31 December 2020

## FIDELITY LIFE ASSURANCE OF ZIMBABWE LIMITED AND ITS SUBSIDIARIES

### Chairman's statement

### for the year ended 31December 2020

I am pleased to present the audited financial results of Fidelity Life Assurance of Zimbabwe Limited Group (the Group) for the year ended 31 December 2020. The commentary on financials is based on the inflation adjusted numbers.

### **Operating Environment**

The year 2020 was a challenging year not just for Fidelity Life Assurance of Zimbabwe (FLA) but for Zimbabwe and the world at large as we all grappled with the impact of the Covid 19 pandemic. We have all been affected personally in one way or another by this pandemic. As the Fidelity Life family our thoughts go out to all the families and especially our customers who lost loved ones during this time.

Zimbabwe's economy suffered a second consecutive year of economic decline as the COVID-19 pandemic disrupted economic activity for the better part of the year. The year was a tale of two halves. The first half was characterised by the rapid deterioration of the local currency and runaway inflation. The official foreign currency exchange platform became dysfunctional and the economy defaulted to the parallel exchange rate for the pricing of goods and services. Inflation was on the rampage and averaged more than 20% per month. Rising inflation posed a danger to the relevance of insurance products as it rekindled the sad memories of the devastating loss of value that was suffered in the period preceding the adoption of the multiple currency regime in 2009.

A raft of measures by the Central Bank aimed at curbing foreign currency trading on the thriving parallel market, particularly the introduction of the Foreign Currency Auction System and the ban on Mobile Money Transfer Agents stabilised the Zimbabwe dollar resulting in inflation showing a downward trend in the second half of the year and ending the year at 349% from a peak of 837% in July 2020. The parallel market exchange rate premium reduced from a peak of 300% at half year to around 20% by the end of the year. Foreign currency allotments under the auction system continued to improve as the year progressed and the current exchange rate regime has been a relative success.

Lockdown restrictions that were introduced in April 2020 were gradually eased in the last quarter of the year but the end of December witnessed an upsurge in COVID-19 infections and emergence of more virulent strains. This came at a time a number of countries had announced COVID-19 vaccines breakthrough and were set for massive vaccination programmes. Zimbabwe has since kick-started its own vaccination programme amid reluctance and pessimism in some guarters. Expectations are that a successful vaccination programme will lead to herd immunity and possible eradication of the pandemic.

Our business remained operational throughout the lockdown period as part of the essential services providers. The digitalisation drive that the business embarked on prior to the onset of COVID-19 made it possible to continue offering the full range of products and services with more than 90% of the staff complement working from their homes. While COVID-19 is still in our midst, the business has weathered the worst of the pandemic and is poised to continue providing relevant financial solutions to its customers

## **Completion of the Regulatory Asset Separation Exercise**

As shareholders are aware, Fidelity Life Assurance Company (FLA) conducted an exercise to separate its Pooled Fund assets between policyholders and shareholders to ensure compliance with the requirements of the Insurance Act (Chapter24:07) and the Pensions and Provident Act (Chapter 24:09).

I am pleased to advice shareholders that the Insurance and Pensions Commission (IPEC) approved the asset separation proposed by FLA, with an effective implementation date of 31 December 2018. The Board and Management of FLA are required to ensure that relevant financial statements and actuarial reports are restated in line with the results of the asset separation exercise and the IPEC Guidelines on Adjusting Insurance and Pensions Values in Response to the 2019 Currency reforms. Management is the process of implementing the asset separation in line with IPEC Guidelines.

## Group financial results

Despite the negative impact of COVID 19 during the year under review, the Group managed to post positive results recording profit before tax of ZWL\$69.2 million on an inflation adjusted basis for the year ended 31 December 2020.

Inflation adjusted Group total revenue decreased by 47% from ZWL\$2,180.7 million recorded in prior year to ZWL\$1,150.0 million recorded in the current year. The decrease in total revenue was as a result of a slump in investment income which decreased by 88%. Investment income is mainly driven by fair value gains on investment properties which are driven by the movement in exchange rate. The subsidiary in Malawi continues to provide diversification relief to the Group against the unstable currency movements in Zimbabwe.

digitalise our business. This technology drive has helped us navigate in a remote world, being technologically adept has never been more apparent. In 2020, we achieved the goals that we set for ourselves for the year and delivered on our financial goals. Below are some of the highlights of the major achievements.

### **Digital Transformation**

With the Board mandate that management fully enhance the digital value chain to support the new systems of work and the emerging digital future, the company has taken several steps towards achieving this strategy. Our sustained Digital transformation journey, which began in 2018, has cushioned the business from the full impact of Covid-19, in terms of business continuity and service delivery. FLA managed to provide seamless and cost effective services to its clients and stakeholders through the support of a robust work-from-home program, automated systems and various self-help platforms for customers.

Management made good strides in implementing our Contact Centre; this will be open to serve customers in 2021. In addition to the existing digital self-service portfolio which includes Fidelity Life App for assurance customers, Health/Lifestyle Management App for our medical aid members, online payment functionality and a suite of social media platforms which allow for real-time communication with clients; FLA enhanced its WhatsApp for business platform to allow customers to make payments and apply for new polices and services.

Our Malawi based subsidiary, Vanguard Life, successfully implemented a mobile-based funeral product in partnership with one of the country's leading mobile network providers. This product allows customers to apply and get funeral cover using a USSD code on their mobile phone. The product was launched in the last quarter of 2020. This development will be truly transformational for the Malawi business and plans are well underway for similar developments in Zimbabwe.

### Growth

The business continues to carefully select markets in order to earn the right colour of revenue. Work is still ongoing to de-risk from the Zimbabwe market by exploring investment opportunities in the region and beyond. Despite the delays we have experienced due to various lockdowns both in Zimbabwe and in the region the group remains resolute to add to its regional presence as soon as possible.

During the period under review the group embarked on various initiatives to ensure continued growth. These include the setting up of a Bureau de Change to increase USD earnings for the Group as well as finalising an agreement to become a money transfer agent with a reputable partner. In our medical aid business we have ensured that we continue to offer relevant services by introducing Covid cover, while the life business looks to remain relevant to our customers by reviewing both premiums and policy benefits and offering USD denominated products.

The Group began a balance sheet restructuring program at the beginning of the year to fully optimise key assets, improve solvency and performance. Over the year we have made good progress in our various initiatives to restore the balance sheet and the impact of this is now being felt.

### Sound Governance Framework

The Board is pleased with the progress made in creating a robust governance framework that is underpinned by effective internal controls for all operations. We have effectively dealt with any legacy governance issues and we are pleased with the defence lines that are now in place.

### Dividend

The Board resolved not to declare a dividend to ensure internal resources are preserved for the strengthening of the Group's underwriting capacity and capital position in these turbulent times.

## Looking to the Future

While national lockdowns related to Covid-19 have been relaxed to varying degrees, the threat and subsequent arrival of a second wave in the early part of 2021 reminds us that Covid 19 will continue to be challenge to our business and the economic environment remains uncertain and fragile. Whilst our technology-driven platforms and processes offer significant advantages, it remains challenging for us all. The outlook for 2021 is therefore difficult to forecast, however I am optimistic that the management team has put in place strategies that will see us prevailing despite these challenges. Importantly, our strong balance sheet and diversified income streams provide offsetting stability and growth. Our ability to de-risk from Zimbabwe by actively seeking opportunities in the region and beyond will also play a major role in our prospects for the coming vear.

We are continuing to invest for the future through the on-going development into technology to drive our business, make the lives of our customers better and create a leaner more efficient organisation.

### **Board Changes and Executive appointments**

During the year Mrs R.G. Maramba retired from the Board as a non-executive director with effect from 1 July 2020. I take this opportunity to thank her for her valued service and contribution to

Inflation adjusted Group total expenses decreased by 41% from ZWL\$1,822.0 million recorded in prior year to ZWL\$1,080.7 million in the current year. The Group recorded major savings on the Southview water pipeline works which resulted in project development costs decreasing by 82% from ZWL\$488.9 million prior year to ZWL\$79.7 million current year. However, operating expenses decreased by a much lower 31% from ZWL\$366.0 million to ZWL\$252.4 million recorded in the current year.

The Group's total assets increased by 19% in real terms from ZWL\$4,600.7 million as at 31 December 2019 to ZWL\$5,473.6 million as at 31 December 2020. The asset growth was driven by investment property and equity investments which account for 70% of the group's total assets. This real growth evidences management efforts to protect value of investments for our key stakeholders, policyholders and shareholders.

### Solvency

Statutory Instrument 95 (SI 95) requires Insurance companies to hold minimum regulatory capital of ZWL\$75 million. The Company has excess assets of ZWL\$115.4 million as at 31 December 2020 representing a solvency ratio of 154%.

### Successful Execution of Strategy

We believe the strategy that we followed over the last few years is proving to be resilient and adaptive. In particular, the COVID-19 pandemic has demonstrated the value of our drive to

the board and wish her well in her future endeavours. We also appointed a new Chief Finance officer, Zvenyika Zvenyika, from February 2020. We welcome Zvenyika to the Group. The Group continues to maintain high standards of corporate governance, by ensuring the board has the requisite skills and experience that is expected in the industry and markets in which it operates.

### Appreciation

Finally, I would like to thank our CEO and Executive Team for their efforts. Many thanks to my Board colleagues for their considerable contribution and support. We all appreciate the dedication, skills and professionalism of our employees in all our businesses. Above all, I would like to thank our loyal policyholders and shareholders for your ongoing support.

We all are committed to continue creating substantial value for our key stakeholders, the policyholders and shareholders, and I look forward to reporting on our progress.

F. Ruwende Chairman 28 May 2021

## | FLA 2020 Financials

## FIDELITY LIFE ASSURANCE OF ZIMBABWE LIMITED AND ITS SUBSIDIARIES

## **Chief Executive Officer's Statement**

for the year ended 31 December 2020

## **Trading environment**

As with many businesses across the country, the Covid-19 pandemic presented significant challenges to our operations. I am pleased to report that Fidelity Life Assurance adapted well to those challenges. In late March 2020, almost all of our staff moved to working from home, with no significant impact on our customer service delivery.

During this period, our investments in technology were able to provide flexible solutions to both internal operations and outward-facing new business activities. Under difficult circumstances we have delivered a resilient profit result for the year. However, the wider effects of Covid-19 on the world and local economies and investor confidence are likely to continue well into 2021. Zimbabwe's economy suffered a second year of economic decline as the COVID-19 pandemic disrupted economic activity for the better part of the year. The year was made up of two distinct halves, the first half was one that was characterized by a deteriorating currency and high and rising inflation. As the second half dawned and after a host of interventions by the Government, the economic field began to stabilize. Towards the end of the year inflation took a downward turn ending the year at 349% from a peak of 837% in July 2020.

## Group performance overview

## Fidelity Life Assurance - Zimbabwe (FLA, the Company)

Fidelity Life Assurance of Zimbabwe (the Company) is the largest subsidiary of the Group, contributing 51% (ZWL\$266.1 million) to Core revenue of the Group. Inflation adjusted Core revenue grew by 2% on the back of product modifications, reviews of premiums (and policy benefits), pushing sales of US\$ products and exploring new market segments. Inflation adjusted total revenue for the Company decreased by 45% from ZWL\$1,399.3 million in 2019 to ZWL\$772.3 million recorded in the current period. A decrease in investment income of 89% from ZWL\$1,203.7 million to ZWL\$134.9 million in 2000 resulted in the decline in the total revenue of the Company. Total expenses decreased by 44% from ZWL\$1,334.6 million in 2019 to ZWL\$7749.0 million in current year. The decrease in expenses was mostly driven by the reduction of the Southview water works project development costs by 82% from ZWL\$448.9 million to ZWL\$79.7million in the current year as the project is nearing completion. Changes in insurance liabilities increased by 25% from ZWL\$379.9 million in 2019 to ZWL\$473.8 million as a result of two things; transfers arising from conclusion of the Asset Separation Exercise and aligning with IPEC Guidelines on policy adjustments following the currency reforms of 2019.

The Company recorded inflation adjusted profit before tax of ZWL\$23.4 million compared to profit before tax of ZWL\$64.6 million in 2019.

## Vanguard Life Assurance Company (VLA) – Malawi

VLA continues to complement the Group's total core revenue, with a 43% contribution (ZWL\$220.9) to core revenue in the current year. VLA recorded total revenue of ZWL\$292.2 million in 2020 compared to ZWL\$323.9 million in 2019. The biggest driver to VLA's total revenue was investment income which grew by 88% in 2020 .VLA posted a profit before tax of ZWL\$19.1 million compared to profit before tax of ZWL\$33.2 million in 2019, this was due to an increase in total expenses which grew by 19% from prior year, driven by the changes in actuarial liabilities which account for 43% of the total expenses of the subsidiary. This subsidiary is a foreign asset and therefore a good hedge against the negative impact of the fluctuating currency in Zimbabwe.

## Fidelity Life Financial Services (FLFS)

FLFS was mostly affected by the impact of COVID 19 lockdowns which resulted in a decrease in loan disbursements during the year. Due to the nature of its product, a monetary asset, FLFS was largely impacted by the hyperinflationary environment. This resulted in a significant decline in core revenue of 60% from ZWL\$103.6 million in 2019 to ZWL\$41.1 million in the current year. The subsidiary's existing loan book continued to grow organically which was aided by improved interest rates that were in line with inflation. The subsidiary closed the year with a loss before tax of ZWL\$30.3 million, an improvement from a loss before tax of ZWL\$108.6 million posted in 2019.

Cost management initiatives to contain the financial impact of Covid-19.

• Revenue protection achieved through careful selection of markets in order to target the right color of money.

## To improve quality of customer service and ensure remote accessibility;

• Accelerating our Digitalisation journey in order to exploit the benefits of end to end automation of the value chain. This will also involve implementation of a full-fledged Contact Centre to give us a single view of the customer while creating endless possibilities for the customers to engage with FLA across its bouquet of financial solutions, from anywhere and at any time.

• Adapting the business to be future fit includes evolving our systems of work, adjusting our current processes and enriching bandwidth of our digitally savvy skills to support innovation in the new space.

### Country diversification;

· Continued pursuit of the regionalisation thrust to de-risk from Zimbabwe's economic challenges.

## Our clients are at the heart of all that we do;

During these challenging but evolving times, our customers' immediate and future financial wellbeing is at the heart of our operations. Further, it is important that we are able to respond to changing customer needs and circumstances as influenced by the changing economic environment. To that end, we have deployed a number of customer solutions and Policyholder Protection initiatives.

### **Funeral Services during Covid-19**

In our Funeral Services Unit, we have trained and equipped our team to be able to fully service our customers during this pandemic. We strictly follow and adhere to the full set of guidelines relating to numbers who gather, social distancing, sanitization, mask wearing, and body-removal protocols. All our staff have been trained on what is expected of them when dealing with funerals during the Covid-19 pandemic to ensure the safety of our customers and their loved ones.

### Medical Aid - Covid-19 Cover

Whilst Covid-19 is categorized as a pandemic and not ordinarily applicable for cover under Medical Aid, in response to mounting requests from members for Covid-19 cover, Fidelity Life Medical Aid Services (FLIMAS) introduced cover against Covid-19 for its members. This cover was effective from 1 June 2020. Covid-19 cover is available after one has tested positive to a Polymerise Chain Reaction (PCR) test. Members are covered for medication, medical management including hospitalization and treatment of complications, as well as rehabilitation.

## Medi-Express Drug Delivery Service

FLIMAS also reintroduced the Medi-Express Drug delivery service. This is a service that allows customers to have their chronic medication delivered directly to their homes. The service is open to FLIMAS members only and members must register for the service first by simply sending a request to a FLIMAS WhatsApp number.

## **Enhanced Life and Funeral Assurance**

In line with an ever changing environment we continue to review our products to ensure that they remain appropriate and continue to add value to customers' lives. With increases in costs associated with providing good funeral services it has become necessary that we phase in price adjustments to enable us to continue providing services that meet the expectations of our clients. In addition to these changes in our ZWL product portfolio and in response to the ever changing economic environment we introduced US dollar denominated life and funeral assurance products in both our individual life and pensions segments.

### Bureau de change

In the last quarter of 2020 the group opened a Bureau De Change under the Financial Services subsidiary as part of our ongoing alternative revenue creation strategy. This will be an additional source of income for the group. While the Bureau De Change is currently operating in Harare only there are plans to roll this out to our other branches. Our clients will enjoy convenience of wholesome financial services of micro-lending, currency swap/change in a safe and secure trading environment, under one roof.

## **Money Transfer Services**

Our strategic thrust to diversify our income streams will be further supported by targeting such markets as the diaspora with the implementation of our money transfer agency. In the later part of 2020, Fidelity Life Financial services finalized an agreement to become an agent of Western Union, the roll out of the agency agreement will begin in earnest in 2021. This brings convenience to our customers in the diaspora and to our locally based customers as well.

## Mobile Funeral Cover in Malawi

In December 2020 Vanguard Life Assurance introduced mobile based funeral cover in partnership with one of the country's mobile network providers. This product allows customers to apply and get funeral cover using their mobile phone. The product, a first of its kind in Malawi, was launched in the later part of 2020. The platform is based on a simple USSD code that allows customer to follow a few simple steps and get Funeral Cover on any mobile phone at any time. This innovation is expected to add customer volumes to VLA and help reduce unit cost.

## Other non-insurance subsidiaries

The non-insurance subsidiaries (Actuarial Consulting Services, Asset Management and Funeral Services companies) continue to post fair profits. The entities remain important to the Group's strategic thrust as they provide services to internal and external customers. Growth from these entities will be unlocked further locally and in the regional market, in line with the Group's regional expansion strategy.

### Operations

## Customer service during Covid-19 Outbreak

The COVID-19 pandemic has brought to the fore the importance of technology in all our lives. Technology has become one of the most important tools for ensuring that we continue to service our valued customers despite lockdown restrictions.

The Impact of Covid-19 and the economic challenges in Zimbabwe has and will continue to create a dynamic and fluid operating future and as FLA, our ability to adapt to the evolving landscape is key to ensuring that the business remains future fit. The key strategic responses by the organisation during the period were as follows;

## To protect the value of our policyholder funds;

Asset Preservation through investing in hyperinflation resilient investment options.

### WhatsApp Chat Bot

In 2020 we introduced a WhatsApp Chat bot that allows customers to apply, update and pay for their funeral policies on WhatsApp. This convenient tool is easy to use and has easy to follow step by step instructions.

## Performance and values based culture

Our ambition is to drive a high-performance culture, putting technology at the heart of Fidelity Life while remaining true to our vision: of being a lifelong partner to a great financial legacy. It is our commitment to deliver value to all our stakeholders through responsive financial solutions, superior customer service and stable and consistent stakeholder returns.

Our people and their commitment are foundational to FLA's culture. During the year, we conducted several staff welfare interventions to ensure value is shared with our staff as well; this helps with staff buy-in and alignment to our strategic priorities. I am pleased to see a steady improvement in employee engagement and performance, which are important drivers of performance.

## 31 December 2020

## FIDELITY LIFE ASSURANCE OF ZIMBABWE LIMITED AND ITS SUBSIDIARIES

## **Outlook and Appreciation**

While the year ahead will be challenging, Fidelity Life is well positioned to achieve its set targets, through the continued development of innovative products and services combined with our technology drive and stability in operations.

I would like to thank the Board for their support and guidance throughout the year. My sincere appreciation also goes to the executive leadership team and our valuable staff for their focus on work that generates value. Finally to our customers, thank you for entrusting us with your business and for your unwavering support in 2020, we look forward to being of service to you in the future.

## Fidelity Funeral Services

**FIDELITY LIFE** 

**ASSURANCE OF ZIMBABWE** 

\*The historical cost information has been shown as supplementary information for the benefit of users. These are not required in terms of International Accounting Standard (IAS) 29 "Financial Reporting in Hyperinflationary Economies". The auditors have not expressed an opinion on the historical cost information.

## 1. DIRECTORS' RESPONSIBILITY STATEMENT

The directors are required by the Companies and Other Business Entities Act (Chapter 24:31) to maintain adequate accounting records and are responsible for the content and integrity of the condensed consolidated financial statements and related financial information included in this report. It is their responsibility to ensure that the condensed consolidated financial statements present fairly the Group's financial position as at the year end, and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards ("IFRS").

## 2. AUDITOR'S STATEMENT

The condensed audited inflation adjusted financial results should be read in conjunction with the complete set of financial statements for the year ended 31 December 2020, which have been audited by Ernst & Young Chartered Accountants (Zimbabwe). An adverse opinion has been issued thereon in respect of non-compliance with the requirements of International Accounting Standard 21 (IAS 21) "The Effects of Foreign Exchange Rates" as well as non-compliance with International Accounting Standard 8 (IAS8) "Accounting for Policy Changes in Accounting

Estimates and Errors". The auditors' report on the inflation adjusted consolidated financial statements is available for inspection at the Company's registered office. The engagement partner for the review is Mr David Gwande (PAAB Practising Number 0132).

## 3.1. Basis of preparation

The Group's financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ('IASB"), International Financial Reporting Committee Interpretations ("IFRIC") as issued by the International Financial Reporting Interpretations Committee ("IFRS IC") and in a manner required by the Zimbabwe Companies and other Business Entities Act (Chapter 24:31), except for non-compliance with IAS 21 'The effects of changes in foreign exchange rates' and IAS 8 'Accounting policies - Changes in accounting policies, estimates and errors" in 2019. The financial statements are based on statutory records that are maintained under the historical cost convention basis, except for revaluation of investment properties, land and buildings and financial assets at fair value through profit or loss and insurance and investment contract liabilities that have been measured on a fair value basis. The Group adopted IAS 29 "Financial

## FIDELITY LIFE ASSURANCE OF ZIMBABWE LIMITED AND ITS SUBSIDIARIES

Reporting in Hyperinflationary Economies" as proclaimed by the local accounting regulatory board, Public Accountants and Auditors Board "PAAB".

Historical financial statements have been presented as supplementary information.

The condensed consolidated financial statements do not include all the notes of the type normally included in an annual financial report. Accordingly, this report should be read in conjunction with the annual report of Fidelity Life Assurance of Zimbabwe Limited for the year ended 31 December 2020 and any public announcements made by Company during the period.

The accounting policies applied in preparing these condensed consolidated financial statements are consistent with those of the previous financial year.

### **3.2 Functional Currency**

The Group's condensed consolidated financial statements are expressed in the Zimbabwe dollars (ZWL\$) which is the functional currency of the Group, and the presentation currency for the consolidated financial statements.

Exchange gains and losses on translation of the results and financial positions of the Group's foreign operations continue to be recognised in other comprehensive income.

**3.3 Application of IAS 29 (Financial reporting in hyperinflationary Economies)** These financial results have been prepared in accordance with IAS 29 which requires that the

financial statements of any entity whose functional currency is the currency of a hyperinflationary economy be stated in terms of the measuring unit current at the reporting date and that corresponding figures for the previous period also be restated in terms of the same measuring unit.

The restatement has been calculated by means of conversion factors derived from the Consumer Price Index (CPI) reported on the Reserve Bank of Zimbabwe website. The indices and adjustment factors used to restate the financial statements at 31 December 2020 are as given below:

Index		<b>Conversion factor</b>
CPI as at 31 December 2018	88.81	27.863
CPI as at 31 December 2019	551.63	4.4858
CPI as at 31December 2020	2474.51	1.0000

The financial statements of the subsidiary in Malawi which does not report in the currencies of hyper-inflationary economies were dealt with in accordance with IAS 21. The items included in statement of profit or loss and comprehensive income were translated using average exchange rates and statement of financial position items were translated at the closing rates.

5. INVESTMENT PROPERTY	INFLATION	ADJUSTED	HISTORICAL COST		
	2020 ZWL\$	2019 ZWL\$	2020 ZWL\$	2019 ZWL\$

operations	14,489,090	124,329,183	174,262,928	40,058,196	
Fair value gains - properties held for					
investment contracts	22,120,255	21,766,610	139,104,749	34,163,383	
Fair value gains through profit or loss	184,655,351	1,589,378,187	2,196,991,290	527,920,940	
Balance at the end of the year	3,117,751,896	2,969,606,711	3,117,751,896	661,999,241	

The Group 's fair values of investment properties are based on property valuations performed by an independent professional property valuer. Gains and losses arising from a change in fair value of investment properties are recognised in the profit or loss statement.

The key assumptions in coming up with fair values are future rental income, anticipated maintenance costs, future development costs and the appropriate discount rate. Owing to the hyperinflationary environment, there were two rent reviews systems that are being used on the market, some rentals were pegged in US\$ with either the official rate or the parallel rate being applied to establish the ZWL\$ rentals or three month-based rentals in ZWL\$. This has created some market distortions, the US\$ pegged rentals tend to keep up with the exchange rate movement whilst the un-pegged rentals have fallen behind by far.

There were no transfers between Levels 1 or 2 to Level 3 during the year. Investment properties are at Level 3.Significant judgements and assumptions were applied for the Group's Investment property portfolio.

Land banks and residential properties were valued in US\$ using the comparison method and/or market evidence and an interbank exchange rate was applied converting the US\$ values to ZWL\$ for financial reporting purposes.

## FIDELITY LIFE ASSURANCE OF ZIMBABWE LIMITED AND ITS SUBSIDIARIES

## Notes to the condensed consolidated financial statements (Cont'd) for the year ended 31 December 2020 INFLATION ADJUSTED HISTORICAL COST

		ADJUSTED	HISTORICAL	.0031
7. TRADE AND OTHER RECEIVABLES	31-Dec-20 ZWL\$	31-Dec-19 ZWL\$	31-Dec-20 ZWL\$	31-Dec-19 ZWL\$
Residential stand sales debtors	2,519,767	75,764,282	2,519,767	16,889,744
Micro-finance loans receivable	24,139,563	56,519,916	24,139,563	12,599,696
Insurance debtors	178,796,841	108,973,508	178,796,841	24,292,907
Other trade debtors	3,704,723	2,243,635	3,704,723	518,932
Trade receivables - gross	209,160,894	243,501,341	209,160,894	54,301,279
Less : expected credit loss on trade				
receivables	(13,176,561)	(24,068,488)	(13,176,561)	(5,365,464)
Trade receivables - net	195,984,334	219,432,853	195,984,334	48,935,815
Receivables from related parties, net of ECL	3,978,061	4,167,709	3,978,061	929,087
Loans to employees, net of ECL	23,451	362,472	23,450	80,803
Total receivables classified as financial				
assets at amortised cost	199,985,846	223,963,034	199,985,846	49,945,705
Prepayments	78,013,081	12,598,006	76,911,559	2,181,943
Other receivables, net of ECL	16,120,341	52,012,192	16,120,341	11,576,042
Total trade and other receivables	294,119,268	288,573,231	293,017,745	63,703,690
Non-current portion	18,517,632	83,066,688	18,517,632	18,517,632
Current portion	275,601,636	205,506,543	274,500,113	45,186,058
Total trade and other receivables	294,119,268	288,573,231	293,017,745	63,703,690

The carrying value of trade and other receivables classified as financial assets at amortised cost approximates their fair value.

There was a significant decline in residential stand sales debtors in the current period as most of the debtors settled their accounts and no new debtors were recognised as the Southview development project has reached its tail end.

Included in other receivables balance are debtors arising from non core business activities such as rental debtors and debtors arising from disposal of non core assets from the Southview development project.

The total impairment allowance is made up of the following: Expected credit loss on trade receivables Expected credit loss on loans to employees Expected credit loss on other receivables Expected credit loss on related party receivables	31-Dec-20 ZWL\$ 13,176,561 - 47,614	<b>31-Dec-19</b> <b>ZWL\$</b> 24,068,488 480,615 213,588 2,895,984	31-Dec-20 ZWL\$ 13,176,561 47,614	<b>31-Dec-19</b> <b>ZWL\$</b> 5,365,464 107,141 47,614 645,589

## 8. EQUITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

Listed equities are the only financial instruments held by the Group that are measured at fair value. These are shown

Restricted cash refers to a fixed deposit kept by First Capital Bank Zimbabwe as security for a loan received from First Capital Bank Malawi. The lien over the cash deposit runs for the tenure of the loan, which is expiring on 30 November 2021, as disclosed in Note 11.

## 10. INSURANCE AND INVESTMENT CONTRACT LIABILITIES

## Prior period regulatory and currency reforms adjustments

Fidelity Life Assurance of Zimbabwe conducted an asset separation between policyholders and shareholders to ensure compliance with the requirements of the Insurance Act (Chapter 24:07) and the Pension and Provident funds Act (Chapter 24:09). The results of the exercise as per the Company's calculations disclosed a 94:6 split between policyholders and shareholders respectively, previously the Company was appying the 90:10 split. The results were approved by the Insurance and Pensions Commission (IPEC).

## Asset separation

Fidelity Life Assurance of Zimbabwe maintained its assets and liabilities on a combined basis operating a pooled fund. Profits of the company were therefore shared between policyholders and shareholders in accordance with the provisions of the Company's articles of association.

In addition to having a shareholder fund, Fidelity Life Assurance of Zimbabwe had to separate and maintain distinct asset portfolios (Funds) at least for the three broad categories of insurance funds that it operates which includes investment contracts, insurance contracts with profit and insurance contracts without profits.

This necessitated a project to establish a basis on which to achieve such separation and administer the funds separately in compliance with the Insurance Act (Chapter 24:7) and the Pension and Provident funds Act (Chapter 24:09).

In addition to the IPEC approved 94:6 split of assets for policyholders and shareholders, Fidelity Life Assurance of Zimbabwe was also required to address the requirements of the Guideline for the Insurance and Pensions Industry on adjusting Insurance and Pension values in response to currency reforms issued in terms of Section 3 (1) (a) of Statutory Instrument 69 of 2020.

Following the approval of Fidelity Life Assurance of Zimbabwe proposed Asset Separation report by IPEC, the company has implemented the notional 94:6 split between Shareholders and Policyholders. Consequently, the actuarial liability has been restated in line with the results of the asset split and the 2019 currency reforms.

This prior period regulatory and currency reforms adjustments has been accounted for retrospectively, and the comparative information for 2019 has been restated. The effect of the change is a decrease of ZWL\$72,887,035 in profit and an increase in the gross change in insurance and investmet contract liabilities by the same amount for the year ended 31 December 2019. Furthermore, opening retained earnings for 2019 have been increased by ZWL\$13,871,260 and Insurance and Investment contract liabilities have been increased by ZWL\$124,963,410 which is the amount of the adjustment relating to periods before 2019. The restatement is in the note below

## Prior period error

The Subsidiary in Malawi restated the deferred acquisition costs asset, operating expenses and insurance liabilities in the financial statements to reflect the change in treatment of deferred acquisition cost in terms of calculating insurance liabilities and data omitted in the 2019 valuation exercise. Previously the insurance liabilities were calculated using net premium value method which does not consider future expenses. The Fidelity Life Assurance Group changed the treatment to calculating the insurance liabilities using gross premium value method which consider future expenses discounted at the present value in 2016 and the Subsidiary in Malawi had not implimented for this change to ensure consistency in the presentation of the group's financial statements, The Subsidiary in Malawi is correcting for this in the current period. The effect of the change is a decrease in gross chaange in insurance and investment contract liabilities by ZWL\$11,084,067 and an increase in profit for the year ended 31 December 2019 by the same amount. The restatement is shown in the note below.

## FBC Bank Limited, Infrastructure Development Bank of Zimbabwe, Standard Chartered Bank of Zimbabwe Limited and Agribank Limited

The Group assumed CFI Holdings Limited's loans, issued by these banks amounting to USD\$16 million, when it acquired Langford Estates (1962) (Private) Limited through a land-for-debt swap arrangement in 2015. The borrowings accrued interest at 10% per annum and had a tenor of 7 years ending 30 June 2022. The loan facility was fully settled during the year.

For the long-term borrowings, their fair values are not materially different to carrying amounts as the interest rates on these borrowings approximate market rates.

## NMB Bank Limited

The loan with NMB Bank was acquired to enable settlement of Redeemable Bonds that were settled in 2018. The NMB loan accrues interest at 10% per annum and has fixed monthly repayments to 31 January 2023. The facility is secured through a first mortgage bond over property valued at ZWL\$195 million and cession of residential stand sales receivables worth ZWL\$12 million.

## First Capital Bank Malawi

The loan with FCB Malawi was used to refinance Vanguard Life Assurance through a rights issue. The loan is denominated in Malawi Kwacha and accrued interest at 23% per annum. The interest rate was revised to 18.9% as at 31 December 2020 and is subject to variation at the bank's discretion as influenced by bank rates advised by the Reserve Bank of Malawi from time to time. The facility is repayable in equal monthly instalments to 30 November 2021. The terms of the loan require security of 110% of the facility amount to be kept in deposit with First Capital Bank Zimbabwe for the duration of the facility, which would amount to US\$377,750.

For the long-term borrowings, their fair values are not materially different to carrying amounts as the interest rates on these borrowings approximate market rates.

31-Dec-19

## **ZB bank Limited**

12.

The overdraft facility with ZB was acquired as a line-of-credit for the micro-finance business to increase the unit's lending capacity. The loan accrues interest at 49% per annum on a one year tenure. The loan is availlable for one year, expiring on 28 February 2021.

## Ecobank Zimbabwe Limited

The micro-finance business acquired a ZWL\$7.9 million loan facility with Ecobank Zimbabwe Limited to increase its lending capacity. The facility amount is drawn down in tranches in line with the business' needs. Drawdowns on the facility accrue interest at varying interest rates depending on the prevailing interest rate on each drawdown date. Currently, ZWL\$7,969,604 of the outstanding amount accrues interest at 45% per annum. The facility is available for one year, expiring on 31 July 2021.

## INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FIDELITY LIFE ASSURANCE OF ZIMBABWE LIMITED

## Report on the audit of the inflation adjusted consolidated and separate financial statements

## Adverse Opinion

We have audited the inflation adjusted consolidated and separate financial statements of Fidelity Life Assurance of Zimbabwe Limited, as set out on pages 32 to 100, which comprise the inflation adjusted consolidated and separate statements of financial position as at 31 December 2020, and the inflation adjusted consolidated and separate statements of profit or loss and other comprehensive income, the inflation adjusted consolidated and separate statements of cash flows for the year then ended, and notes to the inflation adjusted consolidated and separate financial statements, including a summary of significant accounting policies and other explanatory notes.

In our opinion, because of the significance of the matters discussed in the Basis for Adverse Opinion section of our report, the accompanying inflation adjusted consolidated and separate financial statements do not present fairly, the inflation adjusted financial position of the Group and the Company as at 31 December 2020, and their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) and the Companies and Other Business Entities Act (Chapter 24:31).

## Basis for Adverse Opinion

# Non-compliance with International Financial Reporting Standards (IFRS): International Accounting Standard (IAS) 21- The Effects of Changes in Foreign Exchange Rates in prior period and inappropriate application of IAS 8- Accounting Policies, Changes in Accounting Estimates and Errors

As explained in note 2.2 to the inflation adjusted consolidated and separate financial statements, the Company and the Group changed its functional and reporting currency from United States Dollars (US\$) to Real Time Gross Settlement Dollars (RTGS\$) on 22 February 2019 in compliance with Statutory Instrument 33 of 2019.

We issued an adverse opinion for the year ended 31 December 2019 as we believed that the change occurred on 1 October 2018 in terms of IAS21 given the significant monetary and exchange control policy changes witnessed in Zimbabwe from 2016 through to 2019. Management prospectively applied the change in functional currency from US\$ to RTGS\$ from 23 February 2019. The correct approach would have been a retrospective restatement as a prior period error in terms of IAS 8 – *Accounting Polices, Changes in Accounting Estimates and Errors.* All the comparative numbers and opening balances are therefore materially misstated.

Management has not restated the opening balances to resolve this matter which resulted in the adverse audit opinion in the prior period in accordance with *IAS 8*. As a result, the closing balances for the following accounts as stated on the inflation adjusted Statements of Financial Position remain misstated:

Basis for Adverse Opinion (continued)

Non-compliance with International Financial Reporting Standards (IFRS): International Accounting Standard (IAS) 21- The Effects of Changes in Foreign Exchange Rates in prior period and inappropriate application of IAS 8- Accounting Policies, Changes in Accounting Estimates and Errors –(Continued)

## Group

- ZWL27 925 791 of Property and equipment included in ZWL 382 062 711 (2019: ZWL 357 791 418);
- ZWL 22 165 551 of Intangible assets included in ZWL59 538 428 (2019: ZWL 29 850 795);
- ZWL 60 113 163 of Inventories included in ZWL60 345 478 (2019: ZWL 61 222 765);
- ZWL 81 710 958 of Trade and other receivables included in ZWL294 119 268 (2019: ZWL 288 573 231);
- Retained earnings of ZWL171 266 095 (2019: ZWL153 023 477);
- Deferred tax liabilities of ZWL46 401 753 (2019: ZWL40 848 346);
- Foreign Currency Translation Reserve of ZWL32 921 132 (2019: ZWL19 385 491).

## Company

- ZWL 166 925 445 of Property and equipment included in ZWL298 192 091
- (2019: ZWL279 210 943);
- Investment in Subsidiaries of ZWL1 812 735 089 (2019: ZWL1 683 883 988);
- Inventories of ZWL60 113 163 (2019: ZWL60 907 000);
- Retained Earnings ZWL 157 823 814 (2019: 136 995 444).

## Exchange rates used in the current year

In the current year, the Group translated foreign denominated transactions and balances to RTGS\$/ZWL using the interbank exchange rates for the period 1 January 2020 to 23 June 2020, prior to introduction of the Foreign Exchange Auction Trading System. This includes the period between March and June 2020 when the exchange rate was fixed at US\$1: RTGS\$/ZWL25. As in the prior year, we concluded that the interbank exchange rates did not meet the definition of spot exchange rates as per IAS 21, as they were not available for immediate delivery.

The following elements were impacted on the inflation adjusted consolidated and separate statements of profit or loss and other comprehensive income and statements of financial position:

## Group

- Project development expenses stated at ZWL79 747 386 of which the total amount in the current year consists of transactions denominated in US\$ which were translated at exchange rates obtained from the interbank market.
- Exchange gains (losses) stated ZWL10 677 998, of the total amount in the current year consists of transactions denominated in US\$ which were translated at exchange rates obtained from the interbank market.
- Retained earnings and non-controlling interests.

Basis for Adverse Opinion (continued)

## Exchange rates used in the current year (Continued)

## Company

- Project development expenses stated at ZWL79 747 386 of which the total amount in the current year consists of transactions denominated in US\$ which were translated at exchange rates obtained from the interbank market.
- Exchange gains (losses) stated at ZWL\$10 617 795 in the current year consists of transactions denominated in US\$ which were translated at exchange rates obtained from the interbank market
- Retained earnings.

The impact can however not be quantified due to the lack of records on appropriate exchange rates for the period and impracticability given the volume of transactions involved. Our prior year audit opinion was also modified in respect of this matter.

## Valuation of Investment Properties and Land & Buildings (Group and Company)

The investment properties and land & buildings (included in property and equipment) were valued using US\$ denominated inputs and converted to ZWL at the closing auction exchange rate. We believe that applying a conversion rate to a US\$ valuation to calculate ZWL fair values may not be an accurate reflection of market dynamics, as risks associated with currency trading do not always reflect the risks associated with property trading. The following elements were impacted on the inflation adjusted consolidated and separate statements of profit or loss and other comprehensive income and statements of financial position:

## Group

- Group Investment Properties ZWL3 117 751 896 (2019: ZWL 2 969 606 711);
- Land and buildings ZWL 278 052 000 (2019: ZWL 259 932 714);
- Fair value gains and losses from investment property ZWL 184 655 351 (2019: ZWL 1 589 378 187);
- Gross gains on property revaluation ZWL 45 007 981 (2019: ZWL 156 244 237).

## Company

- Investment Properties ZWL 840 623 603 (2019: ZWL 877 573 888);
- Land and buildings ZWL 278 052 000 (2019: ZWL 259 932 714);
- Fair value gains and losses from investment property ZWL 20 310 748 (2019: ZWL 312 564 873);
- Gross gains on property revaluation ZWL 39 089 931 (2019: ZWL 128 672 928).

Consequently, property values may be materially misstated, and we are unable to determine what adjustments may be necessary to correctly account for these amounts. Our prior year audit opinion was also modified in respect of this matter.

## Investment in Subsidiaries - Equity Accounted Amounts tainted owing to incorrect opening balances and use of incorrect exchange rates and incorrect application of hyperinflationary accounting (Company only)

## Local subsidiaries

The Company has 5 local subsidiaries whose functional currency is the ZWL. The company equity accounts for the results of these investments in line with the Company accounting policies and relevant IFRSs. The statutory financial statements of the local subsidiaries are impacted by non-compliance with IAS21, valuation of investment properties and consequential impact on IAS29 application as described elsewhere in this report. Due to these matters, the equity accounted amounts are not reliable as underlying amounts are tainted by the issues noted above. The impact can however not be quantified.

Basis for Adverse Opinion (continued)

## Investment in Subsidiaries - Equity Accounted Amounts tainted owing to incorrect opening balances and use of incorrect exchange rates and incorrect application of hyperinflationary accounting (Company only) – (Continued)

## Foreign subsidiary

The Company has an investment in one foreign subsidiary whose functional currency is Malawi Kwacha (MKW). The company equity accounts for the results of such investments in line with the Company accounting policies and relevant IFRSs. In the current year, the Company translated the foreign denominated share of profit attributable to its foreign subsidiary to ZWL using the interbank exchange rates for the period 1 January 2020 to 23 June 2020, prior to introduction of the Foreign Exchange Auction Trading System. As described above, these exchange rates were not in line with IAS21 requirements.

## Consolidation of a Foreign Subsidiary with incorrect exchange rates (Group only)

Further to the issue noted above in respect of spot exchange rates, management have also used the interbank exchange rate as outlined on Note 3 to translate the foreign subsidiary to group reporting currency on consolidation. The impact is a misstatement of the following amounts in the inflation adjusted consolidated financial statements:

- ZWL12,022,301 included in Gross Premiums of ZWL406 279 394;
- ZWL10,099,271 included in Gross change in insurance and investment contract liabilities of ZWL586 627 204;
- ZWL 21 979 978 included in Foreign Currency translation reserves of ZWL 22 362 430 and;
- Retained earnings and Non-Controlling Interests.

The prior period balances would similarly have been affected in a material manner.

## Application of IAS29 - Financial Reporting in Hyperinflationary Economies (Group and company)

Furthermore, notwithstanding that IAS 29 has been applied correctly, it is noted that its application was based on prior and current periods' financial information which was not in compliance with IAS 21 / IAS 8 as described above. Had the correct base numbers been used, the amounts discussed on matters above would have been materially impacted. Consequently, the monetary losses of ZWL 34 259 226 (2019: ZWL 309 880 861) in the group and monetary gains of ZWL 233 736 (2019: loss of ZWL 127 685 389) in the company on the inflation adjusted consolidated and separate Statements of profit or loss and other comprehensive income are impacted.

## **Overall Consequential Impacts**

As no restatements have been recorded in current year per IAS 8 to correct the above matters, our audit opinion on the inflation adjusted consolidated and separate financial statements for the year ended 31 December 2020 is further modified for the following reasons:

• All corresponding numbers remain misstated on the inflation adjusted consolidated and separate Statements of Financial Position, Statements of Cash Flows, Statements of Profit or Loss and Other Comprehensive Income and Statements of Changes in Equity; this also impacts comparability of the current period's figures,

Basis for Adverse Opinion (continued)

## Overall Consequential Impacts-(Continued)

• As opening balances enter into the determination of cash flows and performance, our audit opinion is modified in respect of the impact of these matters on the inflation adjusted consolidated and separate Statements of Cash Flows, Statements of Profit or Loss and Other Comprehensive Income and Statements of Changes in Equity.

## Prior period regulatory adjustments

As detailed in note 14 to the inflation adjusted consolidated and separate financial statements, the Company conducted an asset separation exercise to determine the applicable split ratio between policyholders and shareholders' funds in line with the requirements of the Insurance Act (Chapter 24:07) and the Pension and Provident Funds Act (Chapter 24:09). The outcome of the exercise was a split ratio of 94:6 between policyholders and shareholders respectively compared to the previous ratio applied of 90:10. The proposals were approved by the Insurance and Pensions Commission (IPEC) on 10 February 2021. Management have accounted for these adjustments retrospectively, and the comparative information for 2019 has been restated accordingly. The restatements do not however, meet the definition of an error in terms of IAS 8.

Rather, the appropriate consideration, would have been treating the matter as an adjusting subsequent event in line with the provisions of IAS 10- *Events after the Reporting Period*. This would have required that the related adjustments be accounted for in the current financial period in both the Company and Group's financial statements.

Had management made these adjustments prospectively, the 2019 retained earnings and revaluation reserves would be understated by ZWL 20 584 682 and ZWL31 491 899 respectively and the 2019 insurance contract liabilities and investment contract liabilities with discretionary participation features would be overstated by ZWL52 076 582. Consequently, current year financial performance is impacted.

The effects of the above departures from IFRS are material and pervasive to the inflation adjusted consolidated and separate financial statements.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the inflation adjusted consolidated and separate financial statements* section of our report. We are independent of the Group and Company in accordance with the International Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Zimbabwe, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our adverse opinion.

## Key Audit Matters

Except for the matters described in the Basis for Adverse Opinion section, we have determined that there are no other key audit matters to communicate in our report.

## Other Information

The directors are responsible for the other information. The other information obtained at the date of this report comprises the Chairman's Statement, the Directors responsibility statement, the certificate of solvency, the Chief Executive Officer's statement and historical cost financial information but does not include the inflation adjusted consolidated and separate financial statements and our auditor's report thereon. Our opinion on the inflation adjusted consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon. The Sustainability report is expected to be made available to us after the date of this auditor's report. Our opinion on the inflation adjusted consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon. The Sustainability report is expected to be made available to us after the date of this auditor's report. Our opinion on the inflation adjusted consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the inflation adjusted consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the inflation adjusted consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact. As described in the Basis for Adverse Opinion section above, the Company and Group did not comply with the requirements of IAS 8, IAS 10 and IAS 21 and applied a conversion rate to US\$ valuations of investment properties and land & buildings (under property & equipment) to calculate ZWL fair values which may not be an accurate reflection of market dynamics. Consequently, inflation adjustments per IAS 29 were applied to the incorrect base.

We have concluded that the other information is materially misstated for the same reason with respect to the amounts or other items included therein and affected by the failure to comply with the referred standards.

## Responsibilities of the Directors for the inflation adjusted Consolidated and Separate Financial Statements

The directors are responsible for the preparation and fair presentation of the inflation adjusted consolidated and separate financial statements in accordance with IFRS and the requirements of the Companies and Other Business Entities Act (Chapter 24:31), and for such internal controls as the directors determine is necessary to enable the preparation of inflation adjusted consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the inflation adjusted consolidated and separate financial statements, the directors are responsible for assessing the Company and Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the inflation adjusted Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the inflation adjusted consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these inflation adjusted consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the inflation adjusted consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group and company's internal controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting
  and based on the audit evidence obtained, whether a material uncertainty exists related to
  events or conditions that may cast significant doubt on the group and company's ability to
  continue as a going concern. If we conclude that a material uncertainty exists, we are required

to draw attention in our auditor's report to the related disclosures in the inflation adjusted consolidated and separate financial statements or, if such disclosures are inadequate, to

- modify our opinion. Our conclusions are based on the audit evidence obtained up to the date
  of our auditor's report. However, future events or conditions may cause the group and/or the
  company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the inflation adjusted consolidated and separate financial statements, including the disclosures, and whether the inflation adjusted consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial statements of the entities
  or business activities within the group to express an opinion on the inflation adjusted
  consolidated and separate financial statements. We are responsible for the direction,
  supervision and performance of the group audit. We remain solely responsible for our audit
  opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the inflation adjusted consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Mr David Gwande (PAAB Practicing Certificate Number 132).
