

For the year ended 31 December 2020

Chairman's Statement

The Bank posted a strong performance in the current year despite significant headwinds caused by COVID-19 and the volatile macro-economic environment, which is a testament to the agility and resilience of the Bank's strategy. The balancing act between serving customers, continued business profitablility and safeguarding colleagues was of critical importance given the rapid changes in the environment. With the strategic thrust of building long-term relationships and supplementing Government efforts on COVID-19 the Bank continued to support the Tourism sector with extension of loan repayments, reduced interest rates and provision of new facilities where required.

A challenging economic environment-business pessimism and optimism
Persistent depreciation of the local currency against the US\$, high inflation rate and COVID-19 uncertainty resulted in low business confidence and a pessimistic overall view of the economy in the first half. However, the easing of lock down, improvement in the operation and price discovery on the auction system and allowing customers with funds to pay in foreign currency brought stability and more business optimism in the second half of the year.

Inflation closed the year at 348% year on year significantly affecting the cost of running the business whilst on the other hand the exchange rate depreciated by 389% to 81.77 against the US\$. COVID-19 further impacted transactional activity significantly declining in quarter one and from there increasing gradually towards end of quarter two after the easing of the lock down. However, certain sectors in the economy like tourism were operating substantially below capacity even after

Interest rates were largely constant in the first half and gradually increased in the second half but were still significantly

The Bank's capital, liquidity position and quality of loans
The Bank closed the year on a strong capital and liquidity base, with total capital adequacy ratio of 29% (regulatory minimum 12%) whilst liquidity ratio was 70% against regulatory minimum of 30%. This strong base gives the business

Core capital is US\$26m at year end compared to a regulatory target of US\$30m required by 31 December 2021. Given the mix in the capital base between local and foreign currency denominated assets, the tracking towards the US\$30m target will be impacted by the volatility in the exchange rates, and will demand that we build a capital buffer to protect against devaluation. The Bank however is on track and confident in meeting this target.

The loan book continues to perform well, with non-performing loans ratio of 0.16% compared to market average of 0.3%. Customers in the tourism and other services sectors significantly affected by COVID-19 are on the watchlist and constitute 5% of the loan book.

The Bank posted a solid performance during the year under review. Operating profit excluding property gains was ZWL606m in inflation adjusted terms whilst in historical terms it was ZWL785m (This translates to inflation adjusted earnings per share of ZWL21.89 and historical cost ZWL80.55).

Empowering communities

Social investment programmes continue to be a key focus area with the main emphasis on empowering youth and where necessary making a donation or entering into strategic partnerships which impact the wider community. During the year the bank donated half a million to Harare Institute of Technology towards COVID-19 project and continued to offer online

The Board conforms to the Bank's values of Integrity, Service Excellence, Collaboration, Innovation and Citizenship. This is over and above observing high standards of corporate governance and complying with all multiple regulations. Continued focus on sound governance practices will ensure that the Bank is robust and secure for its customers and all stakeholder security.

During the year two directors joined the Board. I am pleased to welcome Mr Kirit Naik who was appointed to the Board with effect from 03 February 2020 and Mrs Acquilina Chinamo who was also appointed to the Board with effect from 28 May 2020.

Mr Dheeraj Dikshit, having resigned from his position as Group Managing Director of FMB Capital Holdings Group during the year, resigned from the Board. On behalf of the Board, I would like to thank Dheeraj for his significant contribution to the Bank, steering us through our transition to First Capital Bank and leaving the Bank in a strong position

Transition from Co-Branding

As part of the transition agreement with Barclays, the current financial year was the last year of using the Co-Brand 'First Capital Bank in Association with Barclays'. While in reality our clients know us now as First Capital Bank, we will formally going forward operate as First Capital Bank on a stand-alone basis. As ever we truly appreciate and thank our customers for their continued custom and support through our transition.

Board priorities going forward.

The Board will continue to focus on delivering the Bank's strategy with key issues being growth and value preservation.

Dividend

The Board considered a number of factors to arrive at a dividend decision. These include the risks inherent in the market that could impact the Bank's performance and envisaged growth in the future.

After consideration of the above factors the Board does not propose a dividend for the year under review.

P. Devenish Chairman 10 March 2021

Managing Director's Statement

This year has once again been dominated by events outside our control, with the continuing impact of hyperinflation, a devaluing local currency and the impact of COVID-19. COVID-19 required the mobilization of Bank resources to facilitate working under new and challenging conditions and I am immensely proud of the way our strong business continuity management procedures and structures, coupled with outstanding team responses ensured seamless service delivery in 2020. Our 2020 results highlight the robustness of a business model that has positioned us on a future growth trajectory supported by a strategy that is built around our Values.

Financial Performance

The economy remains hyper-inflationary and the financial statements have therefore been presented in both historical and hyper-inflationary adjusted views.

The Bank's total deposits grew by 331% driven by a 298% growth in local currency deposits to ZWL4billion, while foreign currency deposits grew by ZWL3.7billion. These local currency deposits were deployed into loans, which grew by 279% to ZWL2.3billion, a 63% loan to deposit ratio. Foreign currency loans declined in value due to the repayments of high value corporate loans held prior year, although volumes increased compared to prior year.

Cost to income ratio improved from 95% to 50% on the back of growth in income. Funded income grew by 695%, driven by $increase in loans and advances together with an improved loans yield. \\Improved economic confidence in second half of 2020 \\$ saw transactional activity grow, which coupled with targeted price increases (due to inflationary pressure) saw increased fee and commission income. Operating costs increased on the back of inflation, exchange rate depreciation and COVID-19 related expenses. The Bank remains focused on efforts to contain the increase in costs.

The increases in impairment charge is the result of exchange rate movement on foreign currency assets together with the growth in local currency loans. Non-performing loans ratio stood at 0.16% lower than prior year 0.22% and market average

The Bank capital adequacy and liquidity ratio closed the year at 29% and 70% respectively, up from 26% and 55% in prior year whilst core capital stood at US\$26m.

Qualified audit opinion and compliance with IERS

The Bank obtained a qualified audit opinion for 2020 financial results. This relates to the prior year and is due to the impact of the introduction of the new currency RTGS dollar as part of the February 2019 Monetary Policy Statement, combined with the impact of the separation of Nostro and RTGS accounts in October 2018. While under international accounting standards, accounting for the change in currency would have been with effect from 1 October 2018, S.I 33 of 2019 mandated that all accounts up to 22 February 2019 should be reported at the effective exchange rate of 1:1. As directed, the legal requirement was followed in this regard resulting in a qualified audit opinion since compliance with International Accounting Standards (IASs) could not be fully achieved due to non-compliance with IAS 21.

The legal requirement to follow S.I. 33 of 2019 has a significant impact on the 2019 comparative balances. Refer to 2.1(e) for the detailed disclosure

Accelerated Development of Products and Services

Significant system investments made in prior year have resulted in increased platform stability, creating a springboard for more innovative product developments and seamless customer experience.

Within the Retail Banking space, we introduced our first money transfer agency partnership with Ria Financial Services, offering customers a safe and secure channel to send and receive money internationally. Our strategic partnership with Zimnat Insurance saw the launch of an inflation sensitive funeral plan which has helped customers to retain value. ATM services were resuscitated to allow customers to safely access cash services, thereby reducing footfall in branches. On the Commercial front, our product development was driven by customer feedback and the evolving needs of corporates and SME businesses. We introduced Infinipay, a bulk payment platform, USD Lending, increased Capex facilities, Loyalty Lending, and Invoice Discounting, Our Service delivery continues to be premised on our core values, namely integrity, honest conversations, innovation and service excellence underpinned by speed of execution.

Our colleague franchise remains the backbone of our operational capabilities, 2020 was a challenging year which saw the resilience and dedication of colleagues in ensuring minimal disruption of service delivery, allowing customers access to financial services across our networks. Amidst COVID-19 challenges, the health and safety of our staff, customers and service providers remained our top priority, as we presented innovative solutions to improve the work environment as guided by Government and key health authorities. We continued to provide support, through the provision of capabilities such as working from home, personal protective equipment (PPE), conducive work areas with compliant health protocols together with dedicated health consultants to support our colleagues and their families. Our long-term strategic focus growth has demanded that we re-align our business to a leaner, more efficient structure designed to acclimatize to a changing economy, changing customer transactional behaviour and ensuring the sustainability of our organisation for

We believe in responsible business ethics and our efforts have been firmly rooted within communities across the country. Even in challenging times, we remain committed to providing students with intern opportunities and over 200 university future leaders received on the job training. We have realised remarkable milestones over time owing to strategic collaborative efforts with key players in the Public Private Partnerships. We donated nearly half a million Zimbabwean dollars in a strategic partnership with Harare Institute of Technology (HIT) to increase production capacity of the existing sanitizer project. The donation helped to flatten the COVID-19 curve locally as it improved the supply chain to major medical warehouses and selfcare during this critical time.

We continue with business skills development through our online social media platforms. With a subscriber base of 21 000 women, our platform has benefited more than 7 000 members of the group from across the globe (light touch), in alliance with strategic partners ZimTrade, Telco, TelOne, Standards Association Zimbabwe, ZIMRA, Potraz and other industry experts. Our efforts have yielded significant impact and we are proud of this milestone as we upskill women entrepreneurs.

Looking Forward

2021 continues to pose many local and global uncertainties. However this has not limited our focus in achieving strong relationships with our customers who demand reliability, require innovation and expect excellent service delivery. These relationships are built on lasting values of integrity, collaboration, innovation, and service excellence. These values are critical to us and are the foundation of our long-term partnership with our customers

2020 demonstrated the outstanding professionalism and dedication of our colleagues within branches, service centers and offices across the country. This was a huge challenge for all in the prevailing conditions, and I would like to extend my sincere appreciation to all our staff members for their immense efforts this year. From those who worked from home to our front liners, their dedication was inspirational.

I would also like to thank our customers who continue to give us their vote of confidence by choosing us as their banking partners. Our driving forces have been inspired by Belief. Belief in the fact that even during the most trying of times, we have created opportunities for us all to achieve our Extraordinary

Ciaran McSharry Managing Director 10 March 2021

For the year ended 31 December 2020

Corporate Governance Statement

The Board of Directors of First Capital Bank Limited ("the Board/First Capital Bank") is committed to and recognises the importance of strong governance practices. The board understands that a comprehensive corporate governance framework $is \ vital in \ supporting \ executive \ management in its \ execution \ of \ strategy \ and \ in \ driving \ long \ term \ sustainable \ performance. In \ driving \ long \ term \ sustainable \ performance \ in \ driving \ long \ term \ sustainable \ performance \ in \ driving \ long \ term \ sustainable \ performance \ in \ long \ long \ term \ sustainable \ performance \ long \ long \ term \ sustainable \ performance \ long \ long \ long \ term \ sustainable \ performance \ long \ long \ long \ term \ sustainable \ performance \ long \ lo$ $order \ to \ achieve \ good \ governance, the \ Board \ subscribes \ to \ principles \ of \ international \ best \ practice \ in \ corporate \ governance$ as guided by, among others, the Banking Act [Chapter 24:20], the Companies and other Business Entities Act [Chapter 24:31], the Reserve Bank of Zimbabwe Corporate Governance Guideline No.1 of 2004, the Zimbabwe Stock Exchange Listing Rules SI134/2019 and the Zimbabwe National Code on Corporate Governance.

The Board continuously reviews its internal governance standards and practices, to ensure that it modifies and aligns them with local and international corporate governance requirements as appropriate. As part of its continuing efforts to achieve good governance, the Board promotes the observance of the highest standards of corporate governance in First Capital Bank and ensures that this is supported by the right culture, values and behaviours from the top down. First Capital Bank is committed to the principles of fairness, accountability, responsibility and transparency. To this end the Board, is accountable to its shareholders and all its stakeholders including the Bank's employees, customers, suppliers, regulatory $authorities \ and \ the \ community \ from \ which \ it \ operates \ through \ transparent \ and \ accurate \ disclosures.$

The Board is responsible for setting the strategic direction of the Bank as well as determining the way in which specific governance matters are approached and addressed, approving policies and plans that give effect to the strategy, overseeing and monitoring the implementation of strategy by management and ensuring accountability through among other means adequate reporting and disclosures. The Board is guided by the Board Charter in the execution of its mandate. The roles of the board Chairman and that of the Managing Director are separate and clearly defined and the board ensures a division of responsibilities at all times to achieve a balance of authority and power so that no one individual has unfettered decision making powers

Board Chairman and non-executive directors

The Board of directors is led by an independent non-executive Chairman, whose primary duties include providing leadership of the Board and managing the business of the Board through setting its agenda, taking full account of issues and concerns of the Board, establishing and developing an effective working relationship with the Executive directors, driving improvements in the performance of the Board and its committees, assisting in the identification and recruitment of talent to the Board, managing performance appraisals for directors including oversight of the annual Board effectiveness review and proactively managing regulatory relationships in conjunction with management. In addition, the non-executive directors proactively engage with the Bank's management to challenge and improve strategy implementation, counsel and support to management and to test and challenge the implementation of controls, processes and policies which enable risk to be effectively assessed and managed.

The Chairman works together with the non-executive directors to ensure that there are effective checks and balances between executive management and the Board. The majority of the Board members are independent non-executive directors which provide the necessary independence for the effective discharge of the Board's duties and compliance with regulatory requirements.

 $The \, executive \, management \, team \, is \, led \, by \, the \, Managing \, Director. \, Management's \, role \, is \, to \, act \, as \, trustees \, of \, the \, shareholder's \, the \, continuous \,$ capital. Their main responsibilities include reporting to the Board on implementation of strategy, effectiveness of risk management and control systems, business and financial performance, preparation of financial statements and on an ongoing basis, keeping the Board fully informed of any material developments affecting the business.

The Board Remuneration Committee sets the remuneration policy and approves the remuneration of the executive directors and other senior executives as well as that of the non-executive directors. The remuneration package of executive directors includes a basic salary and a performance bonus which is paid based on the performance of the company as well as that of the individual. The Bank also has in place a share option scheme, meant to be a long term retention incentive for employees

The First Capital Bank Board recognises the importance of diversity and inclusion in its decision making processes. The board is made up of six independent non-executive directors, two non-executive directors and two executive directors. Three members of the board (30%) are female. The Board members have an array of experience in commercial and retail banking accounting, legal, corporate finance, marketing, business administration, economics, human resources management and

Openness and transparency are key enablers for the Board to discharge its mandate fully and effectively. The non-executive directors have unrestricted access to all relevant records and information of the Bank as well as to management. Further, the board is empowered to seek any professional advice or opinion it may require to allow for the proper discharge of its duties.

The directors, management and staff of First Capital Bank are prohibited from dealing in the company's shares whether directly or indirectly, during "closed periods" which are the periods that are a month before the end of the interim or full year reporting period until the time of the publication of the interim or full year results.

Further, directors, management and staff are prohibited from dealing in the company's shares whenever the company is going through certain corporate actions or when they are in possession of non-public information that has the potential of impacting the share price of the company.

Communication with stakeholders

First Capital Bank communicates with its stakeholders through various platforms including the Annual General Meeting, analyst briefings, town halls, press announcements of interim and full year financial results, notices to shareholders and stakeholders and annual reporting to shareholders and stakeholders. The Board and management of First Capital Bank also actively engage regulatory authorities including the Reserve Bank of Zimbabwe, the Zimbabwe Stock Exchange and the Deposit Protection Corporation.

First Capital Internal Audit is an independent control function which supports the business by assessing how effectively risks are being controlled and managed. It works closely with the business helping drive improvements in risk management. This is a support of the control of this done through reviewing how the business undertakes its processes as well as reviewing systems used by the business. The internal audit function reports its findings to management and guides them in making positive changes to business processes, systems and the control environment. The Internal Audit function also monitors progress to ensure management effectively remediates any internal control weaknesses identified as quickly as possible. The First Capital Bank Head of $In ternal\ Audit\ reports\ directly\ to\ the\ Chairman\ of\ the\ Board\ Audit\ Committee\ and\ administratively\ to\ the\ Managing\ Director.$

The Board of First Capital Bank believes in the observance of ethical business values from the top to the bottom. To this end. the Board has in place a policy that manages conflict of interest including situational and transactional conflict. Directors disclose their interests on joining the Board and at every meeting of the directors they disclose any additional interests and confirm or update their declarations of interest accordingly.

In our endeavour to instil a culture of sound business ethics, all employees and directors are requested to attest to an Anti-Bribery and Corruption declaration which essentially seeks to ensure that our directors, management and staff observe the highest standards of integrity in all their dealings and at all times. The Bank has a zero tolerance policy to bribery and corruption. In addition, the business has a whistle-blowing facility managed by Deloitte through which employees can raise any concerns they may have anonymously.

Director induction and development

Board conformance and performance is enhanced through continuous learning. As part of its learning program, the Board has in place a comprehensive induction plan for on-boarding new directors. Further, as part of continuing director development, Board members attend director training programs.

The Board of Directors held four board meetings in the year 2020, one strategy review meeting and a board evaluation review meeting. Each board Committee held at least four quarterly meetings. The areas of focus included the setting of strategic direction, the review of strategy and business operations, business continuity in light of the COVID-19 pandemic and the attendant lock downs, credit sanctioning as per approved limits, review of internal controls and financial reports, review of the quality of the loan book, review and oversight of the Bank's risk management processes and oversight of the recruitment, remuneration and performance reviews of senior management. A table detailing director's attendance of meetings during 2020 is shown in the last part of this report.

Due to the COVID-19 pandemic, the board had to adopt to new ways of working as board meetings from quarter two of 2020 were held online to allow for physical and social distancing. The Board ensured that it continued to discharge its responsibilities in terms of the steering and setting of strategic direction, approval of relevant policies and plans, oversight over the implementation of strategic and operational plans and ensuring management remained accountable to all of the Bank's stakeholders. As a result, the board held its strategy review meeting for 2020 and strategy remained a key agenda item for all board meetings. Management continued to account to the Board through more frequent board updates shared electronically, which ensured that the board remained up to date regarding the implementation of strategic and operational plans and all other matters affecting or impacting the Bank.

Board and director evaluation

The Board conducts an annual evaluation process which assesses the performance and effectiveness of individual directors, the Board Chairman, Committees and overall performance of the Board. This process is facilitated by an external party to allow for objectivity. The evaluation process involves directors completing evaluation questionnaires and having one on one meeting with the facilitator. The results of the evaluation are collated, a report is produced and feedback provided to the Board. The Board also submits the evaluation report to the Reserve Bank of Zimbabwe. The Board conducted its evaluation for the year ended 2020 and a report was submitted to the RBZ. Board performance and evaluation was rated and evaluation was rated as a submitted to the RBZ. Board performance and evaluation was rated as a submitted to the RBZ. Board performance and evaluation was rated as a submitted to the RBZ. Board committees

The Board has delegated some of its duties and responsibilities to sub-committees to ensure the efficient discharge of the Board's mandate. The ultimate responsibility of running the Bank however still remains with the Board. The subcommittees of the Board are regulated by terms of reference which are reviewed every year or as and when necessary. The Committeesmeet at least once every quarter and are all chaired by Independent non-executive directors as detailed below

Audit Committee

The primary functions of the Committee are to oversee the financial management discipline of the Bank, review the Bank's $accounting \ policies, the \ contents \ of \ the \ financial \ reports, \ disclosure \ controls \ and \ procedures, \ management's \ approach \ to$ internal controls, the adequacy and scope of the external and internal audit functions, compliance with regulatory and financial reporting requirements, oversee the relationship with the Bank's external auditors, as well as providing assurance to the Board that management's control assurance processes are being implemented and are complete and effective. At each meeting, the Committee reviews reported and noted weaknesses in controls and any deficiencies in systems and the remediation plans to address them. The Committee also monitors the ethical conduct of the Bank, its executives and senior officers and advises the Board as to whether or not the Bank is complying with the aims and objectives for which it has $been\ established.\ During\ the\ period\ under\ review,\ there\ were\ no\ material\ losses\ as\ a\ result\ of\ internal\ control\ breakdowns.$

The committee is wholly comprised of independent non-executive directors. The members of the Committee as at 31 December 2020 were:

Board Credit Committee

The Board Credit Committee is tasked with the overall review of the Bank's lending policies. At each meeting, the Committee deliberates and considers loan applications beyond the discretionary limits of management. It ensures that there are effective procedures and resources to identify and manage irregular or problem credit facilities, minimize credit loss and maximize recoveries. It also directs, monitors, reviews and considers all issues that may materially impact on the present and future quality of the Bank's credit risk management.

The Committee comprises one executive member and three non-executive directors. The members of the Committee as at

- K. Terry (Chairperson)
- H. Anadkat
- K. Naik
- C. McSharry

This Committee has the overall responsibility for the complete review of the quality of the Bank's loan portfolio to ensure that the lending function conforms to sound lending policies and keeps the Board and management adequately informed on noted risks. It assists the Board with discharging its responsibility to review the quality of the Bank's loan portfolio. At every meeting, it reviews the quality of the loan portfolio with a view to ensuring compliance with the banking laws and regulations and all other applicable laws as well as internal policies.

The Committee comprises three non-executive directors. The members of the Committee as at 31 December 2020 were:-T. Moyo (Chairperson)

- S. N.Movo
- M. Twigger

Human Resources and Nominations Committee

The Human Resources and Nominations Committee assists the Board in the review of critical personnel issues as well as $acting \ as \ a \ Remuneration \ and \ Terminal \ Benefits \ Committee. The \ Committee \ reviews \ and \ approves \ overall \ recommendations$ on employee remuneration as well as approving managerial appointments. The Committee ensures that the remuneration of directors is in line with the nature and size of the operations of the Bank as well as the Banks performance. In addition, the Committee also considers nominations to the Board and succession planning for the Board

The Committee comprises three non-executive directors. The members of the Committee as at 31 December 2020 were:-K. Naik (Chairperson)

- P. Devenish
- H. Anadkat

The Board Risk Committee is charged with the responsibility to oversee the Bank's overall enterprise risk environmen $under\ three\ broad\ areas\ of\ Operational\ Risk,\ Credit\ Risk\ Management\ and\ Market\ Risk.\ These\ are\ controlled\ and\ managed$ independently from risk taking functions and other committees of the Bank. The committee is responsible for the policies and procedures designed to monitor, evaluate and respond to risk trends and risk levels across the Bank ensuring that they are kept within acceptable levels.

The Committee comprises two non-executive directors. As at 31 December 2020 members of the committee were:

- S. N. Moyo (Chairperson)
- A. Chinamo

Board IT Committee

The Board IT Committee is a committee of the Board, established to have strategic oversight and governance of the Company's strategic investment in IT, as well as data protection and information management.

The Committee comprises two non-executive directors and an executive director. As at 31 December 2020 the Committee was made up of the following members:-

- K. Terry (Chairperson)
- T. Moyo

In addition to the Board Committees, management operates through a number of committees including the Executive Management Committee and the Assets and Liabilities Committee. The Committees terms of reference are as below.

The Executive Committee is the operational management forum responsible for the delivery of the Bank's operational plans. The Executive Committee acts as a link between the Board and management and is responsible for implementation of operational plans, annual budgeting and periodic review of strategic plans, as well as identification and management of key risks. The Executive Committee also reviews and approves quidelines for employee remuneration. The Executive Committee assists the Managing Director to manage the Bank, to guide and control the overall direction of the business of the Bank and acts as a medium of communication and co-ordination between business units and the Board. The Committee comprises of executive directors and senior management.

Assets and Liabilities Committee (ALCO)/Treasury Committee

The Treasury Committee is tasked with ensuring the achievement of sustainable and stable profits within a framework of acceptable financial risks and controls. The Treasury Committee ensures maximization of the value that can be generated from active management of the Bank's balance sheet and financial risk within agreed risk parameters. It manages the funding and investment of the Bank's balance sheet, liquidity and cash flow, as well as exposure of the Bank to interest rate, exchange rate, market and other related risks. It ensures that the Bank adopts the most appropriate strategy in terms of the mix of assets and liabilities given its expectation of the future and potential consequences of interest rate movements, liquidity constraints and foreign exchange exposure and capital adequacy. It also ensures that strategies conform to the Bank's risk appetite and level of exposure as determined by the Risk Management Committee. The Committee comprises executive directors and heads of functions key to the proper discharge of the Committee's responsibilities.

For the year ended 31 December 2020

Notes to the Financial Results for the year ended 31 December 2020

General information and statement of compliance

First Capital Bank Limited ("the Bank") provides retail, corporate and investment banking services in Zimbabwe. The Bank which is incorporated and domiciled in Zimbabwe is a registered commercial bank under the Zimbabwe Banking Act Chapter (24:20). The ultimate parent company is FMBcapital Holdings PLC incorporated in Mauritius. The Bank has a primary listing on the Zimbabwe Stock Exchange.

2.1(a) Basis of preparation

The audited financial results have been prepared on the basis of IAS 29: Financial Reporting for Hyperinflationary Economies, as well as the requirements of the Companies and Other Business Entities Act (Chapter 24:31) and the Banking Act (Chapter 24.20). However, full compliance with IFRS could not be achieved. Refer to note 2.1(e).

The following All items CPI indices were used to prepare the financial results:

Dates	All items CPI Indices	Conversion factors
December 2020	2 474.51	1
December 2019	551.6	4.49

The procedures applied for the above restatement are as follows:

Financial statements prepared in the currency of a hyper-inflationary economy are stated in terms of the closing Consumer Price Index ("CPI") at the end of the reporting period. The historical cost financial information is re-stated for the changes in purchasing power (inflation), and corresponding figures for the prior period are restated in the

Monetary assets and liabilities are not restated while non-monetary assets and liabilities that are not carried at amounts current at balance sheet date and components of shareholders' equity are restated by the relevant monthly

 $All\,items\,in\,the\,income\,statement\,are\,restated\,by\,applying\,the\,relevant\,monthly, yearly\,average\,or\,year-end\,conversion$ factors. The effect of inflation on the net monetary position of the Bank is included in the income statement as a

2.1(b) Basis of measurement

The financial statements for the period are measured on historical cost basis except for the following:

- i) Fair value through OCI equity investments and debt instruments measured at fair value
- iii) In air value through profit and loss debt instruments for trading measured at fair value iii) Investment property measured at fair value

- iv) Land and buildings measured at fair value using the revaluation method.
 v) Investment in joint venture, the underlying investment is measured at fair value.
- vi) RBZ NOP receivable measured at fair value

2.1(c) Accounting policies

The accounting policies applied in the preparation of the audited financial results are consistent with the most recent financial statements for the year ended 31 December 2019.

2.1(d) Functional and presentation currency

The financial results are presented in Zimbabwe Dollars (ZWL), the functional and presentation currency of the Bank.

The Bank could not apply a market exchange rate to foreign currency balances at 31 December 2018 and foreign currency transactions that happened between October 2018 and February 2019 due to the requirements of (S.I.) 33, as a result some of the 2019 comparative balances are materially misstated.

The historical amounts are shown as supplementary information. This information does not comply with International Financial Reporting Standards in that it has not taken account of the requirements of International Accounting Standard 29: Financial Reporting for Hyperinflationary Economies. As a result the auditors have not expressed an opinion on the historical financial information.

2.1(g) Conversion of foreign currency transactions and balances at interbank exchanges rates The Bank used the interbank exchanges rates to convert foreign currency transactions and balances in the financial

results. The interbank exchanges rates were determined by management as appropriate given that during this period the Bank can demonstrate transactions where customers were buying and selling foreign currency at interbank rates and the Bank also purchased foreign currency at interbank rates for its own use.

2.1(h) Audit opinion and key audit matters

The audited financial results should be read in conjunction with a complete set of financial statements for the year ended 31 December 2020 which have been audited by Deloitte & Touche with a qualified audit opinion issued thereon. The audit report carries a qualified opinion due to non-compliance with International Accounting Standard 21 - ``The Effects of Changes in Foreign Exchange Rates" in accounting for change in functional currency in the comparative period ended 31

Key audit matters

The following have been identified as key audit matters for the year:

- Determination of expected credit losses on financial assets
 Valuation of properties; and
- Valuation of financial asset relating to legacy debt

The auditors` report has been made available to management and those charged with governance of First Capital Bank Limited. The engagement partner responsible for this audit is Tumai Mafunga.

For the year ended 31 December 2020

Notes to the Financial Results for the year ended 31 December 2020

Derivative financial instruments

The Bank uses cross-currency swaps to manage the foreign currency risks arising from asset and deposit balances held which are denominated in foreign currencies. Forward exchange contracts are for trading and foreign currency risk management purposes.

Carrying amount

The fair value of the derivative financial instruments represents the present value of the positive or negative cash flows, which would have occurred if the rights and obligations arising from that instrument were closed out in an $\frac{1}{2}$ orderly market place transaction at year end.

Contract amount

The gross notional amount is the sum of the absolute value of all bought and sold contracts. The amount cannot be used to assess the market risk associated with the position and should be used only as a means of assessing the Bank's participation in derivative contracts.

Treasury bills and bonds classified as investment securities are held to collect contractual cash flows and sell if the need arises. They are measured at fair value.

 $Expected\ credit\ losses\ are\ accounted\ for\ through\ impairment\ reserve\ in\ equity.\ A\ total\ of\ ZWL455\ 777\ was\ recognised$ in the reserve as at December 2020.

Equity securities are designated as fair value through other comprehensive income and measured at fair value.

 $Properties were \ valued \ in \ United \ States \ Dollars \ and \ translated \ at \ closing \ interbank \ rate \ to \ ZWL.$

Property and equipment was subjected to impairment testing by way of internal evaluation of obsolescence of equipment. Revaluation takes place after every three years or anytime if there are material movements in property values. Land and buildings were revalued at 31 December 2020 by an independent valuer. If land and buildings were stated on the historical cost basis, the carrying amount would be ZWL343 323 419 (2019: ZWL349 751 771). No items of property and equipment were pledged as collateral as at 31 December 2020. The fair value measurement of property has been categorised as Level 3 in the fair value hierarchy (Note 34) based on the inputs to the valuation technique used.

Properties were valued in United States Dollars and translated at closing interbank rate to ZWL.

Operating costs incurred on investment properties during the year were ZWL2 million. Investment property comprises commercial properties that are leased to third parties. No contingent rents are charged.

The fair value of investment property was determined by external, independent property valuers, having the appropriate recognised professional qualifications and recent experience in the location and category of the property being valued. The independent valuers provide the fair value of the Bank's investment property portfolio annually.

The fair value measurement of the investment property has been categorised as Level 3 in the fair value hierarchy (Note 34) based on the inputs to the valuation technique used.

The staff retention incentive represents a provision for a performance based staff incentive to be paid to staff and is included in staff costs. Employee entitlements to annual leave are recognised when they accrue to employees. The provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the reporting date and the charge is recognised in profit or loss within staff costs.

28 Retirement benefit plans

Barclays Bank Pension Fund

The Barclays Bank Pension Fund ("The Fund") manages retirement funds for the active members and pensioners. The Fund is run by appointed Trustees. The assets of the Funds are managed as one composite pool, with no separation for the active members and pensioners. The awarding of pension increases and increase in accumulated values to active members is done in consideration of the performance of the Fund and any requirement to increase risk reserves.

The plan assets comprise of property, bank balance, equity instruments and money market deposits at 31 December 2020.

Risk management

Financial risk management objectives

The Bank's business involves taking on risks in a targeted manner and managing them professionally. The core functions of the Bank's risk management are to identify all key risks for the Bank, measure these risks, manage the risk positions and determine capital allocations. The Bank regularly reviews its risk management policies and systems to reflect changes in markets, products and best market practice.

The Bank's aim is to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Bank's financial performance.

The Bank defines risk as the possibility of losses or profits foregone, which may be caused by internal or external $factors. \ The \ Board \ provides \ written \ principles \ for \ overall \ risk \ management, \ as \ well \ as \ written \ policies \ covering \ specific$ areas, such as foreign exchange risk, interest rate risk and credit risk. Internal audit and Operational Risk and Control departments are responsible for the review of risk management and the control environment.

 $The \ risks \ arising \ from \ financial \ instruments \ to \ which \ the \ Bank \ is \ exposed \ include \ among \ other \ risks \ credit \ risk, \ liquidity$ risk, market risk and operational risk.

For the year ended 31 December 2020

Notes to the Financial Results for the year ended 31 December 2020

31.1 Capital risk management

Capital risk – is the risk that the Bank is unable to maintain adequate levels of capital which could lead to an inability to support business activity or failure to meet regulatory requirements

The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position, are:

- To comply with the capital requirements set by the banking regulators;
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns For shareholders and benefits to customers and other stakeholders and;
- To maintain a strong capital base to support the development of its business

Capital adequacy and the use of regulatory capital are monitored daily by the Bank's management and the Directors, employing techniques based on guidelines developed by the Basel Committee as implemented by the Reserve Bank of Zimbabwe for supervisory purposes. The Bank's regulatory capital comprises of three tiers;

- Tier 1 Capital: comprises contributed capital, accumulated profits, share based payment reserve and currency translation reserve.
- Tier 2 Capital: comprises impairment allowance, revaluation reserve and part of currency translation reserve
- Tier 3 Capital: comprises operational and market risk capital.

The Reserve Bank of Zimbabwe requires each bank to maintain a core capital adequacy ratio of 8% and total capital adequacy ratio of 12%. The table below summarises the composition of regulatory capital and the ratios of the Bank

Tier 1 and 2 capital ratio	27%	26%
Total capital adequacy ratio	29%	26%

Credit risk capital - is subject to guidelines provided by the regulator which are based on Basel 1 principles. On this approach the banking book exposures are categorised into broad classes of assets with different underlying risk characteristics. Risk components are transformed into risk weighted assets using predetermined exposure and loss $probability\ factors.\ Capital\ requirements\ for\ credit\ risk\ are\ derived\ from\ the\ risk\ weighted\ assets$

Market risk capital - is assessed using regulatory guidelines which consider the risk characteristics of the different trading book assets. Risk components are transformed into risk weighted assets and, therefore, capital requirements, based on predetermined exposure and loss probability factors.

Operational risk capital - is assessed using the standardised approach. This approach is tied to average gross income over three years per regulated business lines as indicator of scale of operations. Total capital charge for operational risk equals the sum of charges per business lines.

31.2 Interest rate risk

Current tax liabilities

Total liabilities

Cumulative gap

Due to group companies

Interest rate re - pricing gap

Interest rate risk is the risk that the Bank will be adversely affected by changes in the level or volatility of market interest rates. The Bank is exposed to various risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The responsibility of managing interest rate risk lies with the Assets and Liabilities Committee (ALCO). On a day to day basis, risks are managed through a number of management committees. Through this process, the Bank monitors compliance within the overall risk policy framework and ensures that the framework is kept up to date. Risk management information is provided on a regular basis to the Risk and Control Committee and the Board.

31.3 Market risk

The Bank takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

The Bank separates exposures to market risk into either trading or banking book. Trading portfolios include those positions arising from market-making transactions where the Bank acts as principal with clients or with the market; this is mainly to support client trading activity.

Non trading book primarily arises from the management of the Bank's retail and commercial banking assets and liabilities.

Market risk measurement techniques

The objective of market risk measurement is to manage and control market risk exposures within acceptable limits while optimising the return on risk.

The measurement techniques used to measure and control market risk include:

(i) Daily Value at Risk ("DVaR")

The Bank applies a 'value at risk' ("VaR") methodology to its banking portfolios to estimate the market risk of positions held if current positions were to be held unchanged for one business day.

Value at Risk is a statistically based estimate of the potential loss on the current portfolio from adverse market movements. It expresses the maximum amount the Bank might lose but only to a certain level of confidence. There is therefore a statistical probability that actual loss could be greater than the 'VaR' estimate. The 'VaR' model makes assumptions on the pattern of market movements based on historical holding periods. The use of this approach does not prevent losses outside of these limits in the event of more significant market movements. 'DVaR' is an estimate of the potential loss which might arise from unfavourable market movements, if the current positions were held unchanged for one business day, measured to a confidence of 99%. Daily losses exceeding the 'DVaR' figure are likely to occur, on average twice in every 100 business days.

(ii) Stress tests

Stress tests provide an indication of losses that could arise in extreme positions.

Foreign exchange stress risk (currency stress) is the potential loss against the Bank if there is a large foreign exchange movement (expected once in every five years).

The table below summarises the DVaR statistics for the Bank relating to currency stress.

	Inflatio	on adjusted	Historical

Aggregate VaR as at 31 December 2020	431 754	34 666	431 754	24 437	

ALCO closely monitors this risk. The Bank is satisfied with its risk management processes and systems in place which

Net interest income sensitivity ("NII")

NII measures the sensitivity of annual earnings to changes in interest rates. NII is calculated at a 15% and 5% change in local currency and foreign currency interest rates respectively.

Inflation adjusted

Benchmark	-	-	-	-

(iii) Economic capital

Economic capital methodologies are used to calculate risk sensitive capital allocations for businesses incurring market risk.

Consequently the businesses incur capital charges related to their market risk.

31.4 Foreign exchange risk

This is a risk that the value of a financial liability or asset denominated in foreign currency will fluctuate due to changes in the exchange rate. The Bank takes on exposures to the effects of fluctuations in the prevailing foreign currency exchange rates in the financial position and cash flows. Foreign exchange risk is managed through use of Daily Value at Risk techniques and Stress tests. In addition mismatches on foreign exchange assets and liabilities are minimised through the daily monitoring of the net foreign exchange exposure by treasury. Currency swaps are also used to manage foreign exchange risk where necessary.

The table below summarises the Bank's interest rate risk exposure.

31.5 (a) Credit risk

Credit risk is the risk of financial loss should the Bank's customers, clients or market counter parties fail to fulfil their contractual obligations to the Bank. The Bank actively seeks to originate and manage credit risk in such a way as to achieve sustainable asset growth and risk adjusted returns in line with board-approved risk parameters. The credit risk that the Bank faces arises mainly from corporate and retail loans advances and counter party credit risk arising from derivative contracts entered into with our clients. Other sources of credit risk arise from treasury bills, government bonds, settlement balances with counter parties and bank balances with Central Bank and other related banks. Credit risk management objectives are:

- Supporting the achievement of sustainable asset and revenue growth in line with our risk parameters;
- Operating sound credit granting processes and monitoring credit risk using appropriate models to assist decision making;
- Ensure credit risk taking is based on sound credit risk management principles and controls; and
- Continually improving collection and recovery.

(b)Credit risk grading

The Bank uses internal credit risk gradings that reflect its assessment of the probability of default of individual counter parties. The Bank uses internal rating models tailored to the various categories of counter party. Borrower and loan specific information collected at the time of application (such as level of collateral; and turnover and industry type for wholesale exposures) is fed into this rating model. This is supplemented with external data such as credit bureau scoring information on individual borrowers. In addition, the models enable expert judgement to be fed into the final internal credit rating for each exposure. This allows for considerations which may not be captured as part of the other data inputs into the model.

The credit scores from this model are mapped to the regulatory scale with 10 grades. Corporate exposures are monitored by grading exposures into early warning list for those customers who are believed to be facing difficulties. Customers are categorised into Early Warning Lists ("EWL") 1-3. Those in EWL1 have temporary problems and the risk of default is low. EWL2 implies there are doubts that the customer will pay but the risk of default is medium. EWL3 implies that there are doubts that the customer will pay and the risk of default is high

After the date of initial recognition, for retail business, the payment behaviour of the borrower is monitored on a periodic basis to develop a behavioural internal credit rating. Any other known information about the borrower which impacts their creditworthiness such as unemployment and previous delinquency history is also incorporated into the behavioural internal credit rating. These ratings are reflected on the following delinquency bucket; Performing loans (Bucket 0); 1day to 30 days past due (Bucket 1); 30 days to 60 days past due (Bucket 2); 60 days to 89 days past due (Bucket 3) and 90 days+ past due (default,Bucket 4).

(c) Expected credit losses measurement (ECLs)

The expected credit loss (ECLs) - is measured on either a 12 - month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be

- ECLs are discounted at the effective interest rate of portfolio
- $\label{thm:contractual} The\ maximum\ period\ considered\ when\ estimating\ ECLs\ is\ the\ maximum\ contractual\ period\ over\ which\ the\ Bank$ is exposed to credit risk
- The Bank uses a portfolio approach to calculate ECLs. The portfolios are segmented into retail, corporate and
- treasury and further by product. Expected credit losses are the probability weighted discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

Probability of default (PD) - is the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired" below), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation. PDs are modelled using historic data into 12 month and Lifetime PDs. Where data is not available proxies which resemble the risk of default characteristics of the exposure are used. The PDs are determined at portfolio level and segmented into various products.

PDs modelled using historical data are then adjusted for forward looking factors. PDs are mapped into regulatory grades as follows

Corporate exposures

Stage 1	12 Month PD	Central Bank Grades 1 to 3 or performing grade
Stage 2	Life Time PD	Central Bank Grades 4 to 7 - (internal grade EWL 1 & EWL 2) or special mention
Stage 3	Default PD	Central Bank Grades 8 to 10 - (internal grade EWL 3 & classified) or substandard, or worse

recorr exp		
Stage 1	12 Month PD	Central Bank Grades 1 to3 (internal grades bucket 0 & bucket 1) or performing grade
Stage 2	Life Time PD	Central Bank Grades 4 to 7 (internal grades bucket 2 & bucket 3) or special mention
Stage 3	Default PD	Central Bank Grades 8 to 10 (internal grades bucket 4) or substandard, or worse

Treasury exposures

For debt securities in the treasury portfolio and interbank exposures, performance of the counter party is mon for any indication of default. PDs for such exposures are determined based on benchmarked national ratings mapped to external credit rating agencies grade. For other bank balances where there are external credit ratings PDs are derived using those external credit ratings.

Exposure at default (EAD) - is the amount the Bank expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For a revolving commitment, the EAD includes the current drawn balance plus any further amount that is expected to be drawn up by the time of default, should it occur. For term loans EAD is the term limit while for short term loans and retail loans EAD is the drawn balance. Debt securities and interbank balances EAD is the current balance sheet exposure.

Loss given default (LGD) - represents the Bank's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counter party, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan. LGD is modelled based on historical data. LGD for sovereign exposure is based on observed recovery rates for similar economies.

The Bank considers a financial asset to be in default when:

- The borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank to actions such as realising security (if any is held); or
- The financial asset is more than 90 days past due

IFRS 9 outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition as

i) 12 month ECLs; (Stage 1 - no increase in credit risk)

ECLs measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. The 12 month ECL is calculated for the following exposures:

- Corporate loans with regulatory grades from 1 3 Retail loans graded in bucket 0 and bucket 1
- Debt securities, loans to banks and bank balances which are not past due; and
- These are a product of 12 months PD, 12 months LGD and EAD

ii) Life time ECLs (Stage 2 - significant increase in credit risk refer to 31.5d) ECLs are measured based on expected credit losses on a lifetime basis. It is measured for the following exposures;

- Corporate loans with regulatory grades from grade 4 to grade 7 (Early Warning List 1 and Early Warning List 2) Retail loans in bucket 2 to 3 (bucket 2 is 30 days to 60 days past due, bucket 3 is 60 days to 90 days past due)
- Debt securities, loans to banks and bank balances where the credit risk has significantly increased since initial
- recognition; and These are a product of lifetime PD, lifetime LGD and EAD.

iii) Life time ECLs (Stage 3 - default)

ECLs are measured based on expected credit losses on a lifetime basis. This is measured on the following exposures.

- All credit impaired/ in default corporate and retail loans and advances to banks and other debt securities in default. These are corporates in regulatory grade 8 10 (EWL3) and retail loans in bucket 4 Exposures which are 90 days+ past due; and

- These are a product of default PD, lifetime LGD and EAD.

(d) Significant increase in credit risk (SICR)
When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank's historical experience and informed credit assessment and including forward-looking information

The assessment of significant increase in credit risk incorporates forward looking information and is performed on a monthly basis at a portfolio level for all retail loans. Corporate and treasury exposures are assessed individually through the Early Warning list which is reviewed monthly and monitored by an independent team in credit risk department, and quarterly reviews by the Impairment Committee of exposures against performance criteria.

Significant increase in credit risk - Quantitative measures

- Corporate loans if the loan is reclassified from regulatory grades 1 3 to grades 4 7
- Retail loans if the loan is reclassified from buckets 0 and 1 to buckets 2 to 3
- Treasury exposures which are past due.

Significant increase in credit risk - Qualitative measures retail and corporate

There are various quantitative measures which include:

- Retail Retrenchment, Dismissal, Salary diversion, employer facing difficulties
- Corporate Adverse business changes, changes in economic conditions, quality challenges, among others.

(e) Benchmarking Expected Credit Loss

Corporate and treasury

Due to lack of sufficient historical information on corporate and treasury portfolio defaults from which PDs and LGDs are derived, a judgemental benchmarking is used parallel to the corporate and treasury model output. The higher of benchmarking ECL and the model output is considered as the final ECL. $\label{eq:ecl} % \begin{center} \begin$

(f) Forward – looking information incorporated in the ECL models

(r) Forward – tooking information incorporated in the ELL models

The assessment of SICR and the calculation of ECLs both incorporate forward-looking information. The Bank has
performed historical analysis and identified the key economic variables impacting credit risk and expected credit
losses for each portfolio. The key economic variables identified were GDP growth, interest rates and import cover
ratio. These economic variables and their associated impact on the ECL vary by financial instrument. Expert judgment has also been applied in this process.

(g) Write - offs - The Bank will write off retail accounts following charge off of the account if the equivalent of an instalment is not recovered cumulatively over a 12-month period post charge off. Corporate accounts are written off once security has been realised depending on the residual balance and further recovery prospects. The corporate write off policy is not rules based, or time bound.

(h) ECL model governance

The models used for PD, EAD and LGD calculations are governed on a day to day through the Impairments Committee. This committee comprises of senior managers in risk, finance and the business. Decisions and key judgements made by the Impairments Committee relating to the impairments and model overrides will be taken to Board Risk, Board

(i)Maximum exposure to credit risk by credit quality grade before credit enhancements The Bank has an internal rating scale which is mapped into the Basel II grading system. The internal rating is broadly

classified into; performing loans, standard monitoring and non-performing.

Performing loans

Loans and advances not past due and which are not part of renegotiated loans are considered to be performing assets, these are graded as per RBZ credit rating scale as grade 1 - 3.

Non-performing grade

These are loans and advances which are less than 90 days past due and in some cases not past due but the business has significant concern on the performance of that exposure, as per RBZ credit rating scale these are grade 4 - 7.

These are loans and overdrafts on which interest is no longer accrued or included in income unless the customer pays

back. These non-performing (past due) assets include balances where the principal amount and / or interest is due and

Standard monitoring grade

unpaid for 90 days or more, as per RBZ credit rating scale these are grade 8 - 10. Loans and advances renegotiated During the year the Bank renegotiated loans and advances to customers, balance of renegotiated loans as at 31 December 2020 was ZWL38 million (2019: NIL). Re- negotiations related to customers with operations that were

directly impacted by COVID-19. Maximum credit risk exposure

31.7 Liquidity risk

Liquidity risk is the risk that the Bank may fail to meet its payment obligations when they fall due and to replace funds when they are withdrawn, the consequences of which may be the failure to meet the obligations to repay deposits and fulfil commitments to lend. Liquidity risk is inherent in all banking operations and can be affected by a range of Bank specific and market wide events. The efficient management of liquidity is essential to the Bank in maintaining confidence in the financial markets and ensuring that the business is sustainable

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Bank's short, medium and long term funding and liquidity management requirements.

Liquidity risk management objectives are;

- Growing and diversifying the funding base to support asset growth and other strategic initiatives, balanced with a strategy to reduce the weighted cost of funds;
- To maintain the market confidence in the Bank:
- Maintaining adequate levels of surplus liquid asset holdings in order to remain within the liquidity risk appetite;
- Set early warning indicators to identify the emergence of increased liquidity risk or vulnerabilities;
- To maintain a contingency funding plan that is comprehensive

Liquidity risk management process

Liquidity risk is managed as;

a) Business as usual referring to the management of cash inflows and outflows of the bank in the ordinary course

b) Stress liquidity risk – refers to management of liquidity risk during times of unexpected outflows. The Bank's Assets and Liabilities Committee ("ALCO") monitors and manages liquidity risk. The Bank's liquidity management process as carried out by the ALCO and Treasury units includes:

- Day to day funding and monitoring of future cash flows to ensure that funding requirements are met;
- Maintaining a high balance of cash or near cash balances that can easily be liquidated as protection against unforeseen funding gaps;
- $Monitoring\ liquidity\ ratios\ against\ internal\ and\ regulatory\ benchmarks;$
- Limits are set across the business to control liquidity risk;
- Early warning indicators are set to identify the emergence of increased liquidity risk and;
- Sources of liquidity are regularly reviewed by ALCO to maintain a wide diversification of source of funding;
- Managing concentration of deposits.

The Bank determines ideal weights for maturity time buckets which are used to benchmark the actual maturity profile. Maturity mismatches across the time buckets are managed through the tenor of new advances and the profile of time deposits by ALCO .

32 Other risks

Strategic risk

The roles of the chairman and the managing director are not vested in the same person. The executive team formulates the strategy under the guidance of the Board which approves it. The executive directors bear the responsibility to execute the approved strategy. The Board reviews the performance and suitability of the strategy at least quarterly.

Legal and compliance riskThe Risk Management Committee ensures that the management and operations of the Bank's business is done within the governance and regulatory control framework established by FMBcapital Holdings PLC, the Reserve Bank of Zimbabwe and other regulatory bodies. A dedicated legal and compliance unit is in place to monitor legal and compliance requirements and ensure that they are met on a daily basis.

Reputation risk

The Bank adheres to very strict reputation standards set for FMBcapital Holdings PLC based on its chosen set of values. The Human Resources Committee of the Board assists the Board in ensuring that staff complies with set policies and practices consistent with the reputation demands of both the Bank and the industry. The compliance unit and human resources function monitor compliance by both management and staff with the Bank's ethical codes and compliance standards in managing conduct risk.

This is the risk of losses arising from inadequate or failed internal processes, people and/or systems or from external events. A significant part of the Bank's operations are automated and processed in the core banking system. Key banking operations in corporate and investment banking, retail and business banking and treasury are heavily dependent on the Bank's core banking system. The core banking system also supports key accounting processes for financial assets, financial liabilities and revenue including customer interface on mobile, internet banking and related electronic platforms.

Practices to minimise operational risk are embedded across all transaction cycles. Risk workshops are held for the purpose of identifying major risks in the operating environment and methods of mitigating the risks. The Bank employs the standardised approach to determine capital required to cover operational risk. Each function carries out a risk and control assessment of their processes on a regular basis. The assessment results are reviewed by Operational Risk Management department. Internal Audit audits selected functions at given times

Risks and RatingsThe Central Bank conducts regular examinations of Banks and financial institutions it regulates. The last on-site examination of the Bank was as at 30 June 2016 and it assessed the overall condition of the Bank to be satisfactory. This is a score of "2" on the CAMELS rating scale. The CAMELS rating evaluates banks on capital adequacy, asset quality, management and corporate governance, liquidity and funds management and sensitivity to market risks.

The CAMELS and Risk Assessment System (RAS) ratings are summarised in the following tables;

CAMELS ratings

CAMELS component	Latest Rating - June 2016
Capital	1 - Strong
Asset quality	2 - Satisfactory
Management	2 - Satisfactory
Earnings	1 - Strong
Liquidity and funds management	2 - Satisfactory
Sensitivity to market risk	1 - Strong

For the year ended 31 December 2020

Notes to the Financial Results for the year ended 31 December 2020

Interpretation of risk matrix

Level of inherent risk

Low - reflects lower than average probability of an adverse impact on a banking institution's capital and earnings. Losses in a functional area with low inherent risk would have little negative impact on the banking institution's overall financial condition.

Moderate - could reasonably be expected to result in a loss which could be absorbed by a banking institution in the normal course of business.

High - reflects a higher than average probability of potential loss. High inherent risk could reasonably be expected to result in a significant and harmful loss to the banking institution.

Adequacy of risk management systems

Weak - risk management systems are inadequate or inappropriate given the size, complexity and risk profile of the banking institution. Institution's risk management systems are lacking in important ways and therefore a cause of $more\ than\ normal\ supervisory\ attention.\ The\ internal\ control\ systems\ will\ be\ lacking\ in\ important\ aspects,\ particularly$ as indicated by continued exceptions or by the failure to adhere to written policies and procedures.

Acceptable - management of risk is largely effective but lacking to some modest degree. While the institution might be having some minor risk management weaknesses, these have been recognised and are being addressed. Management information systems are generally adequate.

Strong - management effectively identifies and controls all types of risk posed by the relevant functional areas or $per inherent \ risk. \ The \ Board \ and \ senior \ management \ are \ active \ participants \ in \ managing \ risk \ and \ ensure \ appropriate$ policies and limits are put in place. The policies comprehensively define the Bank's risk tolerance. Responsibilities and accountabilities are effectively communicated.

Overall composite risk

Low - would be assigned to low inherent risk areas. Moderate risk areas may be assigned to a low composite risk where internal controls and risk management systems are strong and effectively mitigate much of the risk.

Moderate - risk management systems appropriately mitigates inherent risk. For a given low risk area, significant weaknesses in the risk management systems may result in a moderate composite risk assessment. On the other hand, a strong risk management system may reduce the risk so that any potential financial loss from the activity would have only a moderate negative impact on the financial condition of the organisation.

 $\textbf{High-} \textbf{risk} \, \textbf{management} \, \textbf{systems} \, \textbf{do} \, \textbf{not} \, \textbf{significantly} \, \textbf{mitigate} \, \textbf{the} \, \textbf{high} \, \textbf{inherent} \, \textbf{risk}. \, \textbf{Thus,} \, \textbf{the} \, \textbf{activity} \, \textbf{could} \, \textbf{potentially} \, \textbf{mitigate} \, \textbf{the} \, \textbf{high} \, \textbf{inherent} \, \textbf{risk}. \, \textbf{Thus,} \, \textbf{the} \, \textbf{activity} \, \textbf{could} \, \textbf{potentially} \, \textbf{mitigate} \, \textbf{the} \, \textbf{high} \, \textbf{inherent} \, \textbf{risk}. \, \textbf{Thus,} \, \textbf{the} \, \textbf{activity} \, \textbf{could} \, \textbf{potentially} \, \textbf{mitigate} \, \textbf{the} \, \textbf{high} \, \textbf{inherent} \, \textbf{risk}. \, \textbf{Thus,} \, \textbf{the} \, \textbf{activity} \, \textbf{could} \, \textbf{potentially} \, \textbf{mitigate} \, \textbf{the} \, \textbf{high} \, \textbf{inherent} \, \textbf{mitigate} \, \textbf{mitigate} \, \textbf{the} \, \textbf{high} \, \textbf{mitigate} \,$ result in a financial loss that would have a significant impact on the Bank's overall condition.

Direction of overall composite risk

Increasing- based on the current information, risk is expected to increase in the next 12 months. Decreasing - based on current information, risk is expected to decrease in the next 12 months. Stable - based on current information, risk is expected to be stable in the next 12 months.

INDEPENDENT AUDITOR'S REPORT To the Shareholders of First Capital Bank Limited

Report on the audit of the inflation adjusted financial statements

Qualified opinion

We have audited the inflation adjusted financial statements of First Capital Bank Limited (the "Bank") set out on pages 21 to 75, which comprise the inflation adjusted statement of financial position as at 31 December 2020, the inflation adjusted statement of profit or loss and other comprehensive income, the inflation adjusted statement of changes in equity and the inflation adjusted statement of cash flows for the year then ended, and the notes to the inflation adjusted financial statements, including a summary of significant accounting policies.

In our opinion, except for the effects of the matters described in the Basis for qualified opinion section of our report, the accompanying inflation adjusted financial statements present fairly, in all material respects, the inflation adjusted financial position as at 31 December 2020, and its inflation adjusted financial performance and inflation adjusted cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS") and in the manner required by the Banking Act (Chapter 24:20), the Companies and Other Business Entities Act (Chapter 24:31) and the relevant statutory instruments.

Basis for qualified opinion

Impact of incorrect date of application of International Accounting Standard (IAS) 21 "The Effects of Changes in Foreign Exchange Rates" on comparative financial information

As disclosed in note 2.1(C) of the inflation adjusted financial statements, the Bank did not comply with IAS 21 in the prior financial year, as it elected to comply with Statutory Instrument 33 of 2019 ("SI 33/19") from 22 February 2019. Had the Bank applied the requirements of IAS 21, many of the elements of the prior year financial statements, which are presented as comparative information, would have been materially impacted. Therefore, the departure from the requirements of IAS 21 was pervasive in the prior year. In addition, the IAS 29 "Financial Reporting in Hyperinflationary Economies" inflation adjustments in prior year were applied to incorrectly determined balances, as a result of the non-compliance with IAS 21.

Our opinion on the current year's inflation adjusted statement of financial position is modified because of the possible effects of the matter on the comparability of the current year's inflation adjusted financial statements with those of the prior year.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of financial statements in Zimbabwe. We have fulfilled our ethical responsibilities in accordance with these requirements and the IESBA code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the inflation adjusted financial statements of the current period. These matters were addressed in the context of our audit of the inflation adjusted financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the Basis for Qualified Opinion section of our report, we have determined the matters described below to be the key audit matters.

Report on the audit of the inflation adjusted financial statements

Key Audit Matters

Key Audit Matter

How the matter was addressed in the audit

1. Determination of expected credit losses on financial assets (continued)

As disclosed in note 37.5 the expected credit losses (ECL)reflected in the inflation adjusted statement of financial position as at 31 December 2020 determined in accordance with International Financial Reporting Standard 9, "Financial Instruments" (IFRS 9), amounts to ZWL\$94.4million (2019 ZWL\$162 million).

This was considered a key audit matter as the determination of the ECL requires significant judgement such as:

- Models used to determine the ECL provisions are complex and might not have considered all relevant factors such as macroeconomic data for forecasts and the data used for historical analysis might not be accurate; and
- The estimation of the key components of the expected credit loss such as probability of default, loss given default and exposure at default requires judgement in the determination of the inputs.

The judgements and estimates used in the determination of the ECL have been detailed as per note 3 of the inflation adjusted financial statements.

To respond to the matter, we performed audit procedures which included:

- Tested the design and implementation of controls around the determination of the expected credit losses;
- Reviewed the Bank's IFRS 9 based impairment provisioning policy, compared it with the requirements of IFRS 9 and performed an independent assessment on the appropriateness of the model;
- Reviewed the back-testing assessment to determine reasonableness of the prior year ECL balance;
- Reviewed the appropriateness of the Bank's determination of significant increase in credit risk and the resultant basis for classification of exposures into various stages;
- Tested the assumptions used in the ECL calculations and assessed these for reasonability;
- With the assistance of an auditors' specialist performed an independent assessment on the appropriateness of the model;
- Reviewed the calculation of the Loss Given Default (LGD)
 used in the ECL calculations, including the
 appropriateness of the discounting of ECL performed by
 management and the resultant arithmetical calculations;
- Assessed whether forward looking information has been incorporated into the Bank's ECL computations for all financial assets subject to IFRS 9 impairment and whether it is appropriate in light of the current economic environment; and
- Evaluated the impact of any findings identified on the expected credit loss provision.
- Evaluated the appropriateness of financial statement disclosures around the expected credit loss on financial statements. The disclosures and accounting were found to be appropriate in terms of the relevant accounting standards.

The disclosures and accounting pertaining to the property was found to be appropriate in terms of the relevant accounting standards.

Report on the audit of the inflation adjusted financial statements

Key Audit Matters (continued)

Key Audit Matter

How the matter was addressed in the audit

2. Valuation of properties

As disclosed in note 3 of the inflation adjusted financial statements, the Bank has owner occupied properties, investment properties and investment in Makasa Sun which are recognised at fair value and are an area of significant judgement and estimates.

The directors make use of independent external valuers in determining the fair values of property. Valuations by their nature involve the use of judgment and estimates which involve significant unobservable inputs such as

- Market rentals
- Risk yields

The complexity and subjectivity of these may result in material misstatement. The current economic environment is extremely volatile given the valuation intricacies impacting property in the Zimbabwean market. We identified the valuation of investment property as representing a key audit matter due to the significance of the balance to the financial statements as a whole, combined with the level of judgement associated with determining the fair values including the applicable and most reasonable rate to use in the ZWL fair valuation of the USD valued properties.

Judgements and estimates used in the valuation of properties have been disclosed as per note 3 of the inflation adjusted financial statements.

To respond to the matter, we performed the following procedures:

- We assessed the competence, capabilities, objectivity and independence of the directors' independent valuers, and assessed their qualifications.
- We made enquiries of the directors' independent external valuers to obtain an understanding of the valuation techniques and judgements adopted.
- We assessed the work performed by the independent external valuers in valuing investment property by performing the following:
 - Reviewed the valuation methods used and assessed whether they are appropriate and consistent with the reporting requirements;
 - Assessed the reasonableness of expected rentals and risk yields by comparing to historic trends;
 - We performed physical verification of a sample of assets to determine whether the conclusion reached by the expert where consistent with the physical condition of the asset;
 - Assessed the reasonableness of the COVID discount applied by the property valuer on the Makasa Sun property by benchmarking against movements in the occupancy rates in the hotel industry as well as benchmarking against movements in the investment property valuations done in other entities for 2020.
 - Assessed reasonableness of using the interbank exchange rate in the valuation of United States Dollar (USD) denominated property valuations; and
 - Evaluated the financial statement disclosures for appropriateness and adequacy.

The disclosures and accounting pertaining to the property was found to be appropriate in terms of the relevant accounting standards.

Report on the audit of the inflation adjusted financial statements

Key Audit Matters (continued)

Key Audit Matter How the matter was addressed in the audit 3. Valuation of the financial asset relating to legacy debt. As disclosed in Note 20 of the inflation adjusted financial To address this matter, we performed the following statements, the Bank has recognised a procedures: receivable ZWL\$879.2million from the Reserve Bank of Zimbabwe ("RBZ") for funding the Bank's foreign liability We reviewed the foreign liability gap funding funding gap which arose after separation of RTGS and confirmations from the Reserve Bank of Zimbabwe foreign currency balances by the Reserve Bank of ("RBZ"). Zimbabwe. To test the fair valuation of the receivable, we performed the The fair value of the receivable on initial recognition was following procedures: determined as the present value of expected future cash flows discounted at a rate. Subsequently the receivable Reviewed supporting documentation for the legacy debt was recognised at amortised cost with an expected credit including any agreements in place; loss being recognised at year end. Engaged an audit specialist to evaluate the discount rate Given the materiality of the balance and the judgment used by management as to whether it is appropriate as applied in determining the timing of the cash flows and well as to evaluate the cashflow projections and the the discount rate applied in determining the fair value, we forecasts done by management; have determined this to be a key audit matter. This included assessing cash flows against historical The valuation assumptions are disclosed in Note 40.3 of performance and assessing growth rate effected in the the inflation adjusted financial statements. forecast cashflows; and Evaluated the appropriateness of financial statement disclosures. The disclosures and accounting were found to be appropriate

Other Information

The directors are responsible for the other information. The other information comprises the Directors' Responsibilities and approval, Chairman's statement, Managing Director's review of operations, Directors' report, Corporate governance statement, Analysis of Shareholding, Notice of Annual General Meeting, Annual General Meeting form of proxy and the historic cost financial information which we obtained prior to the date of this auditor's report. The other information does not include the inflation adjusted financial statements and our auditor's report thereon.

in terms of the relevant accounting standards.

Our opinion on the inflation adjusted financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the inflation adjusted financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the inflation adjusted financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact.

As described in the Basis for Qualified Opinion section above, the Bank changed its functional currency to the RTGS Dollar effective 22 February 2019. The date of change in functional currency as determined in accordance with IFRS is 1 October 2018. Consequently, the measurement of transactions between 1 October 2018 and 22 February 2019 does not comply with the requirements of IAS 21, as such, transactions have not been appropriately translated in accordance with these Standards. We have determined that the other information is misstated for that reason.

Report on the audit of the inflation adjusted financial statements

Responsibilities of the Directors for the inflation adjusted financial statements

The directors are responsible for the preparation and fair presentation of the inflation adjusted financial statements in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Companies and Other Business Entities Act (Chapter 24:31), the Banking Act (Chapter 24:20) and the Banking Amendment Act No. 12 of 2015, and for such internal control as the directors determine is necessary to enable the preparation of inflation adjusted financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the inflation adjusted financial statements, the directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the inflation adjusted financial statements

Our objectives are to obtain reasonable assurance about whether the inflation adjusted financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these inflation adjusted financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the inflation adjusted financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the inflation adjusted financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the inflation adjusted financial statements, including the disclosures, and whether the inflation adjusted financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on the audit of the inflation adjusted financial statements

Auditor's responsibilities for the audit of the inflation adjusted financial statements (continued)

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the inflation adjusted financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

In fulfilment of the requirements of Section 193 of the Companies and Other Business Entities Act (Chapter 24:31) ("the Act"), we report to the shareholders as follows.

Section 193(1)

Except for the of the matters described in the Basis for qualified opinion section of our report, the inflation adjusted financial statements of the Bank have been properly drawn up in accordance with the Act and do give a true and fair view of the state of the Bank's affairs as at 31 December 2020.

Section 193(2)

We have no matters to report in respect of the Section 193(2) requirements of the Act.
