 843 383 072) which relates to the government grant receivable from the Reserve Bank of Zimbabwe (RBZ). RBZ will provide foreign currency to the Bank for all registered legacy liabilities and nostro gap accounts at an exchange rate of 1:1. The Bank has already complied with the conditions necessary for the provision of the assistance namely registration of the legacy liabilities and nostro gap accounts and payment of the ZWL equivalent at a rate of 1:1.

The government grant receivable is denominated in US Dollars and has been translated to ZWL using the closing exchange rate in line with the treatment of monetary assets denominated in foreign currencies prescribed in IAS 21.

The asset will be used to settle any payment obligations that may accrue in the future related to the legacy liabilities and nostro gap

The fair values of the non-listed equities which have been classified as level 3 investments

Fair values were derived using a combination of income and market approaches depending on the appropriateness of the methodologies to the type of equity instruments held. The valuation took into account certain assumptions about the model inputs, including but not limited to liquidity discounts, country factor, inflation, credit risk and volatility. A range of probabilities were also applied to these inputs and the fair values derived therefrom were deemed to be within acceptable fair values ranges of the equities.

The following table shows the valuation techniques used in measuring the fair value of unquoted equities as well as the significant unobservable inputs used.

Valuation Technique	Significant unobservable inputs	Interrelationship between key unobservable inputs and fair value measurement
 Discounted Cash Flow Technique Dividend Growth model. Earnings Multiple 	 Inflation shock adjusted return (1.5%) Growth rate (0.05%) Liquidity discount GDP Growth 	The fair values would increase/ decrease if: Inflation shock adjusted return was higher/lower The risk adjusted discount were lower / higher The GDP growth was higher or lower The Liquidity discount was higher or lower

If the fair value adjustment had been 5% up or down, the Bank's other comprehensive income would be ZWL\$ 2 200 860 and the Statement of Financial Position would be ZWL\$ 2 316 695 higher or lower than the reported position

INFLATION ADJUSTED

Properties were revalued on an open market basis by an internal professional valuer, as at 30 June 2020 in accordance with the Royal Institute of Chartered Surveyors Appraisal and Valuation Manual and the Real Estate Institute of Zimbabwe Standards. The revaluation of land and buildings entailed the following:

In determining the market values of the subject properties, the following was considered:

- Comparable market evidence which comprised complete transactions as well as transactions where offers had been made but the transactions had not been finalised;
- Professional judgement was exercised to take cognisance of the fact that properties in the transaction were not exactly comparable in terms of size, quality and location to the properties owned by the
- The reasonableness of the market values of commercial properties so determined, per the above bullet, was assessed by reference to
- the properties in the transaction; and
 The values per square metre of lettable space for both the subject
 properties and comparables were analysed.

With regards to market values for residential properties, the comparison method was used. This method entails carrying out a valuation by directly comparing the subject property, which has been sold or rented out. The procedure was performed as follows:

- Surveys and data collection on similar past transactions; Analysis of the collected data; and
- Comparison of the analysis with the subject properties and then carrying out the valuation of the subject properties.

- Adjustments were made to the following aspects:

 Age of property state of repair and maintenance
 Aesthetic quality quality of fixtures and fittings
 - Structural condition location
- Accommodation offered size of land.

The maximum useful lives of property and equipment are as follows:

Motor vehicles
3 - 5 v Computer equipment

5 years 10 years 10 years 40 years Leasehold improvements Furniture and fittings Buildings The carrying amount of buildings would have been ZWL\$117 845 562 (December 2019: ZWL\$119 611 512) had they been carried at

Property was tested for impairment through comparisons with open market values determined by an independent valuer.

The carrying amount of Investment properties is the fair value of the properties as determined by a registered internal appraiser having, an appropriate recognised professional qualification and recent experience in the location and category of the property being valued. The valuation was in accordance with the Royal Institute of Chartered Surveyors Appraisal and Valuation Manual and the Real Estate Institute of Zimbabwe Standards. Fair values were determined having regard to recent market transactions for similar properties in the same location as the Bank's investment properties and also in reference to the rental yields applicable to similar properties in the same location as the Bank's investment properties and also in reference to the rental yields applicable to similar property. The properties were valued as at 30 June 2020.

The rental income derived from investments properties amounted to ZWL\$3 600 768 (June 2019: ZWL\$2 637 978) with direct operating expenses amounting to ZWL\$11 829 (June 2019: ZWL\$47 221).

If the fair value adjustment had been 5% up or down, the Bank's profit would have been 7WI \$11,524,013 higher or lower the reported

and average interest rates of 9.2% and are secured by a variety of instruments which include liens over bank, accounts, guarantees, treasury bills and sub borrower securities.

Settlement of legacy liabilities and nostro gap accounts

Included in the deposits balance above, are amounts that are denominated in USD amounting to US\$429 109 162 (December 2019: US\$ 451 551 474) (being legacy liabilities of US\$315 626 032 (December 2019: US\$318 062 662) and nostro gap accounts of US\$113 483 130 (December 2019: US\$133 488 811)) which are shown at ZWL\$27 353 220 272 (December 2019: ZWL\$19 843 383 072). These foreign denominated liabilities, which are payable on demand, are subject to a special settlement arrangement with the RBZ as detailed in Note 13 to the financial statements wherein the Reserve Bank of Zimbabwe (RBZ) will provide foreign currency gradually to the Bank for all registered legacy liabilities and nostro gap accounts at an exchange rate of 1:1. We note that to date USD18 772 208 (December 2019: USD10 965 225) has been made available under this arrangement, demonstrating the willingness and capability of the RBZ to honour the settlement arrangement.

The Bank has however identified key risks attendant to the legacy liabilities and nostro gap accounts, which risks and respective mitigating strategies are available for inspection at the Company's Registered Offices.

RISK MANAGEMENT

Risk overview

CBZ Bank Limited has continued to be guided by a desire to uphold a "High Risk Management and Compliance Culture" as one of its major strategic thrusts which is embedded under clearly defined risk appetite in terms of the various key risk exposures. This approach has given direction to the Bank's overall strategic planning and policies. Through the CBZ Bank risk management function, the Bank regularly carries out risk analysis through value at risk (VAR) assessment, stress testing as well as simulations to ensure that there is congruency or proper alignment between its strategic focus and its desired risk appetite

The Bank's risk management framework looks at enterprise wide risks and recognises that for effective risk management to take effect, it has to be structured in terms of acceptable appetite, defined responsibility, accountability and independent validation of set processes. Bank Management and staff are responsible for the management of the risks that fall within their organisational responsibilities. The CBZ Bank Risk Management function is responsible for ensuring that the Bank's risk taking remains within the set risk benchmarks. The CBZ Bank Internal Audit function continuously provides independent assurance on the adequacy and effectiveness of the deployed risk management processes. The CBZ Bank Enterprise Wide Governance and Compliance Unit evaluates the quality of compliance with policies, processes and governance structures.

The Bank holds collateral against loans and advances to customers in the form of mortgage bonds over property, other registered securities over assets, guarantees, cash cover, assignment of crop or export proceeds and leasebacks. Estimates of fair values are based on the values of collateral assessed at the time of borrowing, and are regularly aligned with trends in the market.

Credit quality per class of financial assets

The table below shows the credit quality and the maximum exposure to credit risk based on the Group's internal credit rating system and year end stage classification. The amounts presented are gross of impairment allowances. Details of the Bank's internal grading system are explained in Note 37.3.1 of the Group's results.

Loans and advances to customers

Impairment allowance for loans and advances to customers

Liquidity risk

Liquidity relates to the Bank's ability to fund its growth in assets and to meet obligations as they fall due without incurring unacceptable losses. The Bank recognises two types of liquidity risks i.e. Market liquidity risk and Funding liquidity risk.

Market liquidity risk is the risk that the Bank cannot cover or settle a position without significantly affecting the market price because of limited

market depth.

Funding risk, on the other hand, is the risk that the Bank will not be able to efficiently meet both its expected as well as the unexpected current and future cash flow needs without affecting the financial condition of the Bank.

The Bank's liquidity risk management framework ensures that limits are set relating to levels of wholesale funding, retail funding, loans to deposit ratio, counter- party exposures as well as prudential liquidity ratio.

The primary source of funding under the Bank are customer deposits made up of current, savings and term deposits and these are diversified by customer type and maturity profile. The Bank tries to ensure through the Assets and Liabilities Committee (ALCO) processes and balance sheet management processes that asset growth and maturity are funded by appropriate growth in deposits and stable funding respectively.

The table above above the	and flows of the F	Pank'a nan dariya	tive on and off by	alanga shoot fine	anaial accete as	ad liabilitias a	n the basis of the

The table above shows the cash flows of the Bank's non-derivative on and off balance sheet financial assets and liabilities on the basis of their earliest possible contractual maturity and the related year gaps. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest year in which the guarantee could be called.

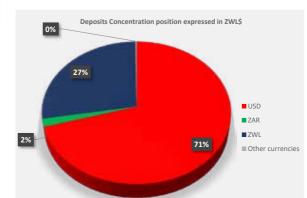

The Bank carries out static statement of financial position analysis to track statement of financial position growth drivers, the pattern of core banking deposits, statement of financial position structure, levels and direction of the Bank's maturity mismatch and related funding or liquidity gap. The Asset and Liability Management Committee (ALCO) comes up with strategies through its monthly meetings to manage these liquidity gaps.

Details of the liquidity ratio for the Bank at the reporting date and during the reporting year were as follows:

% 42 At 30 June 2020 At 31 Dec 2019 Average for the period Maximum for the period 83 37 45 31 Minimum for the period

29.2 Concentration & Counterparty RiskConcentration risk describes the level of risk in the Bank's liabilities when they are concentrated in few counterparties. Given concentrated

The risk associated with significant liability concentrations in specific foreign currencies is that if the exchange rate moves against the Bank, assuming no adequate monetary assets denominated in the same currency, significant exchange loses will be incurred and significant cash flow will be required to expunge the associated liabilities. An analysis of the concentration of the Bank's deposits is shown below;

Included in the USD deposits, are legacy liabilities and nostro gap accounts amounting to USD429.11 million. These liabilities contribute 62.45% (December 2019:59.72%) of the Bank's total deposits.

The Bank's significant counterparty risk encompasses risk on legacy liabilities and nostro gap accounts. The Bank's deposits are held with various counterparties; the 3 largest ones which are legacy liabilities and nostro gap accounts counterparties which hold approximately 37.95%, 6.04% and 5.96%, respectively. As at 31 December 2019 the concentration was 34.3%, 5.4% and 5.2%, respectively.

Mitigates against the above mentioned risks, are available at the company's registered offices.

FOR THE HALF YEAR ENDED 30 JUNE 2020

Banking | Insurance | Investments | Agro-Business

30. Interest rate risk

This is the possibility of a Bank's interest income being negatively influenced by unforeseen changes in the interest rate levels arising from Foreign currency position as at 30 June 2020 weaknesses related to a Bank's trading, funding and investment strategies.

This is managed at both Board and Management level through the regular policy and benchmarks which relate to interest rate risk management. The major areas of intervention involve daily monitoring of costs of funds, monthly analysis of interest re-pricing gaps, monthly interest rate simulations to establish the Bank's ability to sustain a stressed interest rate environment and various interest rate risk hedging strategies. The use of stress testing is an integral part of the interest rate risk management framework and considers both the historical market events as well as anticipated future scenarios. The Bank denominates its credit facilities in the base currency, the ZWL in order to minimize cross currency interest rate risk. The Bank's interest rate risk profiling is illustrated below:

31. Foreign exchange risk

This risk arises from the changes in exchange rates and originates from mismatches between the values of assets and liabilities denominated in different currencies and can lead to losses if there is an adverse movement in exchange rates where open positions either spot or forward, are taken for both on and off statement of financial position transactions.

Supervision is at CBZ Bank Board level through the Bank Board ALCO Committee which covers ALCO processes by way of strategic policy and benchmarking reviews and approval. The committee meets on a quartely basis. Furthermore, the Bank Management ALCO which meets on a monthly basis, reviews performance against set benchmarks embedded under acceptable currencies, currency positions as well as stop loss limits. Derivative contracts with characteristics and values derived from underlying financial instruments, exchange rates which relate to futures, forwards, swaps and options can be used to mitigate exchange risk.

At 30 June 2020 if foreign exchange rates at that date had weakened or strengthened by 5 percentage points with all other variables held constant post tax profit for the period would have been ZWL\$69 947 713 higher or lower respectively than the reported position. This arises as a result of the increase or decrease in the fair value of the underlying assets and liabilities denominated in foreign currencies. The foreign currency position for the Bank as at 30 June 2020 is as below

FOR THE HALF YEAR ENDED 30 JUNE 2020

Banking Insurance Investments Agro-Business

This is the potential for loss arising from human error and fraud, inadequate or failed internal processes, systems failure, non-adherence to procedure or other external sources that result in the compromising of the Bank's revenue or erosion of the Bank's statement of financial position value.

Operational risk management framework
CBZ Bank Risk Management Committee exercises adequate oversight over operational risks across the Bank with the support of the Board as well as business and functional level committees. CBZ Bank Risk Management is responsible for setting and approval of Bank Operational Policies and maintaining standards for operational risk

The Bank Board Audit Committee through Internal Audit function as well as Bank Enterprise Wide Governance and Compliance perform their independent reviews and assurances under processes and procedures as set under policies and procedure manuals. On the other hand, the Bank Risk Management and Bank IT Departments with assistance from the Organization and Methods Department within Group Human Resources ensure that processes, procedures and control systems are in line with variables in the operating environment.

This is the risk that arises where the Bank's strategies may be inappropriate to support its long term corporate goals due to underlying inadequate strategic planning process, weak decision making process as well as weak strategic implementation programs.

To mitigate this risk, the Bank's Board and Management teams craft the strategy which is underpinned to the Bank's corporate goals. Approval of the strategy is the responsibility of the Board whilst implementation is carried out by Management. On the other hand strategy and goal congruency is reviewed monthly by management and quarterly by the Board.

Regulatory risk
Regulatory risk is defined as the failure to comply with applicable laws and regulations or supervisory requirements, or the exclusion of provisions of relevant regulatory requirements out of operational procedures. This risk is managed and mitigated through the Bank Board Risk Management Committee and the Bank Enterprise Wide Governance and Compliance unit which ensures that:

- Comprehensive and consistent compliance policies and procedures exist covering the Bank;
 A proactive and complete summary statement of the Bank's position on ethics and compliance exists;
 A reporting structure of the Bank Enterprise Wide Compliance Function exists that ensures independence and effectiveness; and
- Yearic compliance and awareness training targeting employees in compliance sensitive areas is carried out.

Reputation risk

This is the risk of potential damage to the Bank's image that arises from the market's perception of the manner in which the Bank packages and delivers its products and services as well as how staff and management conduct themselves. It also relates to the Bank's general business ethics. This can result in loss of earnings or adverse impact on market capitalisation as a result of stakeholders adopting a negative view to the Bank and its actions. The risk can further arise from the Bank's inability to address any of its other key risks. This risk is managed and mitigated through:

- Continuous improvements of the Bank's operating facilities to ensure that they remain within the taste of the Bank's various
- Ensuring that staff subscribe to the Bank's code of conduct, code of ethics and general business ethics and that; Stakeholders' feedback systems that ensures proactive attention to the Bank's reputation management.

Money laundering risk

This is the risk of financial or reputational loss suffered as a result of transactions in which criminal financiers disguise the origin of funds they deposit in the Bank and then use the funds to support illegal activities. The Bank manages this risk through

Adherence to Know Your Customer Procedures

- Effective use of compliance enabling technology to enhance anti–money laundering program management, communication, monitoring and reporting;
- Development of early warning systems; and
- Integration of compliance into individual performance measurement and reward structures.

CAPITAL MANAGEMENT

The Bank adopted the Bank Internal Capital Adequacy Assessment Policy (ICAAP) which enunciates CBZ Bank's approach, assessment and management of risk and capital from an internal perspective that is over and above the minimum regulatory rules and capital requirements of Basel II. The primary objective of the Bank's capital management is to ensure that the Bank complies with externally imposed capital requirements and that the Bank maintains strong credit ratings and healthy capital ratios in order to support its business and maximize shareholder value. ICAAP incorporates a capital management framework designed to satisfy the needs of key stakeholders i.e. depositors, regulators, rating agencies who have specific interest in its capital adequacy and optimal risk taking to ensure its going concern status (solvency). The focus is also targeted at meeting the expectations of those stakeholders i.e. shareholders, analysts, investors, clients and the general public who are interested in looking at the profitability of the Bank vis-à-vis assumed levels of risk (risk versus return). It is important to highlight that CBZ Bank has three levels of capital and other components that are measured and managed simultaneously: that are measured and managed simultaneously:

- Regulatory capital,
- Economic capital, and Available book capital

Capital Adequacy

The capital adequacy is calculated in terms of the guidelines issued by the Reserve Bank of Zimbabwe

	UNAUDITED 30 JUN 2020 ZWL\$	UNAUDITED 31 DEC 2019 ZWL\$
Risk Weighted Assets	8 297 338 484	2 805 580 556

Regulatory capital consists of Tier 1 capital which comprises share capital, share premium and revenue reserves including current year profit. The other component of the regulatory capital is Tier 2 capital, which includes general provisions and revaluation reserves. The regulated minimum capital base required by the Central Bank is ZWL\$25 million with a tier 1 ratio of 8% and a total capital adequacy

CORPORATE GOVERNANCE STATEMENT

The quality of corporate governance practices is becoming an increasingly important factor in maintaining market confidence. The Bank is committed to and supports the principles contained in the Reserve Bank of Zimbabwe (RBZ) Corporate Governance Guideline No. 01-2004/BSD, as well as the King III Code which is an internationally regarded benchmark in Corporate Governance.

DISCLOSURE POLICY

The Board is aware of the importance of balanced and understandable communication of the Bank's activities to stakeholders and strives to clearly present any matters material to a proper appreciation of the Bank's position. The interests and concerns of stakeholders are addressed by communicating information in a timely manner.

The Directors foster a mutual understanding of objectives shared between the Bank and its institutional shareholders by meeting with and making presentations to them on a regular basis. The Board welcomes and encourages the attendance of private shareholders at general meetings and gives them the opportunity to have questions addressed.

The Bank endeavours to ensure, through its regular public dissemination of quantitative and qualitative information that analysts' estimates are in line with the Bank's own expectations. The Bank does not confirm or attempt to influence analysts' opinions or conclusions and does not express comfort with analysts' models and earnings estimates.

GOING CONCERN

For going concern assessment refer to CBZ Holdings note 38.

Events after the reporting period.

CBZ Bank Limited has been co-operating in investigations by the Office of Foreign Asset Control (OFAC) regarding historical transactions involving a party that was subject to OFAC economic sanctions. Post the reporting date, OFAC has concluded its investigations and the matter has been resolved through the issuance of a Cautionary Letter.

INDEPENDENT AUDITOR'S REVIEW CONCLUSION

To the Shareholders of CBZ Holdings Limited

Introduction

We have reviewed the accompanying inflation adjusted interim condensed consolidated financial information of CBZ Holdings Limited, as set out on pages 2 to 13, which comprise the inflation adjusted interim condensed consolidated statement of financial position as at 30 June 2020 and the related inflation adjusted interim condensed consolidated statement of profit or loss and other comprehensive income, the inflation adjusted interim condensed consolidated statement of changes in equity and the inflation adjusted interim condensed consolidated statement of cash flows for the six-month period then ended and explanatory notes.

Management is responsible for the preparation and presentation of this inflation adjusted interim condensed consolidated financial information in accordance with the International Financial Reporting Standards. Our responsibility is to express a review conclusion on the inflation adjusted interim condensed consolidated financial information based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for adverse review conclusion

<u>Matter 1: Non-compliance with International Financial Reporting Standards IAS 21- The Effects of Changes in Foreign Exchange Rates in prior period</u>

As explained in Note 1.1 to the inflation adjusted interim condensed consolidated financial information, the Group changed its functional currency from the United States Dollar (US\$) to Zimbabwe Dollars (ZWL) on 23 February 2019 in order to comply with Statutory Instrument 33 of 2019 issued on the same date. We however believe that the change in currency occurred prior to that date. The financial information is presented in ZWL.

Zimbabwe witnessed significant monetary and exchange control policy changes in 2016 and increasingly through to 2019. The Reserve Bank of Zimbabwe (RBZ) together with the Ministry of Finance and Economic Development promulgated a series of exchange control operational guidelines and compliance frameworks during this period. Specifically, there was a requirement for banks to separate out FCA RTGS Accounts from the FCA Nostro US\$ Accounts during October 2018.

INDEPENDENT AUDITOR'S REVIEW CONCLUSION (CONTINUED)

CBZ Holdings Limited

Although the rate was legally pegged at 1:1, multiple pricing practices and other transactions observed and reported publicly indicated exchange rates other than 1:1 between RTGS and the US\$ amounts. In February 2019 there was a Monetary Policy statement which introduced the RTGS Dollar (RTG\$) and the interbank foreign exchange market. Furthermore, Statutory Instrument 142 of 2019 specified that for all domestic transactions, the Zimbabwe Dollar (which comprises RTGS\$, Bond notes and Bond Coins) was the sole legal tender effective 24 June 2019.

These events triggered the need for the Group to assess whether there was a change in functional currency (from US\$ to RTGS/ZWL) and to determine an appropriate spot rate as required by IAS 21. We believe that events in the market and subsequent promulgation of the ZWL as a formal currency supports that there was a change in functional currency from US\$ to ZWL and that transactions in the market indicated a different rate between the two currencies despite the legal 1:1 ZWL: US\$ exchange rate and this occurred effective 1 October 2018.

The issues discussed above were the basis of modifying our audit opinion as at 31 December 2019 hence some of the opening balances for the period ended 30 June 2020 are affected by the misstatements which occurred in 2019.

Management has not restated the opening balances to resolve this matter which resulted in the adverse audit report in the prior period in accordance with IAS 8 – Accounting Polices, Changes in Accounting Estimates and Errors. As a result, the closing balances for the following accounts as stated on the Statement of Financial Position remain misstated: Intangible Assets of ZWL 21,610,447,ZWL240,666,020 included in Property and equipment of ZWL3,481,624,658, Deferred tax asset of ZWL348,188,029, Share Premium of ZWL597,459,709, Revaluation Reserve of ZWL767,698,325, Retained earnings of ZWL6,879,930,284, Non-Controlling Interests of ZWL1,857,420 and Deferred Tax liability of ZWL1,009,819,514.

As a consequential impact, the application of IAS 29 is inappropriate. It is noted that the application of IAS29 was based on prior and current periods' financial information which was not in compliance with IAS 21 / IAS 8 as described above. Had the correct base numbers and start date been used, the accounts stated in the preceding paragraph would have been materially different. In addition, Land inventory of ZWL 1,920,518,178, Right of use assets of ZWL27, 464,913, Share capital of ZWL 97,768,656, Fair value reserve of ZWL 263,685,187, Foreign currency translation reserve of ZWL 1,329,177,416 and Lease liability of ZWL3, 723,624 and virtually all amounts on the statement of profit or loss and other comprehensive income on the inflation adjusted interim condensed financial information would have been materially different.

Matter 2: Valuation of investment properties, land inventory and owner-occupied properties classified under property and equipment

The Group's investment properties, land inventory and freehold land and buildings are carried at ZWL2 069 764 661 (2019: ZWL 1,463,447,124); ZWL1 920 518 178 (2019: ZWL 1,928,988,121) and ZWL2 884 168 290 (2019: ZWL 2,114,037,232) respectively as at 30 June 2020.

INDEPENDENT AUDITOR'S REVIEW CONCLUSION (CONTINUED)

CBZ Holdings Limited

At 30 June 2020, CBZ's investment properties, land inventory and freehold land and buildings were valued using inputs denominated in the United States Dollar currency and converted to local currency using the weighted average exchange rate per Note 16; Note 20 and Note 21 to the inflation adjusted condensed financial information.

Commercial properties were valued in terms of the income capitalisation method/implicit investment approach, while residential properties were valued in terms of the market comparable approach. Both valuation methods rely on historical market evidence for calculation of inputs. This includes transaction prices for comparable properties, annual rentals and capitalisation rates.

However, using USD historical data and applying conversion rates to those USD valuation inputs to calculate ZWL property values would in our view not be an appropriate reflection of market dynamics. There is therefore a disagreement with management on the inputs used. Owing to the nature of the matter and the inputs arriving from external sources and not the accounting records, we are unable determine the appropriate correct inputs and therefore cannot quantify the possible impact. Our prior year audit report was also modified for this matter.

<u>Matter 3: Exchange rates used (Non-compliance with IAS 21- The Effects of Changes in Foreign Exchange Rates)</u>

Further contributing to the adverse opinion in prior year was the disagreement on exchange rates used. The interbank exchange rate was used to translate foreign denominated transactions and balances. The interbank rate does not meet the IAS 21 definition of a spot rate. Management continued to use the interbank exchange rate to translate foreign denominated transactions and balances for the current half year period, and the foreign exchange auction weighted average rate to translate foreign denominated balances at period end. These rates did not meet the definition of a spot rate as at 30 June 2020 and as a result all amounts in the Statement of Profit or Loss and Other Comprehensive Income are impacted except for Credit loss expense and Transfers to annuities reserve.

In addition, the following accounts on the Statement of Financial Position are misstated.

- ZWL 1,701,530,543 included in Balances with banks and cash of ZWL4,871,108,688
- ZWL1,099,305,204 included in Money market assets of ZWL 1,673,962,670
- ZWL 1,153,268,294 included in Equity Investments of ZWL1,173,355,033
- ZWL 10,505,515,344 included in Loans and advances to customers of ZWL12,243,389,577
- ZWL 824,523,257 included in Other assets of ZWL29,614,867,687
- ZWL 12,759,530,843 included in Deposits of ZWL45,014,049,555
- ZWL1,790,951,132 included in Other liabilities of ZWL2,255,980,008

INDEPENDENT AUDITOR'S REVIEW CONCLUSION (CONTINUED)

CBZ Holdings Limited

In addition, Retained earnings of ZWL6, 879,930,284, Current tax payable of ZWL298, 295,284 and Deferred tax liabilities of ZWL1, 009,819,514 are consequentially impacted by the impact from profit or loss and some of the balances noted above.

However, owing to the lack of information on the spot rates available to the entity and the other matters discussed above it is not possible to quantify the impacts of this departure from IFRS on the amounts noted above.

Emphasis of Matter- Settlement of legacy liabilities and nostro gap:

We draw attention to Notes 15 and 24.2 in the inflation adjusted interim condensed consolidated financial information, which collectively provide information relevant to legacy liabilities and Nostro gap affecting the Group. These notes highlight Management's assessment of risks associated with these foreign denominated debts and the settlement arrangement with the Reserve Bank of Zimbabwe. Our review conclusion is not modified in respect of this matter.

Adverse review conclusion

In view of the matters described in the preceding paragraphs, the inflation adjusted interim condensed consolidated financial information is not prepared, in all material respects, in accordance with International Financial Reporting Standards.

The engagement partner on the review audit resulting in this review conclusion report on the inflation adjusted interim condensed consolidation financial information is Mr Fungai Kuipa (PAAB Practicing Certificate Number 335).
