Audited Financial Results for the year ended 31 December 2020

CHAIRMAN'S STATEMENT

Operating environment:

The operating environment remained beset with significant headwinds in the year 2020, with the outbreak of the COVID-19 pandemic taking centre stage, exacerbating an already fragile domestic economy. Like most other economies globally, Zimbabwe endured varying levels of lockdown restrictions during the year as part of measures instituted to limit the spread of the COVID-19 virus. This adversely affected business activities across the board.

The introduction of the foreign exchange auction system in June 2020 brought a modicum of stability in the exchange rate, which curtailed the, hitherto, rapid expansion in the general price level. This saw annual inflation rate dropping from a peak of 837.53% in July 2020 to 348.59% in December 2020. According to the Confederation of Zimbabwe Industries, industry capacity utilisation is reported to have improved at 47% as at year end, compared to 36.4% in 2019.

Group Performance:

I am pleased to announce that despite challenges in the macroeconomic environment, the ZB Financial Holdings Limited (ZBFH) Group remained profitable, greater detail is posted in the Acting Group Chief Executive's report.

Capital Requirements:

As at 31 December 2020, all ZBFH companies were in compliance with prescribed minimum capital requirements.

The Group is confident that it will meet the new minimum capital requirements for banking operations, which come into effect from 31 December 2021. This will be achieved by the re-arrangement of capital resources and the planned merger of banking operations within the Group.

Dividends:

The Board has declared a dividend of ZW74.13 cents per share for the year ended 31 December 2020. A detailed dividend announcement will be published after the Annual General Meeting.

Legal Contingencies:

The long-standing legal dispute between the Company and Transnational Holdings Limited (THL) regarding the ownership of Intermarket Holdings Limited (IHL) was resolved by the withdrawal of THL's appeal at the Supreme Court of Zimbabwe on 2 October 2020. This followed a settlement arrangement in which the Government of Zimbabwe (GoZ) ceded its shareholding in the Company to THL in transactions concluded between 2017 and

Compliance & Regulatory Issues:

The Group has dealt with all governance issues which were the subject of a Corrective Order issued by the Reserve Bank of Zimbabwe (RBZ) on 7 March 2017 and reviewed in March 2018 and awaits the lifting of the order upon satisfactory review by the regulator.

Directorate:

Messrs Sydney Bvurere and Olatunde Akerele resigned from the Board on 3 May 2021 and Ronald Mutandagayi resigned as Group Chief Executive from the Board and the Company on 31 May 2021.

On behalf of the Board, I would like to express our gratitude for their diligent services to the Group and wish them success in their future endeavours.

Mr Fanuel Kapanje was appointed to act as Group Chief Executive pending recruitment of a substantive Group

Outlook:

The Zimbabwean economy is projected to rebound in 2021 and beyond, following contraction in 2019 and 2020. The positive outlook is predicated on an above-average 2020/21 farming season, a tight monetary policy complemented by fiscal discipline, stability in the exchange rate and expected further slow-down in inflation.

The Group will proceed with cautious optimism in the short to medium term. It remains imperative for the Group to continuously seek ways to preserve its capital from value erosion occasioned by inflation. Furthermore, the 'new normal' brought about by the COVID-19 pandemic has placed increased importance on the need to build digital capacities for customer service delivery in a sustainable and cost-effective manner.

Conclusion:

I wish to express my appreciation to all our valued Customers and Stakeholders, for the support and commitment to the ZBFH Group. I am grateful to fellow Directors, Management and Staff, for their hard work and contributions for the year ended 31 December 2020.

Pamela Chiromo

Chairman 30 June 2021

ACTING GROUP CHIEF EXECUTIVE'S REPORT

Introduction:

The Group's primary financial statements are adjusted for inflation in terms of International Accounting Standards (IAS 29) – Financial Reporting in Hyperinflationary Economies.

Historical cost financial statements have been issued for information purposes only.

In 2020, the Group recorded a 9% decline in total income from ZW\$3.656bn in 2019 to ZW\$3.323bn. The revenue performance was mainly underpinned by an 87% decrease in fair value adjustments, from ZW\$1.032bn in 2019 to ZW\$0.136bn in 2020. Banking commissions and fees also fell in real terms by 8%, from ZW\$1.242bn in 2019 to ZW\$1.142bn in 2020, as inflation continued to outpace rate adjustments for commissions and fees.

Net interest income increased by 0.34%, from ZW\$0.657bn in 2019 to ZW\$0.660bn in 2020.

Loan impairment charges to the income statement decreased from ZW\$0.339bn in 2019 to ZW\$0.282bn in 2020. Overall credit quality continued to improve, with non-performing loans as a percentage of total loans reducing from 2% in 2019 to 0.7% in 2020.

Net insurance related earnings declined from ZW\$0.4bn in 2019 to a loss of ZW\$0.002bn in 2020. This was influenced by a 58% increase in insurance related expenses which grew faster than the growth in gross premiums. Gross premiums increased by 2% from ZW\$1.128bn in 2019 to ZW\$1.148bn in 2020, whilst the related expenses increased from ZW\$0.728bn in 2019 to ZW\$1.149bn in 2020.

Other income increased by 152%, from ZW\$0.663bn in 2019 to ZW\$1.669bn in 2020, mainly underpinned by exchange gains.

The subdued revenue performance in 2020 was mainly due to the combined effects of low-cost absorption as performance of most economic sectors receded. This was compounded by the freeze on banking fees by the authorities which was necessary to ameliorate the effects of COVID-19 on industry and the general public.

Operating costs increased by 25% from ZW\$2.222bn in 2019 to ZW\$2.789bn in 2020, largely influenced by a catch-up adjustment on the cost base in tandem with the inflation profile over the past 2 years.

The cost to income ratio rose from 61% in 2019 to 84% in 2020. The sustainability of the cost base against contracting income levels in real terms continues to be a matter of continued strategic importance for the

Profit from ordinary activities declined by 63% from ZW\$1.433bn in 2019 to ZW\$0.534bn in 2020.

An increased transfer to the life fund of ZW\$0.599bn, compared to ZW\$0.093bn in 2019 was made on the back of strong performance of the underlying assets.

The Group earned ZW\$1.405bn as its share of profits reported by its associate companies for 2020, compared to ZW\$1.091bn in 2019. The share of profits from associates is largely driven by the revaluation of investment properties which constitute the bulk of the assets at a significant listed investee entity.

The Group posted a net profit after taxation of ZW\$1.065bn in 2020, representing a 45% decline from the ZW\$1.939bn attained in 2019.

Meanwhile, the Group's total assets increased by 21% in real terms, from ZW\$15.636bn as at 31 December 2019 to ZW\$18.977bn as at 31 December 2020.

Deposits and other related funding account balances grew by 15%, from ZW\$6.155bn as at 31 December 2019 to ZW\$7.108bn as at 31 December 2020.

Earning assets increased by 25% from ZW\$7.982bn as at 31 December 2019 to ZW\$10bn as at 31 December 2020 whilst constituting 53% of total assets (51% as at 31 December 2019).

The Group maintained a comfortable liquidity margin of safety, with the ratio of liquid assets to customer deposits being above 79% throughout the year against a prescribed ratio of 30%

The Group's total equity increased by 22%, from ZW\$6.575bn as at 31 December 2019 to ZW\$8.038bn as at 31 December 2020, driven by the positive performance for the year as well as gains on the revaluation of properties and equipment.

Operations Review:

Banking Operations:

ZB Bank Limited posted a profit of ZW\$0.633bn in 2020, as compared to ZW\$0.819bn in 2019. The reduction in profitability was mainly as a result of an increase in operating expenses from ZW\$1.632bn in 2019 to ZW\$2.284bn in 2020

The Bank's total assets stood at ZW\$12.434bn as at 31 December 2020, from ZW\$10.244bn as at 31 December

ZB Building Society posted a loss of ZW\$0.055bn for the year ended 31 December 2020, reducing from a profit of ZW\$0.285bn in 2019. Its assets increased from ZW\$1.043bn as at 31 December 2019 to close the year 2020 at ZW\$1.119bn.

A review of the branch network was done in 2020 resulting in the merger of branches in Harare and Bulawayo into modernised facilities with improved ambience which also offer safe online self-help facilities.

During the year, the Group expanded its product portfolio by launching VISA and Kesto Diaspora Banking.

Insurance Operations:

ZB Reinsurance posted a profit of ZW\$0.086bn in 2020 compared to ZW\$0.113bn in 2019. Its total assets increased in real terms from ZW\$0.678bn as at 31 December 2019 to close the year 2020 at ZW\$0.839bn.

The company has maintained good relations with its cedants and retrocession partners.

ZB Life Assurance posted a profit of ZW\$0.135bn in 2020, compared to ZW\$0.650bn in 2019. Its total assets increased in real terms from ZW\$2.418bn as at 31 December 2019 to ZW\$3.257bn as at 31 December 2020.

Growth in life assurance premiums has slowed down significantly as household incomes are affected by

The company has started offering funeral service facilities as an add-on to its bouquet of services in partnership with selected partners.

Other Strategic Operations:

Land bank acquisition was maintained as a focal strategy to preserve value against inflation.

The Group attained an operating licence for its micro-finance business on 3 December 2020, and the unit was launched virtually on 16 December 2020, initially operating from 2 branches in Harare.

During the year, the Group commenced the process of certification under the Sustainability Standards & Certification Initiative (SSCI) through the European Organisation for Sustainable Development (EOSD). Full certification is expected within 12 to 18 months. Satisfactory progress in this regard has been registered.

The Group initiated processes to refresh its banking system, as an integral component of a digitalisation thrust, which will have an impact on the business model and customer experience. This has become a strategic imperative to guarantee the long-term survival of the business in a fast-changing business environment.

Group Human Resources and Training:

Despite the operating environment becoming less competitive relative to other countries in the region and beyond, staff attrition in the Group continues to be within acceptable levels.

The Group staff complement as at 31 December 2020 was 967, with 655 being permanent employees whilst 312 members were employed on a fixed contract basis.

A total of 1,423 attendances were recorded at 115 training courses held in 2020. All staff members attended wellness clinics and soft skills training during the year.

Industrial relations remained cordial during the year under review.

I extend gratitude to our valued customers for their support during a very challenging period.

I also thank staff and the management team for their contribution to the profitable outturn in 2020.

Finally, I would like to thank the Board for its wise counsel.

Fanuel Kapanje Acting Group Chief Executive

30 June 2021

Audited Financial Results for the year ended 31 December 2020

AUDITOR'S STATEMENT

The consolidated inflation adjusted financial results should be read in conjunction with the complete set of consolidated inflation adjusted financial statements as at and for the year ended 31 December 2020, which have been audited by KPMG Chartered Accountants (Zimbabwe) and an adverse opinion has been issued thereon indicating that the financial statements do not present fairly the inflation adjusted consolidated statement of financial position of ZB Financial Holdings Limited and its subsidiaries as at 31 December 2020 and the inflation adjusted consolidated financial performance and inflation adjusted consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards. The auditors' report carries an adverse opinion in respect of inconsistent application of fair value measurement principles related to valuation of investment properties and owner-occupied properties between ZB Financial Holdings Limited, its subsidiaries and an associate in the current year as well as non-compliance with International Financial Reporting Standards IAS 21 - The Effects of Changes in Foreign Exchange Rates (IAS 21) and International Financial Reporting Standards IAS 29 - Financial Reporting in Hyperinflationary Economies (IAS 29) in the prior financial year and the impact of this non-compliance on the comparative financial information.

The auditors' report includes key audit matters in respect of the valuation of owner-occupied property and investment property, valuation of insurance contract liabilities and expected credit loss allowance on loans and advances.

The auditor's report has been made available to management and the directors of ZB Financial Holdings Limited.

The Engagement Partner responsible for the audit was Michael de Beer (PAAB Practicing Certificate Number 0369).

KPMG Chartered Accountants (Zimbabwe) are in their first year of a five year cycle of providing assurance services to the Company and its subsidiaries as required by Paragraph 41(4) of the Banking Act (Chapter 24:20).

1. BASIS OF PREPARATION

Local bank accounts Foreign bank accounts

Cash and cash equivalents at end of year Cash and cash equivalents comprise:

1.1 Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs), promulgated by the International Accounting Standards Board (IASB) which includes standards and interpretations approved by IASB, the International Financial Reporting Interpretations Committee (IFRIC) interpretations, and in the manner required by the Companies and Other Business Entities Act (Chapter 24:31), the Banking Act (Chapter 24:20), the Building Societies Act (Chapter 24:02), the Insurance Act (Chapter 24:07), Securities and Exchange Act (Chapter 24:25) and relevant regulations made thereunder.

The Group's financial statements as at 31 December 2020 did not fully comply with International Financial Reporting Standards (IFRSs), particularly IAS 21 "The Effect of Changes in Foreign Exchange Rates" and IAS 29 "Financial Reporting in Hyper-Inflationary Economies".

IAS 21 "The Effect of Changes in Foreign Exchange
Had the assessment required by IAS 21 occurred in the correct period from 1 October, 2018, the adjustments that were
recognised in the comparative 2019 period would have been materially different. Therefore, the departure from the
requirements of IAS 21 were considered to be pervasive in the prior period.

IAS 29 "Financial Reporting in Hyper-Inflationary Economies".
Had the hyperinflation adjustments required by IAS 29 been adopted from 1 October 2018, the values reported under the respective components of equity and reserves would have been materially different in the comparative period. Therefore, the departure from the requirements of IAS 29 were considered to be pervasive in the prior period.

1.2 Reporting currency

The financial statements of the Group and the Company are presented in Zimbabwean dollars (ZW\$), which was the Group's functional currency for the company and its subsidiaries as at the reporting date. All information presented has been rounded off to the nearest dollar.

992 705 450

Audited Financial Results for the year ended 31 December 2020

1.2 Reporting currency (continued)

Following the adoption of the multi-currency system in January 2009, all local notes in issue and balances transacted through local payment platforms were rated at par with the US\$. The exchange of these balances against external obligations was done through an allocation system which was controlled by the Reserve Bank of Zimbabwe and delays were often experienced due to competing demands whilst substantially higher rates obtained in the alternative markets and became the basis for a multi-tier pricing regime that became pervasive in the Zimbabwean economy.

Following the Monetary Policy Statement of 20 February, 2019, the Government of Zimbabwe issued Statutory Instrument (SI) 32 and 33 of 2019 on 22 February, 2019 together with Exchange Control Directive RU28 of 2019, the effects of which were to:

a) Formally recognise local unit monetary balances in the form of bank balances, balances on electronic payment platform and local bond notes as a currency distinct from the US\$. These were subsequently named RTGS Dollars (otherwise identified as

Create a base upon which the RTGS Dollars were to be allowed to trade against the US\$ or any other foreign currencies on the interbank market at a floating rate

Consequently, the new RTGS Dollars started to trade officially with the USD on 22 February, 2019 and the maiden rate of USD1:ZW\$2.5 was established. The maiden floating rate was presumed to have subsisted from the beginning of the year as practical expedience (deemed rate), the Group did not have material transactions in foreign currency between 1 January 2019 and 22 February 2019 to warrant an extensive process of separate identification and translation of these transactions at any other rate outside the "deemed" rate. outside the "deemed" rate.

The Group's functional currency changed from US\$ to ZW\$ in line with the reporting provisions of SI 33 of 2019. The change in the functional currency and subsequent revaluation of foreign denominated balances resulted in the creation of foreign currency translation reserve which the Group has designated as non-distributable. However, in inflation adjusted financial statements which follow value movements on a year on year basis using the Consumer Price Index this reserve is subsumed in the restatement of equity and does not appear as a separate line in the inflation adjusted financial statements.

The Public Accountants and Auditors Board (PAAB), through circular 01/19 indicating the conditions required for the application of International Accounting Standard ("IAS") 29, Financial Reporting in Hyper-Inflationary Economies. All entities reporting in Zimbabwe are now required to apply the requirements of IAS 29 with effect from 1 July 2019.

The Group has applied the requirement of IAS 29 for the year ended 31 December 2020. Paragraphs 2 and 3 of IAS 29 requires that in the period in which an entity identifies the existence of hyperinflation in the economy, not having been hyperinflationary in the prior period, the entity shall apply the requirements of IAS 29 for such earlier period as if the economy had always been hyperinflationary

Consequently, prior year financial statements have been restated and technical concepts for the restatement of non-monetary balances have been applied with effect from the later date of acquisition or date of revaluation. For non monetary assets and liabilities which were acquired prior to 2009, not having been revalued in the interim period, restatement was done from 2009, being the point at which carrying values were last established by means of revaluation exercise.

The restatement of figures has been calculated by means of conversion factors derived from the consumer price index (CPI) prepared by the Zimbabwe Central Statistical Office. The conversion factors used to restate the financial statements at 31 December

	Index	Conversion factors
31 December 2020	2 474.51	1.00
31 December 2019	551.63	4.49
31 December 2018	88.81	27.86

The main guidelines for the restatement are as follows:

- All amounts not already expressed in terms of the measuring unit current at the balance sheet data are restated by applying a general CPI. Corresponding figures for previous periods are similarly restated.

 Monetary assets and liabilities are not restated because they are already expressed in terms of the monetary unit current at the statement of financial position date. Monetary items are money held, assets and liabilities to be recovered or paid at the nominal value recorded in the historical cost.

 Non-monetary assets and liabilities and the components of shareholding's equity are restated by applying (to the initial acquisition cost and any accumulated depreciation for property and equipment), the relevant conversion factors reflecting the increase in the CPI from the date of acquisition or initial recording to the Statement of financial position date.

 All items in the income statement are restated by applying the relevant factors.

 The capitalisation of borrowing costs during construction of a qualifying asset is considered to be a partial recognition of inflation and is reversed to the income statement and replaced by indexed cost.

 The effect of general inflation on the Group's net monetary position is included in the income statement as a monetary gain

- The effect of general inflation on the Group's net monetary position is included in the income statement as a monetary gain
- Share capital and share premium were restated from the date of contribution and of this pre-dates 2009.

The application of IAS 29 requires certain assumptions and estimates to be made which could have a material impact on the financial statements.

1.4 Basis of reporting

The preparation of the inflation adjusted financial statements, in conformity with IAS 29 "Financial Reporting in Hyperinflationary Economies" is required by International Financial Reporting Standards (IFRSs). The inflation adjusted financial statements are the principal financial statements of the Group. The historic amount are shown as supplementary information this information does not comply with International Reporting Standards in that it has not taken account of the requirement of International Accounting Standards 29: Financial Reporting for Hyper-Inflationery Economies. As a result the auditors have not expressed an opinion on the historical financial information as this is presented as supplementary information. information.

1.5 Basis of consolidation

The Group's financial results incorporate the financial results of the Company, its subsidiaries and associate companies. Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to change returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The results of the subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial results of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. All intra-group balances, transactions, income and expenses, profits and losses resulting from intra-group transactions that are recognised in assets and liabilities are eliminated in full. Non-controlling interests represent the portion of profit and net assets that is not held by the Group and are presented separately in the consolidated statement of profit or loss and other comprehensive income and within equity in the consolidated statement of financial position, separately from parent shareholders' equity.

1.6 Key sources of judgement and estimation uncertainty

Significant assumptions and estimations, as at the date of financial reporting, with material implications on the reported financial outturn and balances have been made in the following areas:

The computation of expected credit losses (IFRS 9)

Determination of the fair value of financial assets (IFRS 13)

- Valuation of property (including investment properties) and equipment (IAS 16 and IAS 40)
 Estimation of liabilities under insurance contracts including life funds valuation (IFRS 4)
 Ascertaining of the degree of control or significant influence in investee companies (IAS 27 and IAS 28)
- Determination of carrying amounts of right of use assets and lease liabilities (IFRS 16)

The nature of assumptions made and processes involved in the development of estimates, and relevant models used, where applicable, are discussed in the accounting policy notes in the Group's annual reports.

3. TREASURY BILLS

3(a) Balances on the Statements of Financial Position

The Reserve Bank of Zimbabwe (RBZ) has issued various forms of treasury bills which the Bank has participated in. The Group has three categories of treasury bills classified as follows:

- a) as "at fair value through profit or loss" (FVTPL);
- b) as "at fair value through other comprehensive income" (FVTOCI); and
- c) as "at amortised cost" (AMCO)

- The Group invested in treasury bills issued by the RBZ over a period of 3 months to 24 months (December 2019: 3 to 24 months) at rates ranging from 7% to 9.875%. (December 2019: 7% to 10%)
- The Group purchased treasury bills from the secondary market. These treasury bills have coupon rates ranging from 0% to 5% (December 2019: 0% to 5%) with maturity periods ranging from 1 month to 3 years (December 2019: 1 month to 3 years).
- The Group received treasury bills as substitution for debt instruments from the Zimbabwe Asset Management Company (ZAMCO). The treasury bills have a coupon rate of 5% (December 2019: 5%) and maturity periods ranging from 1 month to 14 years (December 2019: 1 month to 14 years).
- The Capitalisation Treasury Bills (CTBs) with a face value of ZWL20 000 000 were acquired on 26 May 2015 from the Government of Zimbabwe against an interest free loan at the Holding Company. The CTBs were then used to recapitalise ZB Bank Limited, a 100% owned subsidiary. The CTBs mature on 26 May 2025 and carry a coupon of 1% which is payable on maturity.

Determination of fair value of treasury bills (FVTPL and FVTOCI)

The fair value of treasury bills was determined using level 3 inputs due to lack of an active market for the trade of treasury bills. The Group used the discounted cash flow valuation technique by applying a risk adjusted discounted rate for comparable risk profiles on the contracted cashflows in order to determine the present value of the treasury bills.

Impairment assessment

Treasury bills classified and measured at amortised cost are assessed for impairment annually. There was no objective evidence at 31 December 2020 to suggest that future cash flows on the treasury bills portfolio could end up being less than anticipated at the point of initial recognition. Consequently, no impairment adjustment arose from the assessment.

Audited Financial Results for the year ended 31 December 2020

Value to be received from security held	4 302 391	10 200 101	4 302 391	3 024 761

For the secured non-performing loans, security exists in the form of liens registered over funded accounts, bonds registered over landed property and guarantees in various forms. The Group discounts the value of the security at hand using internal thresholds for prudential purposes. Generally no security value is placed on ordinary guarantees. The internally discounted value of the security held in respect of the non-performing book amounted to ZW\$18 389 830 as at 31 December 2020 (2019: ZW\$10 024 217).

Prior year erro

The Group changed its accounting policy on intangible assets to revaluation model in 2018. The intangible assets comprised of computer software and work in progress in the development of internally generated computer software. The Group has significant computer software assets that were acquired during the multicurrency period as well as in the mono currency period. The computer software acquired in the multi-currency period was, through implementation of SI 33 of 2019, converted to local currency at the rate of 1:1 for USD to ZWL currency. The implementation of SI 33 of 2019, coupled with the significant depreciation of the local currency and the resultant hyperinflation that occurred in the period following currency reforms, which were implemented on 22 February 2019, resulted in significant erosion of carrying value of assets including the computer software.

In the course of preparation of financial statements, management made judgement for certain items that are especially critical for the Group's results and financial situation due to materiality, and a judgement was made to adopt the revaluation model for computer software with a view to provide financial information that is meaningful and reasonable to the users of financial statements. The revaluation exercise was undertaken by an independent external valuer and the necessary adjustments were done to the financial statements for the year ended 31 December 2019.

Further reassessment made on the application of revaluation model on computer software in the current year pointed to a technical difficulty in satisfying the requirement of the existence of an active market "as is required by IAS 38 [Intangible Assets]" for adoption of the revaluation model for intangible assets. This was due to the following reasons:

- The pricing information of the computer software is not publicly available as contracts are negotiated between individual buyers and sellers. Computer software was considered a packaged deal designed to meet the specific selection of the
- The computer software is customized to satisfy the requirements of the Group and this has made it a unique product.

The Group has accordingly reverted to the historical cost model from the 2020 financial year.

The inflation adjusted financial statements for the year ended 31 December 2019 have been restated to reverse the revaluation gain adjustment on computer software. The financial statements have also been restated to apply the exchange rate of USD1:ZWL1 on the date of change of functional currency (22 February 2019), which was the earliest observable exchange rate per IAS 21.

17.2 Legal contingencies

The dispute in which Transnational Holdings Limited (THL) was contesting the acquisition of Intermarket Holdings Limited (IHL) by the Company, which was before the Supreme Court of Appeal was resolved through a notice of withdrawal of the appeal filed by Transnational Holdings Limited (THL) on 2 October 2020.

18. EARNINGS PER SHARE

Basic and fully diluted earnings per share (ZW cents)

The Inflation adjusted calculation of basic and fully diluted profit per share for the year ended 31 December 2020 of ZW668 cents (2019: ZW854 cents) is based on the attributable profit after tax of ZW\$1 051 585 421 (2019: ZW\$1 344 922 287) and weighted average number of shares of 157 522 902 (2019: 157 522 902).

The historical cost calculation of basic and fully diluted profit per share for the year ended 31 December 2020 of ZW2 067 cents (2019: ZW352 cents) is based on the attributable profit after tax of ZW\$3 255 331 492 (2019: ZW\$554 224 420) and weighted average number of shares of 157 522 902 (2019: 157 522 902).

19. RISK MANAGEMENT

19.1 Capital risk management

The Group's capital consists of equity attributable to the shareholders of the parent Company, comprising the issued share capital, reserves, retained income and debt, which includes direct loans plus the residual funding from deposit taking activities after deducting the associated liquid or near-liquid assets.

The Group's target is to maintain operating assets at a level that is lower than the available operating funds at all times in order to restrict the demand on shareholders' equity for operational funding. This objective was met during the course of the year under review. Gearing was maintained at above 0.21% and this is due to the borrowing made in 2015 with a maturity value of ZW\$20 million in 2025.

The banking and insurance operations in the Group are subject to prescribed minimum regulatory capital requirements and minimum capital adequacy and solvency ratios as prescribed from time to time.

Management of the Group monitors the level of capital adequacy on a continual basis, employing techniques adopted from the guidelines developed by the Basel Committee and contained in the Basel II capital accord as implemented by the supervisory authorities for each of the affected entities. For the life assurance business, regular actuarial reviews are undertaken to establish the solvency of the business.

An Internal Capital Adequacy Assessment Plan (ICAAP) has been developed for banking operations and defines capital targets which are generally set above regulatory levels, stress test scenarios and risk appetite across different lines of operations.

Audited Financial Results for the year ended 31 December 2020

Mortgages Insurance

19.2 Financial risk management

The Group maintains active trading positions in a variety of non-derivative financial instruments in anticipation of customer demand. The Group manages its trading activities by the type of risk involved and on the basis of the categories of trading instruments held. Regular feedback on risk related matters is provided to the Board through the Board Governance, Risk and Compliance Committee.

Investments Savings Loans

The following table shows the carrying amounts and the fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is not a reasonable approximation of fair value.

Definition of financial risk

The Group defines financial risk collectively to include liquidity risk, market risk and credit risk.

19.2.2 Liquidity risk

Definition

Liquidity risk arises in the general funding of the Group's activities and in the management of positions. It includes the risk of being unable to fund liabilities at appropriate maturities and rates and the risk of being unable to liquidate an asset at a reasonable price and in an appropriate time frame.

Identification techniques

This risk is identified through gap and maturity analysis.

Measurement methods

Liquidity risk is measured using the gap analysis techniques and the term structure of assets and liabilities.

The tables below set out the remaining contractual maturities of the Group's financial assets and financial liabilities.

Liquidity gap analysis as at 31 December 2020

The tables below set out the remaining contractual maturities of the Group's financial assets and financial liabilities.

	14 924 874 764	12 626 667 892	14 924 874 764	2 814 798 515	

The Group's main exposure to foreign currency risk arises from the commitments for licence and support fees for information technology platforms that were sourced from foreign suppliers.

19.2.4 Credit risk

The table below shows the credit quality and the maximum exposure for credit risk based on the Bank's internal credit rating system and period-end stage classification.

<u>Internal rating gra</u>		Inflation	adjusted 2020			Inflation adjuste	ed Restated 2019

Audited Financial Results for the year ended 31 December 2020

19.3 Other business risks

Other business risks faced by the Group are;

Operational risk

- Legal, reputational and compliance risks
- Technological risks
- Solvency risk Underwriting risks

The Group has put in place a framework for the management of the above risks. Regular reviews are undertaken to evaluate the adequacy of risk management processes against a changing operating environment.

19.4 Risk rating

19.4.1 Regulatory risk rating

The Reserve Bank of Zimbabwe conducts regular offsite and onsite examinations of the institutions that it regulates. The last on-site examination of the banking operations was concluded on 9 December 2014 using data as at 30 September 2014.

ZB Bank Limited and ZB Building Society were assessed using the Risk Assessment System (RAS) and the CAMELS rating model. The individual components of the rating systems were rated as follows

CAMELS Component	Latest Rating				
	ZB Bank Limited	ZB Building Society			
Capital Adequacy	4	4			
Asset Quality	4	2			
Management	3	3			
Earnings	4	3			
Liquidity and Funds Under Management	2	2			
Sensitivity to Market Risk	2	2			
Composite rating	4	3			

Key: 1 = Strong; 2 = Satisfactory; 3 = Fair; 4 = Weak; 5 = Critical

Summary of Risk Assessment

19.4.2 External credit ratings

Some of the Group's significant trading companies subscribe to an internationally recognised rating agency, Global Credit Rating Group (GCR). The ratings for the last three (3) years were as follows: Long-term debt rating scale:

Entity	2020	2019	2018
ZB Bank Limited	BB	BB	BB
ZB Building Society	B-	B-	BB-
ZB Reinsurance Company	BBB	BBB	A-

Ratings for ZB Bank Limited and ZB Building Society expired in September 2020 whilst the rating for ZB Reinsurance Company expired in May 2021.

COMPLIANCE WITH REGULATIONS

Commercial banks and building societies in Zimbabwe were required to maintain a minimum capital level of ZW\$25 million and ZW\$20 million respectively as at 31 December 2020. ZB Bank Limited and ZB Building Society (ZBBS) met these requirements as at 31 December 2020.

Insurance operations

In terms of paragraph 3 of Statutory Instrument 206 of 2019, Amendment Regulations of 2019 (Number 22), paragraph 11B (1) was inserted to the principal regulations of the Insurance Act (Chapter 24:07) with the effect of setting the minimum prescribed assets ratios for insurers at the rate of 15% of the market value of total adjusted assets in the case life assurance businesses and 10% of the market value of total adjusted assets in the case of short-term re-insurance businesses. ZB Life Assurance Limited and ZB Reinsurance Limited did not comply with these ratios throughout 2020, closing the year with ratios at 0.7% (2019: 1.78%) for the Life Company and 5% (2019: 1%) for the Reinsurance Company respectively. As further required by paragraph 11B sub-section 4, the two entities have collaborated with the Insurance and Pensions Commissions (IPEC) on the non-compliance as required by the Regulations, and provided a roadmap to remedy the non-compliance which is being tracked on a monthly basis. Compliance has been affected by the shortage of qualifying assets on the market. Furthermore, the ratios have been impacted on by an inflationary growth in the value

The non-compliance persisted up to the date of release of these financial statements. No penalties have been levied on

Other compliance issues

The directors are not aware of any other material cases of non-compliance with regulations governing the operations of all companies within the Group.

SUBSEQUENT EVENTS

The Group lost US\$2 775 000 and ZW\$43 090 in a heist on 6 January, 2021 after a Cash In Transit (CIT) vehicle was involved in a robbery incident. Measures have been taken to strangthen controls around the operation of cash movement activities and to mitigate the impact of similar events.

GOING CONCERN

The Board undertakes regular assessment of whether the Group is a going concern in the light of current economic conditions and all available information about future risks and uncertainties.

The Monetary Policy Committee of the Reserve Bank of Zimbabwe, revised minimum capital requirements for banking institutions with effect from 31 December 2021. The revised limit for Tier 1 Banks is the ZW\$ equivalent of US\$30m and for Building Societies is the ZW\$ equivalent of US\$20m reckoned with reference to the exchange rate ruling at that time.

A rearrangement of capital resources through the merger of the Group's banking operation namely ZB Bank Limited and ZB Building Society is planned for the optimisation of capital resources and also address possible capital strain at a solo level for the subsidiaries.

The projections for the Group have been prepared, covering its future performance, capital and liquidity for a period of 12 months from the date of approval of these financial statements including performing sensitivity analyses. These analyses have taken into account the ongoing developments related to the COVID-19 pandemic and do not affect the possibility of a strain that can affect the continuation of operations in their current state.

Whilst aggregate risk has been assessed as a whole, risks in the following areas continue to remain under close monitoring as a result of the continuation of the COVID-19 pandemic:

- a) Credit Risk changed operating models and market dynamics may affect the ability of borrowers to service their obligations. The Group may be forced to consider loan forbearance to mitigate the risk of loss.
- b) Liquidity Risk During the year, the market continued to have excess liquidity and the Group has not been affected by this risk. Any mismatches that may arise between assets and liabilities due to changed business models for suppliers of critical funding, the Group will maintain a significant liquidity buffer in the short-term. This may affect asset creation activities in the short-term period.
- c) Insurance Risk funeral insurance claims remained very low on individual life products despite the advent of COVID-19. There was also an improvement in the claims experience for 2020 where the overall claims ratio came down to 32% compared to 40% in 2019. Current claims levels have been in line with expected trends.
- d) Market risk the valuation of equity investments maybe affected through an unfavourable underlying performance fundamentals as a result of COVID-19. This may have an effect of reducing the carrying value for investments designated as fair value instruments. The Group does not hold any derivative instruments which may be exposed to secondary risks related to COVID-19. Additionally, there may be a market wide requirement to re-price instruments which may affect the Group's investment portfolio of interest rate sensitive instruments. This may result in a repricing gap between assets and liabilities. The Group's interest sensitive liabilities were higher than interest sensitive assets as at 31 December 2020. A market wide increase in interest rates is likely to reduce the Group's net interest earnings

Consequently, the financial statements for the year ended 31 December 2020 have been prepared on a going concern

3.10 Non-performing debt				
Non-performing loans and advances	4 735 348	13 478 432	4 735 348	3 004 677
Less: Allowance for loan impairment	(1 485 660)	(11 513 609)	(1 485 660)	(2 566 670)
Value to be received from security held	3 249 688	1 964 823	3 249 688	438 007

For the secured non performing loans, security exists in the form of liens registered over funded accounts, bonds registered over landed property and guarantees in various forms. The company discounts the value of the security at hand using internal thresholds for prudential purposes. Generally no security value is placed on ordinary guarantees.

Fixed deposits are investments in money market instruments on an unsecured basis. Fixed deposits on average run for 30 days on an average interest rate of 8.0% per annum (2019: 6.5%).

These money market investments are short term in nature and the carrying amount approximates the fair value, thus these have been classified as level 2 financial instruments in the fair value hierarchy.

Audited Financial Results for the year ended 31 December 2020

	Inflation adjusted		Unaudited Historical cost	
	31 Dec 2020	31 Dec 2020 31 Dec 2019		31 Dec 2019
	ZW\$	ZW\$	ZW\$	ZW\$
3.5 Non-performing debt				
Non-performing loans and advances	1 112 903	2 182 551	1 112 903	486 545
Less: Allowance for loan impairment	(329 006)	(1 181 873)	(329 006)	(263 469)
Value to be received from security held	783 897	1 000 678	783 897	223 076

For the secured non-performing loans, security exists in the form of liens registered over funded accounts, bonds registered over landed property and guarantees in various forms. The Society discounts the value of the security at hand using internal thresholds for prudential purposes. Generally no security value is placed on ordinary guarantees. The internally discounted value of security held in respect of the non-performing book amounted to ZW\$1 753 947 as at 31 Dec 2020 (2019: ZW\$1 245 141).

Mortgages Insurance

22 RISK MANAGEMENT

22.1 Financial assets and financial liabilities classification and fair value

The following table shows the carrying amounts and the fair value of financial assets and financial liabilities including their Levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

Investments Savings Loans

23. GOING CONCERN

The Monetary Policy Committee of the Reserve Bank of Zimbabwe, revised minimum capital requirements for financial institutions with effect from 31 December 2021. The revised limit for Building Societies is the ZW\$ equivalent of US\$20m reckoned with reference to the exchange rate ruling at that time. Based on the projected performance to 31 December, 2021, the Society faces a threat of failing to meet this capital target if it continues to operate as a solo entity. The strategic position adopted by the ultimate holding company, ZB Financial Holdings Limited, is to cure this potential non-compliance through the merger of all its banking operations into one that will be able to operate as a Tier 1 Bank with a minimum capital of the equivalent of US\$30m. Technical processes towards the merger are at mobilization stage. Due to the complexity involved in transactions of this nature, and the prolonged discussions surrounding this initiative, the Board has taken the position that there is a sufficient level of uncertainty which could affect the timely execution of the merger transaction. The financial statements have been prepared on a going-concern basis pending the finalization of technical processes underway.

19 PRIOR YEAR ERROR

The Company changed its accounting policy on intangible assets to the revaluation model in 2019. The intangible assets comprised of computer software. The adoption of the revaluation model had been necessitated by the observation that the computer software assets class was the only class that had remained at cost, whilst all other items of property, plant and equipment had changed to the revaluation model and the historical cost values of the computer software was viewed not to faithfully represent the value of computer software used for Company operations.

On further reassessment of application of revaluation model on computer software in the current year, the Company noted that it was difficult to satisfy the requirement of the existence of an active market as is required by IAS 38 [Intangible Assets] for adoption of the revaluation model for intangible assets. This was due to the following reasons:

- The pricing information of the computer software is not publicly available as contracts are negotiated between individual buyers and sellers.
- buyers and sellers.

 The computer software is customized to the requirements of the Company thereby making it a unique product.

The above conditions were deemed present for the financial year ended 31 December 2019. This therefore entailed there was an error in adopting the revaluation model for computer software. The Company has accordingly reverted to the historical cost model from the 2020 financial year.

The financial statements for the year ended 31 December 2019 have been restated to reverse the revaluation gain adjustment on computer software. The financial statements have also been restated to apply the exchange rate of USD1:ZWL1 on the date of change of functional currency (23 February 2019), which was the earliest observable exchange rate per IAS21. The Company has not presented the earliest opening statement of financial position as is required buy IAS 8 due to the impracticability to disclose the same as at 1 January 2019 as the statement of financial position for the year ended 31 December 2018 did not achieve fair presentation due to currency distortions since October 2018. An adverse opinion on the statement of financial position as at 31 December 2018 was issued given the complexity of determining the exchange rates between October 2018 and February 2019 being unknown.

Investment properties comprise a number of residential properties that are leased out to third parties to earn rental income. The net rental income recognised in profit or loss by the Company from its investment property, all of which is leased out under operating lease, amounted to ZWL\$2 690 430 (Inflation adjusted), ZWL\$2 221 307 (historical). There are no contractual obligations to purchase, construct or develop investment property or for repairs, maintenance or enhancements. There are no restrictions or encumbrances over investment property as at the reporting date.

Measurement of fair value

An external, independent property valuer, EPG Global determined the fair value of investment properties. EPG Global has appropriately recognised professional qualifications and recent experience in the location and category of the properties being valued. Reviews conducted by an independent valuer provide the fair value of the Company's investment property portfolio every 12 months.

8. TECHNICAL RESERVES

An external independent acturial firm, African Acturial Consultants determined incurred but not reported claims reserve (IBNR), Unearned Premium Reserve and the Outstanding Claims Reserves African Acturial Consultants has the appropriate recognised professional qualifications and experience to undertake this valuation.

To estimate the IBNR Reserve, the actuary made use of the Basic Chainleader and Inflation adjusted Chainleader methods. To estimate the Unearned premium reserve the Actuary makes use of the 365th method. To estimate outstanding claims reserve, reports and individual case estimates received from ceding companies were used.

4 REGULATORY FRAMEWORK

The Insurance and Pensions Commission (IPEC) requires reinsurers to maintain a minimum solvency level of 25%. The solvency ratio is calculated as shareholder's equity divided by net premium income. As at 31 December 2020 the company had a solvency margin of 54%(Inflation adjusted), 73% (Historical) (December 2019: 51%- Inflation adjusted and 96%-Historical). The company is also compliant with the IPEC prescribed minimum capital requirement of \$75,000,000.

Independent Auditors' Report

To the shareholders of ZB Financial Holdings Limited

Adverse Opinion on Inflation Adjusted Consolidated Financial Statements and Qualified Opinion on the Inflation Adjusted Separate Financial Statements

We have audited the inflation adjusted consolidated and separate financial statements of ZB Financial Holdings Limited (the "Group" and "Company"), set out on pages 14 to 180, which comprise:

- the inflation adjusted consolidated and separate statements of financial position as at 31 December 2020;
- the inflation adjusted consolidated and separate statements of profit or loss and other comprehensive income for the year then ended;
- the inflation adjusted consolidated and separate statements of changes in equity for the year then ended;
- the inflation adjusted consolidated and separate statements of cash flows for the year then ended; and
- the notes to the inflation adjusted consolidated and separate financial statements, including a summary of significant accounting policies.

In our opinion, because of the significance of the matters described in the *Basis for Adverse Opinion* section of our report, the inflation adjusted consolidated financial statements do not present fairly the inflation adjusted consolidated financial position of ZB Financial Holdings Limited as at 31 December 2020, and its inflation adjusted consolidated financial performance and its inflation adjusted consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS), and the manner required by the Companies and Other Business Entities Act (Chapter 24:31), the Banking Act (Chapter 24:20), the Building Societies Act (Chapter 24:02), the Securities and Exchange Act (Chapter 24:25) and the Insurance Act (Chapter 24:07).

In our opinion, except for the effects of the matters described in the *Basis for Qualified Opinion* section of our report, the inflation adjusted separate financial statements present fairly, in all material respects, the inflation adjusted separate financial position of ZB Financial Holdings Limited as at 31 December 2020, and its inflation adjusted separate financial performance and inflation adjusted separate cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Companies and Other Business Entities Act (Chapter 24:31).

Basis for Adverse Opinion on Inflation Adjusted Consolidated Financial Statements and Qualified Opinion on the Separate Financial Statements

Inconsistent application of fair value measurement principles related to valuation of investment properties and owner occupied properties between ZB Financial Holdings Limited and its subsidiaries and an associate in the current year

ZB Financial Holdings Limited, through its life assurance subsidiary, has an associate investment in a property development and investment company. Both the group and the associate engaged the same external property valuer to perform property valuations for their respective year end valuations, with ZB Financial Holdings and its subsidiaries' property portfolio being valued in United States dollars and being converted into Zimbabwe dollars using the official exchange rate as at 31 December 2020, which is consistent with the basis adopted in the prior year. The associate engaged the same valuer to conduct two full valuations at year end, one in United States dollars and the other in Zimbabwe dollars, with the Zimbabwe dollar valuation being adopted for year end reporting purposes, which is inconsistent with the valuation basis adopted in the prior year as well as with the valuation approach applied in respect of ZB Financial Holdings Limited's owner occupied and investment properties.

There is a lack of consistency between property valuation basis and translation methods applied by ZB Financial Holdings Limited and its subsidiaries and the associate. IFRS 13 Fair Value Measurement paragraph 65 requires valuation techniques used to measure fair value to be applied consistently. The change from including the valuation of investment properties of the associate on the basis of direct ZWL\$ valuations in the current year compared to USD valuation in the prior year does not comply with the conditions in the standard that allow for a change in valuation techniques due to limited ZWL\$ market evidence.

In accordance with IAS 28, *Investments in Associates and Joint Ventures* paragraph 35, the investee's financial statements shall be prepared using uniform accounting policies for like transactions and events in similar circumstances except as described in paragraph 36A. IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* paragraph 5 defines accounting policies as the specific principles, bases, conventions, rules and practices applied by an entity in preparing and presenting financial statements. If an associate or a joint venture uses methods and techniques other than those of the entity for like transactions and events in similar circumstances, adjustments shall be made to make the associate's or joint venture's results to conform to those of the entity when the associate's or joint venture's financial statements are used by the entity in applying the equity method.

The Directors have not adjusted the financial records and its financial statements to align the valuation approaches between ZB Financial Holdings Group and its associate. The directors have estimated that the effects on the inflation adjusted consolidated financial statements, had the directors adjusted the financial records to align the valuation approaches between ZB Financial Holdings Limited and the associate, would have resulted in equity accounted investments decreasing by ZWL\$ 952 278 246, deferred tax liability decreasing by ZWL\$ 49 011 524, life assurance funds liability decreasing by ZW\$ 203 972 150, with the effect on the inflation adjusted consolidated statement of profit or loss and other comprehensive income impact being a decrease in the share of profit from equity accounted investments by ZWL\$ 952 278 246, as well as decrease in the changes to policyholder liabilities by ZWL\$ 203 972 150 and the related income tax expense by ZWL\$49 011 524.

The effect of this non-compliance with IAS 28 and IFRS 13 on the inflation adjusted consolidated financial statements is material and pervasive.

Non-compliance with International Financial Reporting Standards IAS 21 - The Effects of Changes in Foreign Exchange Rates (IAS 21) and International Financial Reporting Standards IAS 29 - Financial Reporting in Hyperinflation Economies (IAS 29) in the prior financial year

As described in note 3.1.1 to the inflation adjusted consolidated and separate financial statements, during the prior financial year, a new currency called the RTGS dollar, also referred to as Zimbabwe dollar, was legislated through Statutory Instrument 33 of 2019 on 22 February 2019. Sl33/19 fixed the exchange rate between the RTGS dollar and the USD at a rate of 1:1 for the period up to its effective date. The Group and Company however, decided to account for the change in functional currency from United States dollars to Zimbabwe dollars effective 1 January 2019 by adopting the opening interbank foreign exchange rate of 1:2.5 for the period between 1 January and 22 February 2019. This was not in compliance with IAS 21 where the functional currency was assessed to have been the ZWL with effect from 1 October 2018 and the market exchange rate was not 1:1 as stipulated by Sl33/19.

In addition, as described in note 3.1.3 to the inflation adjusted consolidated and separate financial statements, Zimbabwe became a hyperinflationary economy with effect from 1 July 2019. IAS 29 refers to a 'currency' in an economy being the underlying indicator of the hyperinflationary environment, based on that understanding the Group is required to identify the currency which is that of a hyperinflationary environment. As noted in the section above, the currency identified in a hyperinflationary economy, RTGS dollars, was determined to be a functional currency from an accounting perspective from October 2018, only became legally recognised as currency on 22 February 2019, and was determined to have become hyperinflationary from 1 July 2019. The Directors opted to apply the principles of hyperinflation from 1 January 2009. During this period however, Zimbabwe was in a USD currency and economy predominantly and therefore was not operating in a hyperinflationary economy. It is therefore incorrect to apply hyperinflation accounting from 1 January 2009 up to 30 September 2018.

Had the Group and Company applied the full requirements of IAS 21 and IAS 29 in the prior year, various elements of the prior year inflation adjusted consolidated and separate financial statements, namely equity and non-monetary assets that are not carried at fair value or in terms of current purchasing parity, which are presented as comparative financial information, may have been materially impacted as disclosed in Note 3.1.3. The financial effects of this departure on the prior year inflation adjusted consolidated and separate financial statements have not been determined.

Our opinion on the current year's inflation adjusted consolidated financial statements has been further modified and the inflation adjusted separate financial statements have been modified because of the possible effects of these matters on the comparability of the current year's inflation adjusted consolidated and separate financial statements with those of the prior year.

Prior period error relating to incorrect adoption of the revaluation model for intangible assets for the inflation adjusted consolidated financial statements

In addition, we also draw attention to note 15 to the inflation adjusted consolidated financial statements which indicates that the comparative information presented as at and for the year ended 31 December 2019 has been restated.

Comparative Information audited by another auditor

The inflation adjusted consolidated and separate financial statements, were audited by another auditor who expressed an adverse opinion on those inflation adjusted consolidated and separate financial statements on 29 May 2020 due to the noncompliance with IAS 21 and IAS 29 as described above.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors'* responsibilities for the audit of the inflation adjusted consolidated and separate financial statements section of our report. We are independent of the both the Group and Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the inflation adjusted consolidated and separate financial statements in Zimbabwe, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our adverse opinion on the inflation adjusted consolidated financial statements and our qualified opinion on the inflation adjusted separate financial statements.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the inflation adjusted consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the inflation adjusted consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matters described in the Basis for Adverse Opinion on Inflation Adjusted Consolidated Financial Statements and Qualified Opinion on the Separate Financial Statements section, we have determined the matters described below to be the key audit matters to be communicated in our report.

1. Valuation of insurance contract liabilities

This matter relates to the inflation adjusted consolidated financial statements.

Refer to the insurance liabilities accounting policy note 3.17.2 and trade payables consolidated note 17 to the inflation adjusted consolidated financial statements. Also refer to the key sources of estimation uncertainty valuation of the life fund note 2.2.2.7 and the life assurance funds note 22 to the inflation adjusted consolidated financial statements.

Key Audit Matter How the matter was addressed in our audit The Group holds significant insurance Our procedures included the following: liabilities which comprise of IBNR of ZWL\$ 90 163 636 (note 17), net Testing the design, implementation outstanding claims of and operating effectiveness of key ZWL\$28 571 568 (note 17), and UPR controls over the identification, of ZWL\$111 326 041 (note 17) and measurement and recording of the through its life assurance subsidiary group's calculation of insurance has a life assurance fund with the contract liabilities. value of ZWL\$1 673 756 150 (note 22) as at 31 December 2020. Evaluating the appropriateness of the methodology applied and assumptions used by the Group to The directors engaged an actuarial determine the insurance liabilities expert to assess the valuation of the using our knowledge and industry IBNR, net outstanding claims and UPR as well as the life fund. experience. Engaging our own actuarial specialist The determination of the insurance to interrogate the methodology and liabilities, is an area that makes use of

significant qualitative and quantitative judgments and estimates due to the level of subjectivity inherent in the estimation of the occurrence and severity of insurable events that have occurred as at the end of the reporting period.

Significant estimation and judgement is applied over key valuation assumptions used to determine the insurance contract liabilities such as valuation interest rates, expense inflation and mortality basis.

Because of the inherent susceptibility of the technical reserves to estimation uncertainty as well as the significance of their quantitative impact, we considered the valuation of these insurance liabilities to be a key audit matter.

Key audit matter

respectively.

and ZWL\$ 29 525 000 for the Company,

assumptions used in the determination of the insurance liabilities by testing the principles and integrity of the data and models used by management and their actuaries.

- Assessing the reasonability and accuracy of the liabilities by comparing the prior year claims recognised against the results of current year claims actually reported that related to the prior financial period.
- Confirming the amounts recoverable from the reinsurers.
- Re-computing, the date of the origination of premiums, the allocation of premiums received between current year and future periods based on time allocation, together with the amounts for future periods being recognized as UPR.
- Assessing the disclosures in the consolidated inflation adjusted financial statements, paying particular attention to the disclosure of the assumptions used and judgements made.

How the matter was addressed in

memberships.

2. Valuation of property, equipment and investment property

This matter relates to both the inflation adjusted consolidated and separate financial statements.

Refer to the property and equipment accounting policy note 3.7, the investment property accounting policy note 3.16, critical accounting estimates and judgements note 2.2.2.4, the property and equipment consolidated note 14, the investment property consolidated and separate note 12, and property and equipment company note 14 to the inflation adjusted consolidated and separate financial statements.

our audit The Group and Company hold owner Our audit procedures included the occupied properties, equipment and following: investment properties that are valued at fair value in accordance with IAS 16 Assessing the professional Property, Plant and Equipment and IAS competence, capability 40, Investment Property, respectively. As objectivity of the qualified valuers. at reporting date, the Group and Specifically, in respect of the Company had property, equipment and valuers. we enquired about investment properties amounting to interests and relationships that ZWL\$2 951 346 534 for Group and may have created a threat to the ZWL\$32 261 413 for Company and objectivity. We also valuers' ZWL\$2 177 997 851 for Group and ZWL validated the valuers' professional

Key audit matter

Fair valuation of properties is difficult to ascertain as market comparable sales are not as readily available as a result of depressed economic activity which has resulted in a limited number of open Furthermore, market sales. hyperinflationary environment has made it increasingly difficult to determine the fair value in local currency. Therefore, the qualified valuers determined property values in USD and converted to local currency at ruling interbank exchange rate at 31 December 2020.

Due to the degree of complexity involved in determining the fair value of the owneroccupied properties and investment properties and the significance of the judgments and estimates made by the directors, as well as the significance of their quantitative impact, this was considered to be a key audit matter.

How the matter was addressed in our audit

- Holding with discussions the Group's and Company's independent valuers to understand the assumptions methodologies used in valuing these properties and the market evidence supporting the valuation assumptions.
- Evaluating the appropriateness of the inputs to the valuations by reviewing supporting market transactions used the for valuations.
- Evaluating the appropriateness of the methodology applied conversion of the USD valuations ZWL in line with the requirements of the applicable financial reporting standards.
- Assessing the adequacy of the disclosures in the inflation adjusted consolidated and separate financial statements in respect of owner occupied properties and investment property.

Expected credit loss allowance on loans and advances

This matter relates to the inflation adjusted consolidated financial statements.

Refer to the impairment of financial assets accounting policy note 3.4.1.5, mortgages and other advances consolidated note 7, and credit risk consolidated note 38.2.4 in the inflation adjusted consolidated financial statements.

-				
The	Group,	through	its	bank

Kev audit matter

king and building society subsidiaries, provides retail, retail corporate, mortgage and corporate loans and advances. As at reporting date, the Group had mortgages and other advances amounting to ZWL\$3 147 343 462. The Group uses an expected credit loss (ECL) model to determine the loss allowance in respect of loans and advances and total ECL at Group level amounts to ZWL\$275 225 469. The ECL methodology incorporates the expected future credit losses due to forward looking macro-economic variables.

How the matter was addressed in our

Our audit procedures included the following:

- Assessing and testing the design and operating effectiveness of the controls over credit origination and monitoring.
- Assessing whether the Group's credit policies are aligned with IFRS 9. Financial Instruments.
- Financial Risk Engaging our Management (FRM) specialists to evaluate the appropriateness of the IFRS 9 expected credit loss models

Key audit matter

The Group's ECL model uses certain judgements and assumptions such as:

- the credit risk grades allocated to the counterparties loans and advances and mortgages;
- the probability of a loan becoming past due and subsequently defaulting (probability of default 'PD');
- the magnitude of the likely loss if there is default (loss given default 'LGD');
- the expected exposure in the event of a default (exposure at default 'EAD');
- the criteria for assessing significant increase in credit risk (SICR);
- the rate of recovery on the loans that are past due and in default;
- the identification of impaired assets and the estimation of impairment, including the estimation of future cash flows, market values and estimated time and cost to sell collateral; and
- the incorporation of forward-looking information used in determining the expected credit losses on the loans and advances.

Due to the significance of the loans and advances balance to the inflation adjusted financial position of the Group and the level of judgement including the estimation of key impairment parameters applied in determining the ECL, the expected credit loss on loans and advances was considered a key audit matter.

How the matter was addressed in our audit

by independent (challenger) models to evaluate the appropriateness of the ECL.

- Assessing completeness, accuracy and validity of data and inputs used during the development and application of the ECL model. For a sample of loans and advances, we evaluated the appropriateness of the credit risk grades.
- Using available external and independent information to challenge management's assumptions and judgements in determining expected credit losses.
- Assessed the adequacy of the disclosures in the inflation adjusted consolidated financial statements respect of ECL, as required in terms of IFRS 9.

Other information

The directors are responsible for the other information. The other information comprises the Report of the directors, the Statement of directors' responsibilities, extracts from the report of the independent actuary and the unaudited financial information in the inflation adjusted consolidated and separate financial statements titled "Unaudited Historical Cost" but does not include the inflation adjusted consolidated and separate financial statements and our auditors' report thereon, which

we obtained prior to the date of this auditors' report, and the Annual Report, which is expected to be made available to us after that date.

Our opinion on the inflation adjusted consolidated and separate financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the inflation adjusted consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the inflation adjusted consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we have obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact.

As described in the *Basis for adverse opinion* section above, given the non-compliance with IFRS 13 and IAS 28 in the current year in addition to IAS 21 and IAS 29 in the prior year, the Group's and Company's current year's inflation adjusted financial statements may not be comparable with the prior year. We have therefore concluded that the other information is materially misstated for the same reasons with respect to the amounts or other items in the Report of the directors, the Statement of directors' responsibilities, extracts from the report of the independent actuary, and the unaudited financial information in the inflation adjusted consolidated and separate financial statements titled "Unaudited Historical Cost".

Responsibilities of the directors for the inflation adjusted consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the inflation adjusted consolidated and separate financial statements in accordance with International Financial Reporting Standards and the manner required by the Companies and Other Business Entities Act (Chapter 24:31), the Banking Act (Chapter 24:20), the Building Societies Act (Chapter 24:02), the Securities and Exchange Act (Chapter 24:25) and the Insurance Act (Chapter 24:07), and for such internal control as the directors determine is necessary to enable the preparation of inflation adjusted consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the inflation adjusted consolidated and separate financial statements, the directors are responsible for assessing the Company and its subsidiaries' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and/ Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the inflation adjusted consolidated and separate financial statements

Our objectives are to obtain reasonable assurance about whether the inflation adjusted consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these inflation adjusted consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the inflation adjusted consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the inflation adjusted financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group and/ or the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the inflation adjusted consolidated and separate financial statements, including the disclosures, and whether the inflation adjusted consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the inflation adjusted consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.
- We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
- We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the inflation adjusted consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the

adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
